Amazon Delivery Van

A City-scale electric delivery van: big windscreen, ring headlights, the smile on both sides, parcels at the open door.

Free LEGO Amazon Delivery Van instructions as a printable PDF: a fan-made LEGO MOC built from 102 standard LEGO pieces in 11 steps, with the pieces for every step and a full parts list.

Build it in 3D, step by step:

An unofficial fan build. All standard pieces; any similar colour works. Every stud is checked. LEGO is a trademark of the LEGO Group, which does not sponsor this site.

STEP

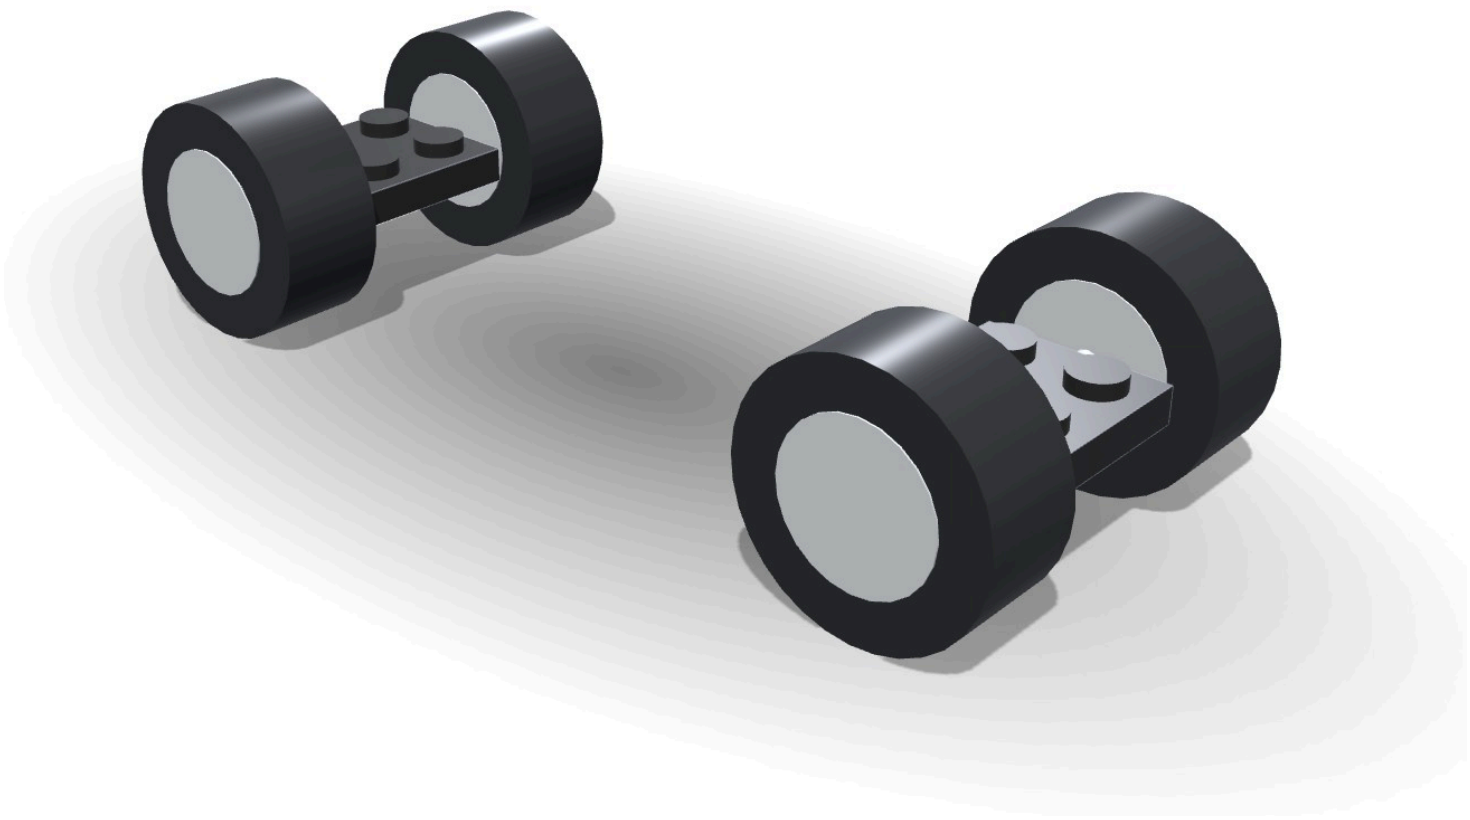

1

4x 2x

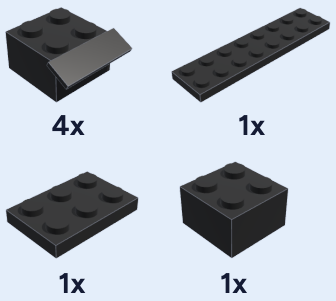

Wheels

Push four wheels onto the two black wheel plates.

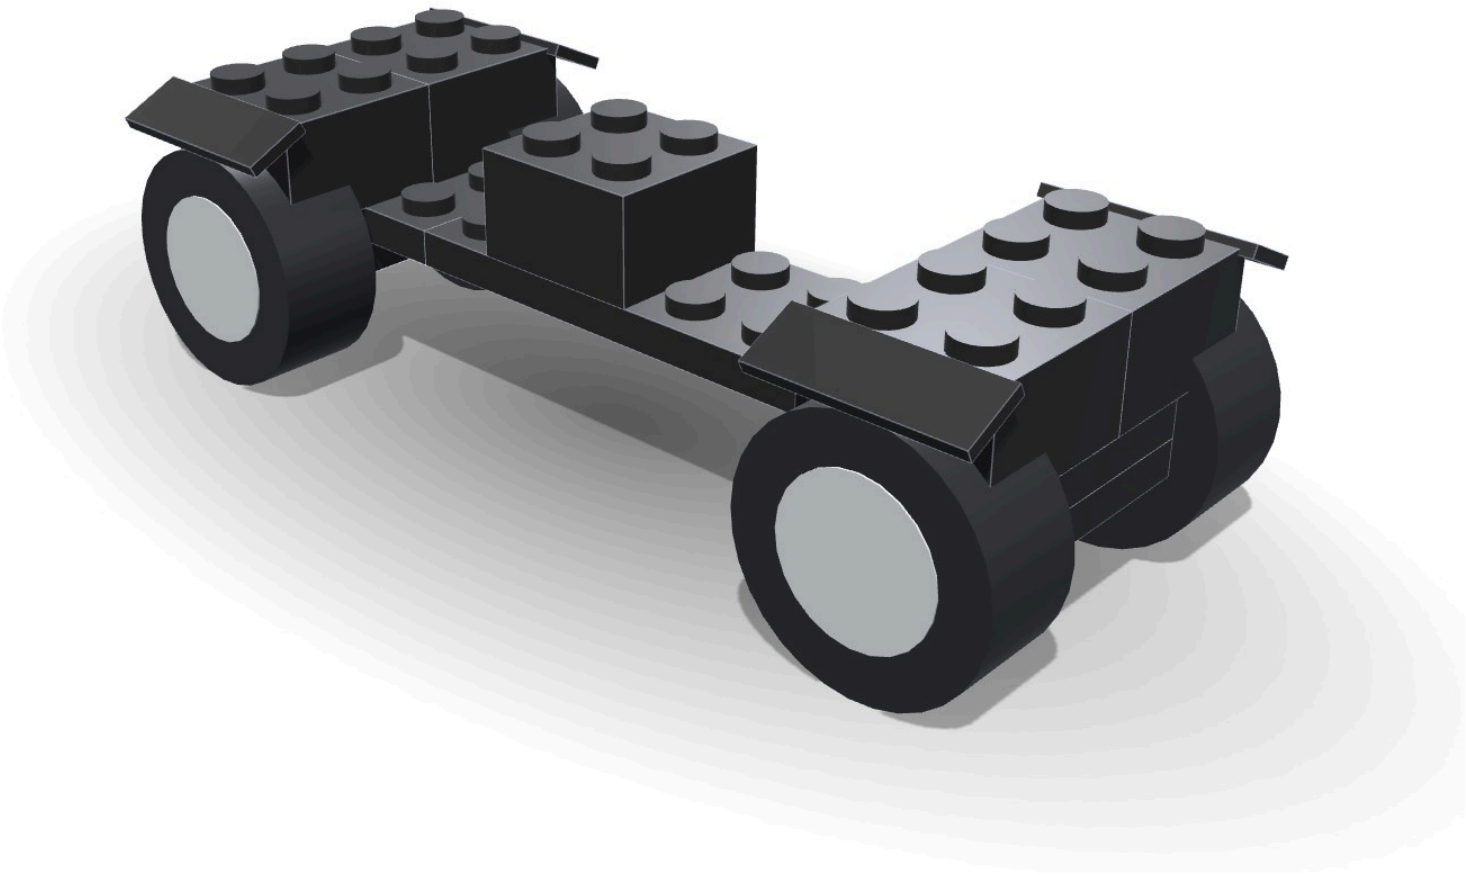

STEP

2

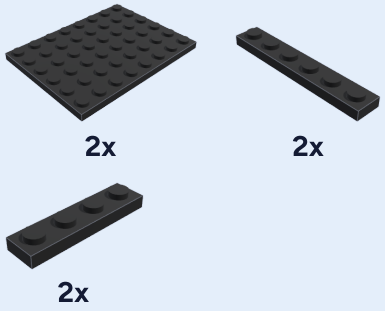

Spine, mudguards and centre block

Join the wheel plates with a 2-wide strip, put a mudguard over each wheel with its lip toward the tyre, and the 2×2 brick in the middle.

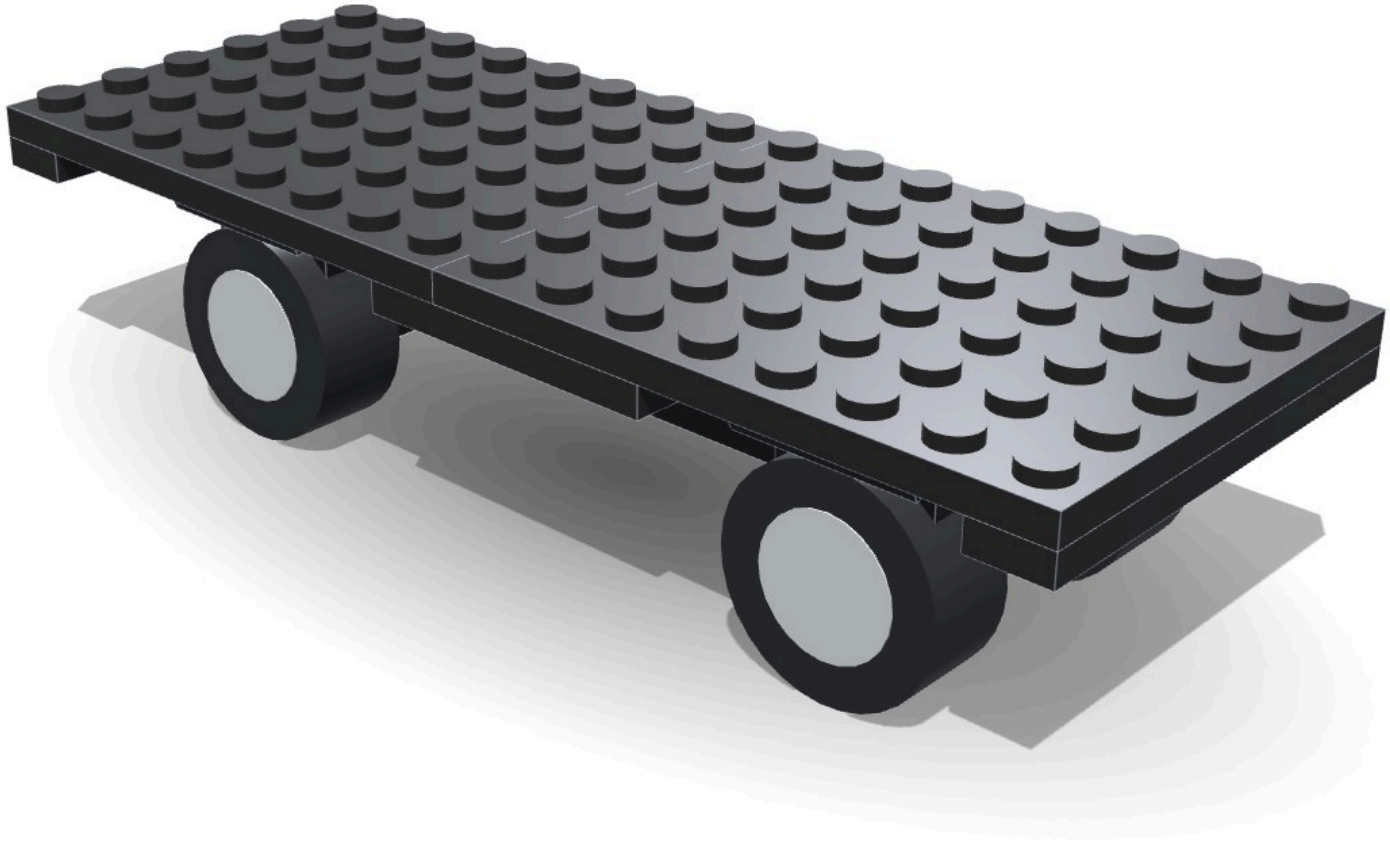

STEP

3

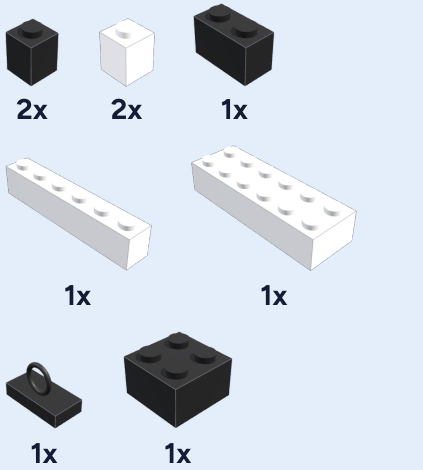

Deck

Two black 6×8 plates on the mudguards and the centre block, then clip the bumpers and side skirts underneath.

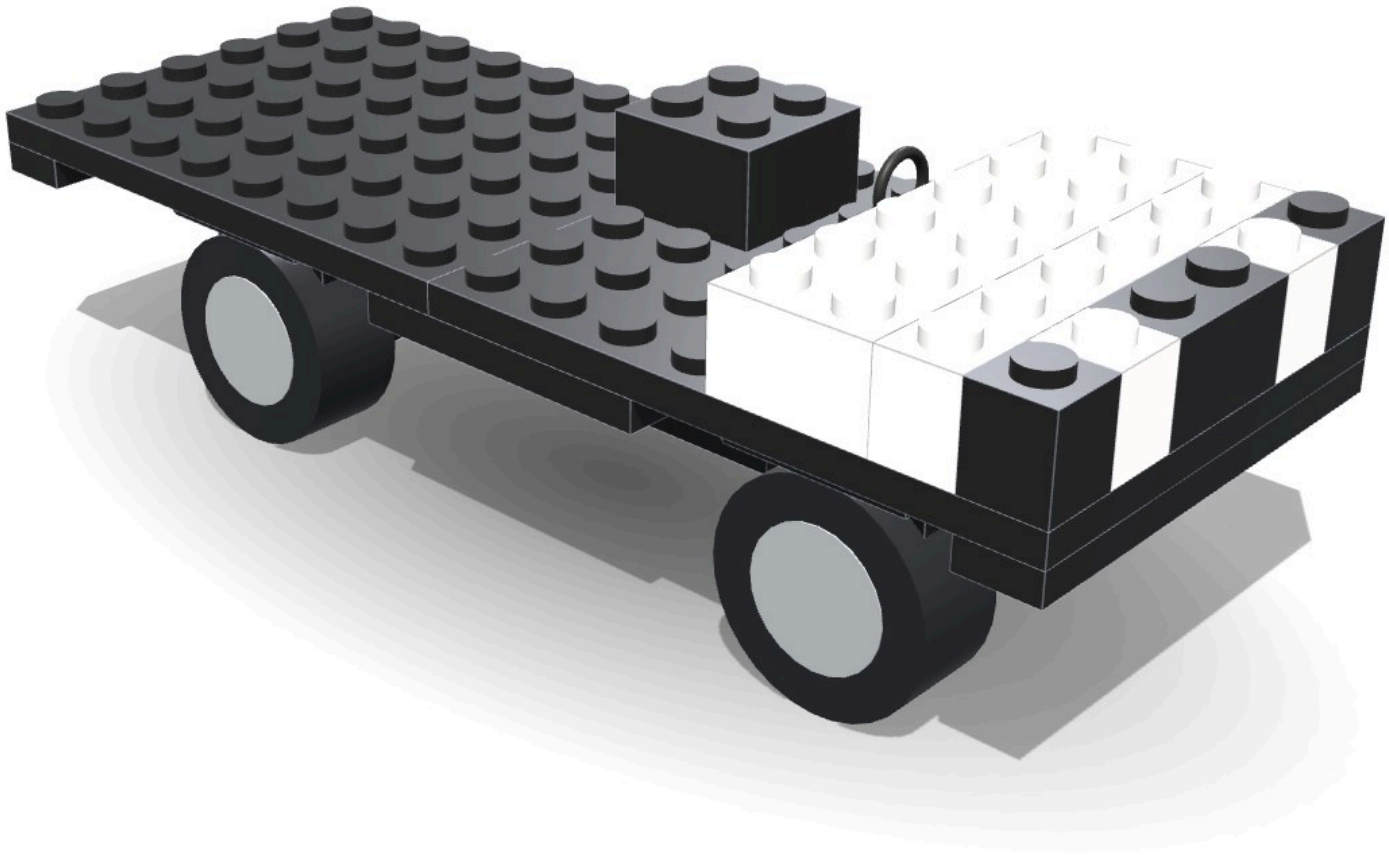

STEP

4

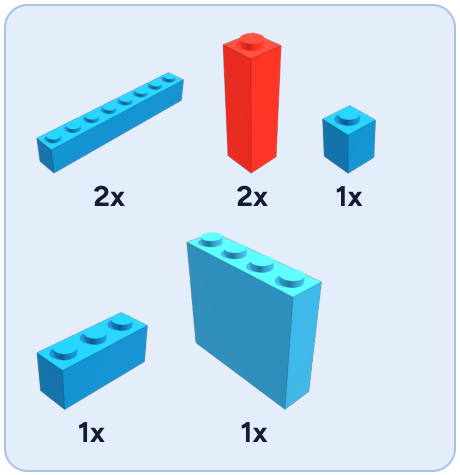

Face and cab

Headlights and the black face at the front, white bricks under the windscreen, the steering wheel and the driver's seat.

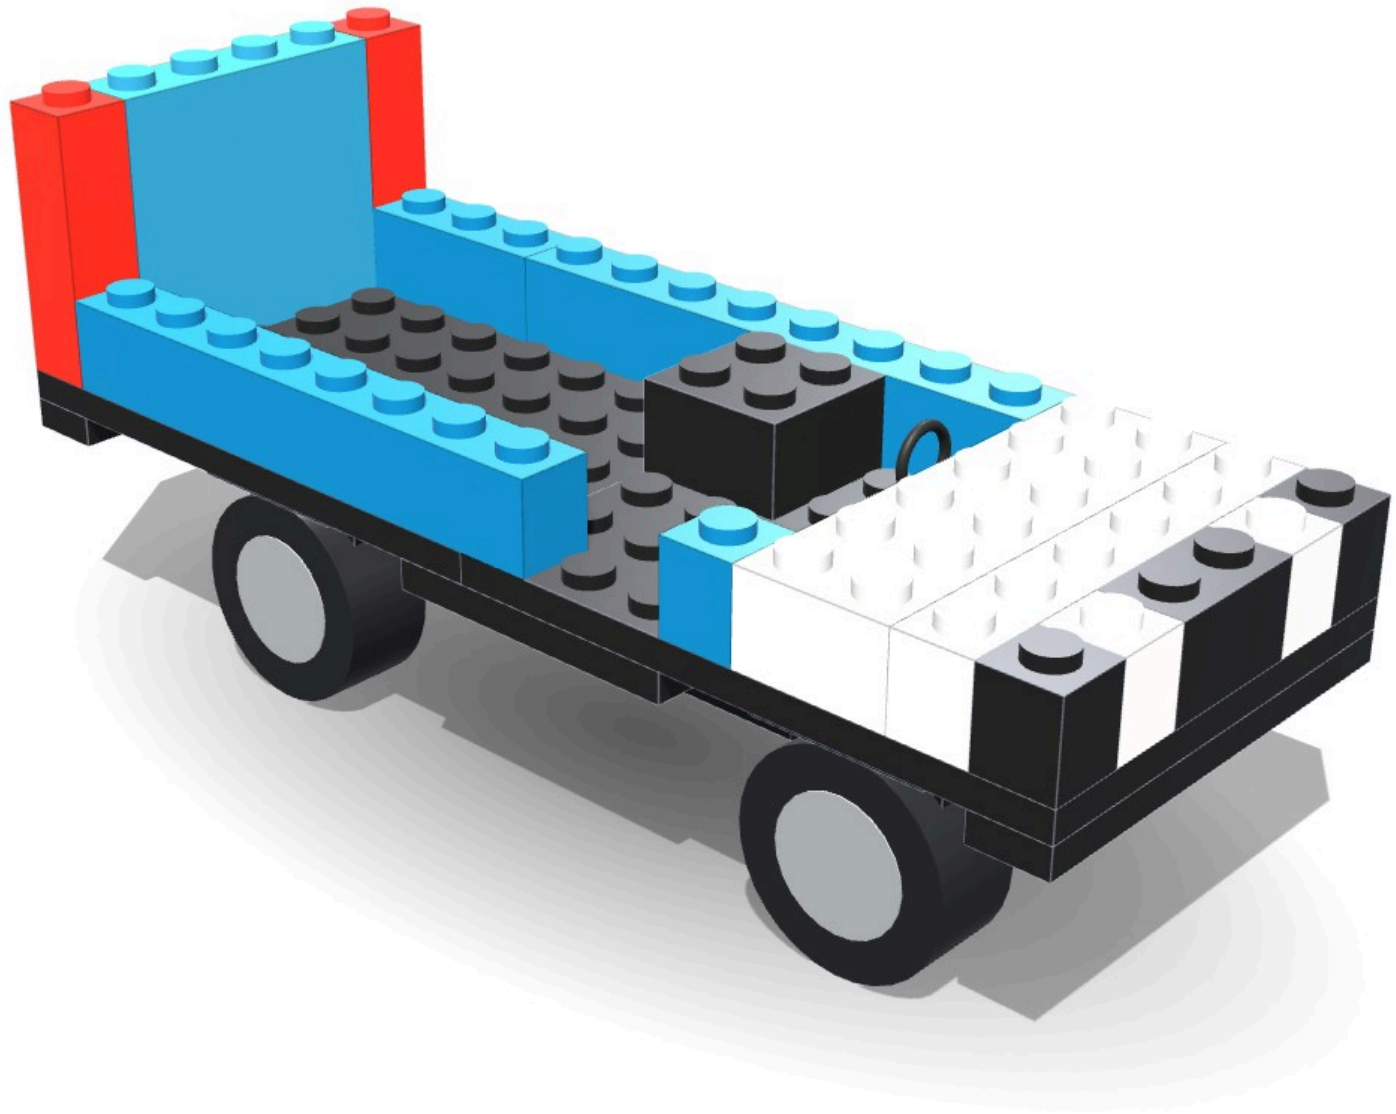

STEP

5

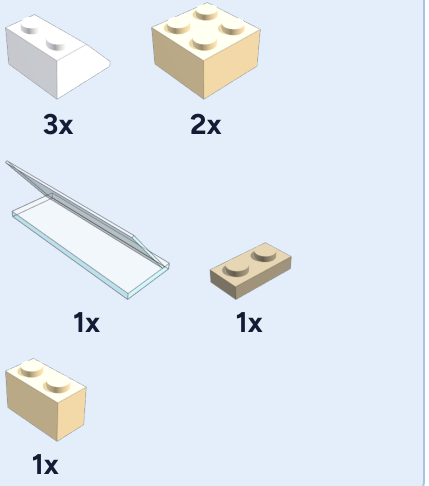

Blue band

The blue band along both sides (leave the curb-side door open) and the bottom of the back: red light bars and the blue roll-up door.

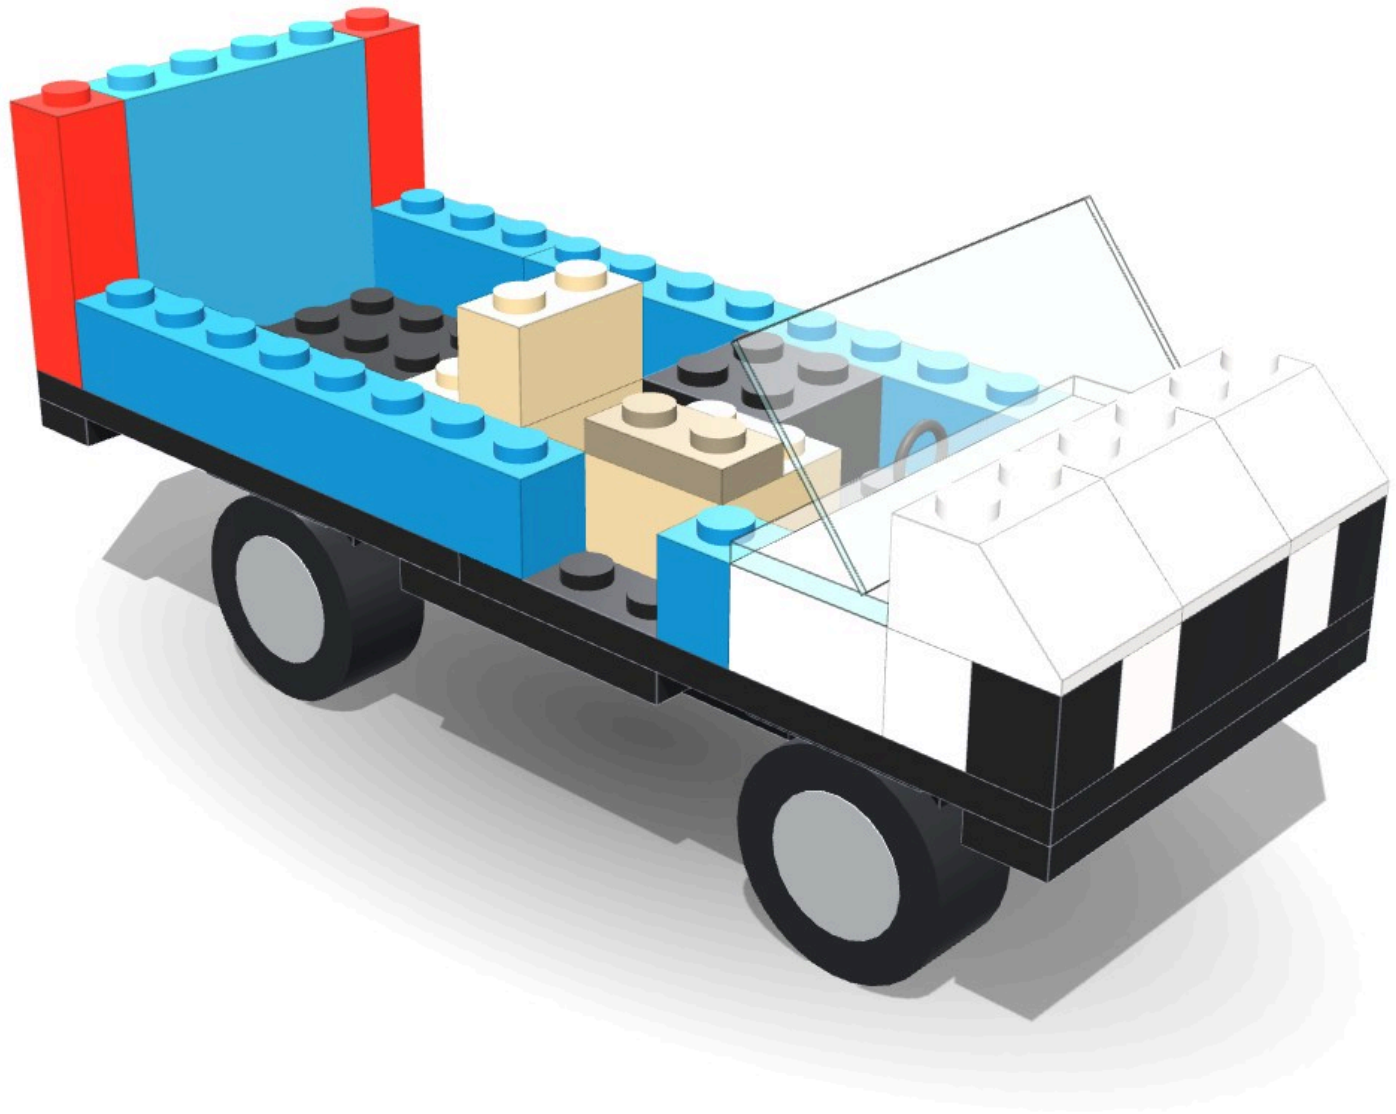

STEP

6

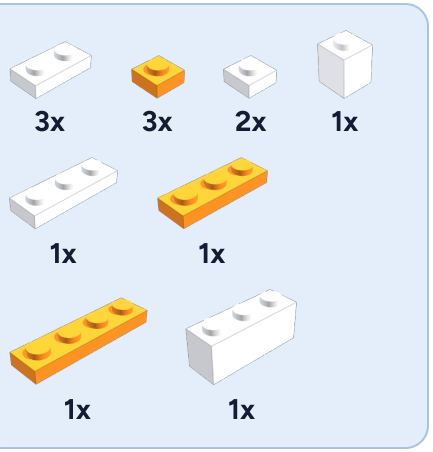

Nose, windscreen and parcels

Three white slopes for the short nose, the big windscreen, and the parcels waiting at the open door.

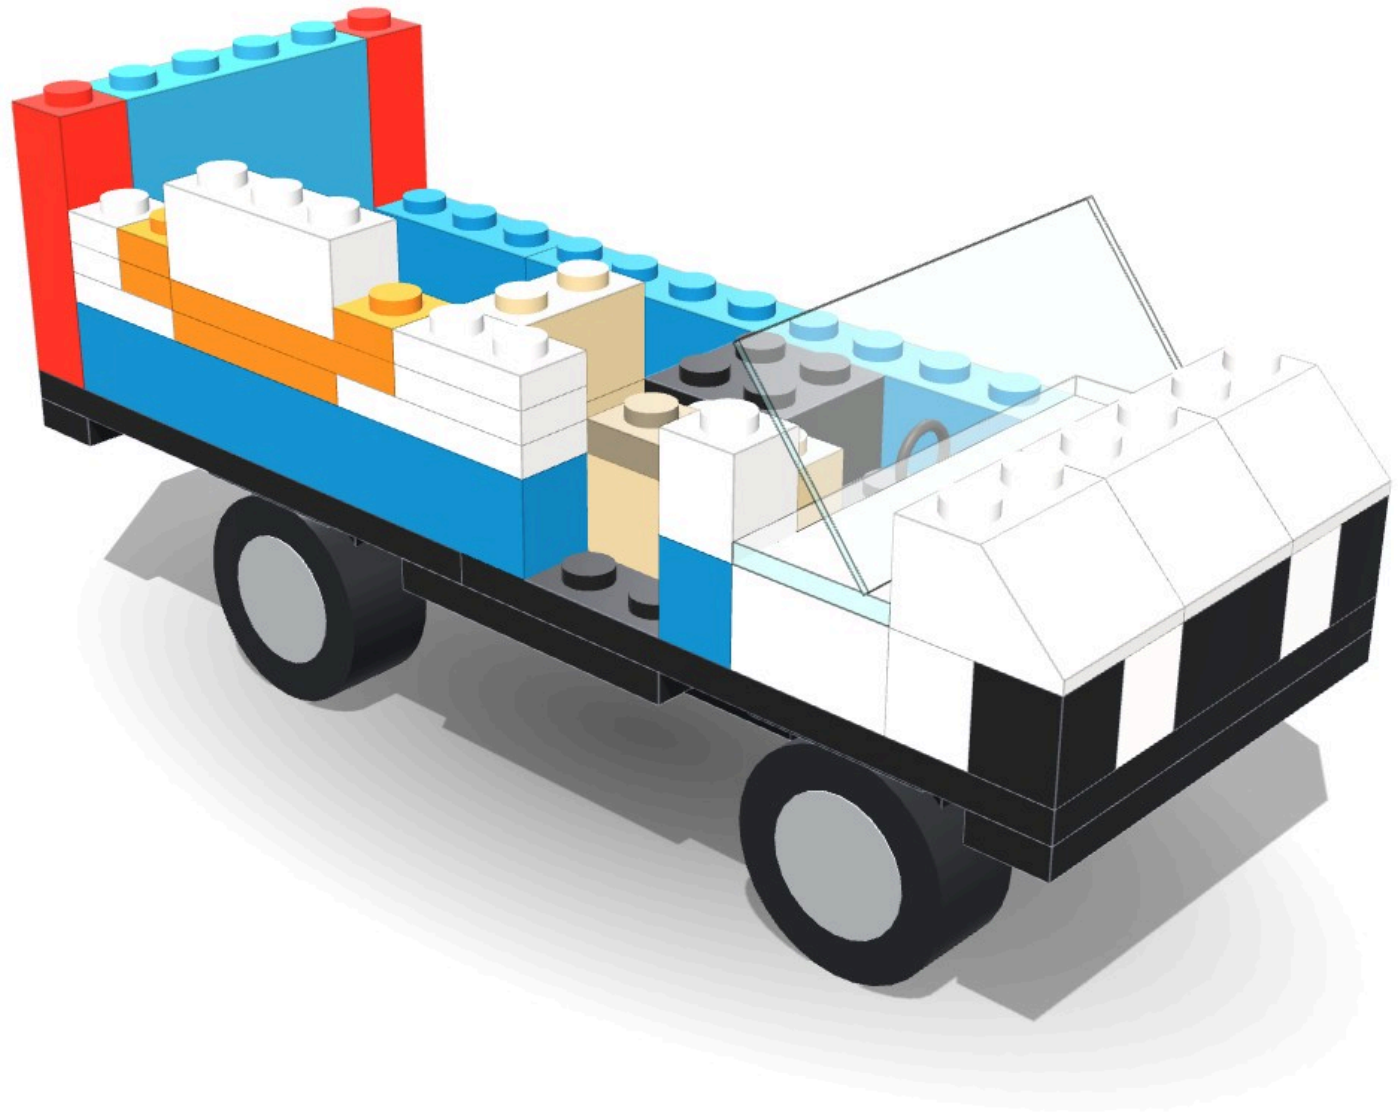

STEP

7

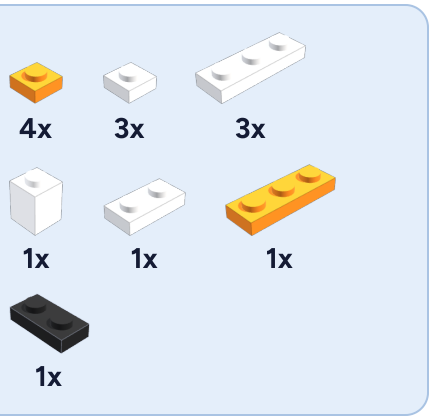

Curb side: bottom of the smile

Build up the curb side beside the open door: white, with the orange curve of the smile dipping low.

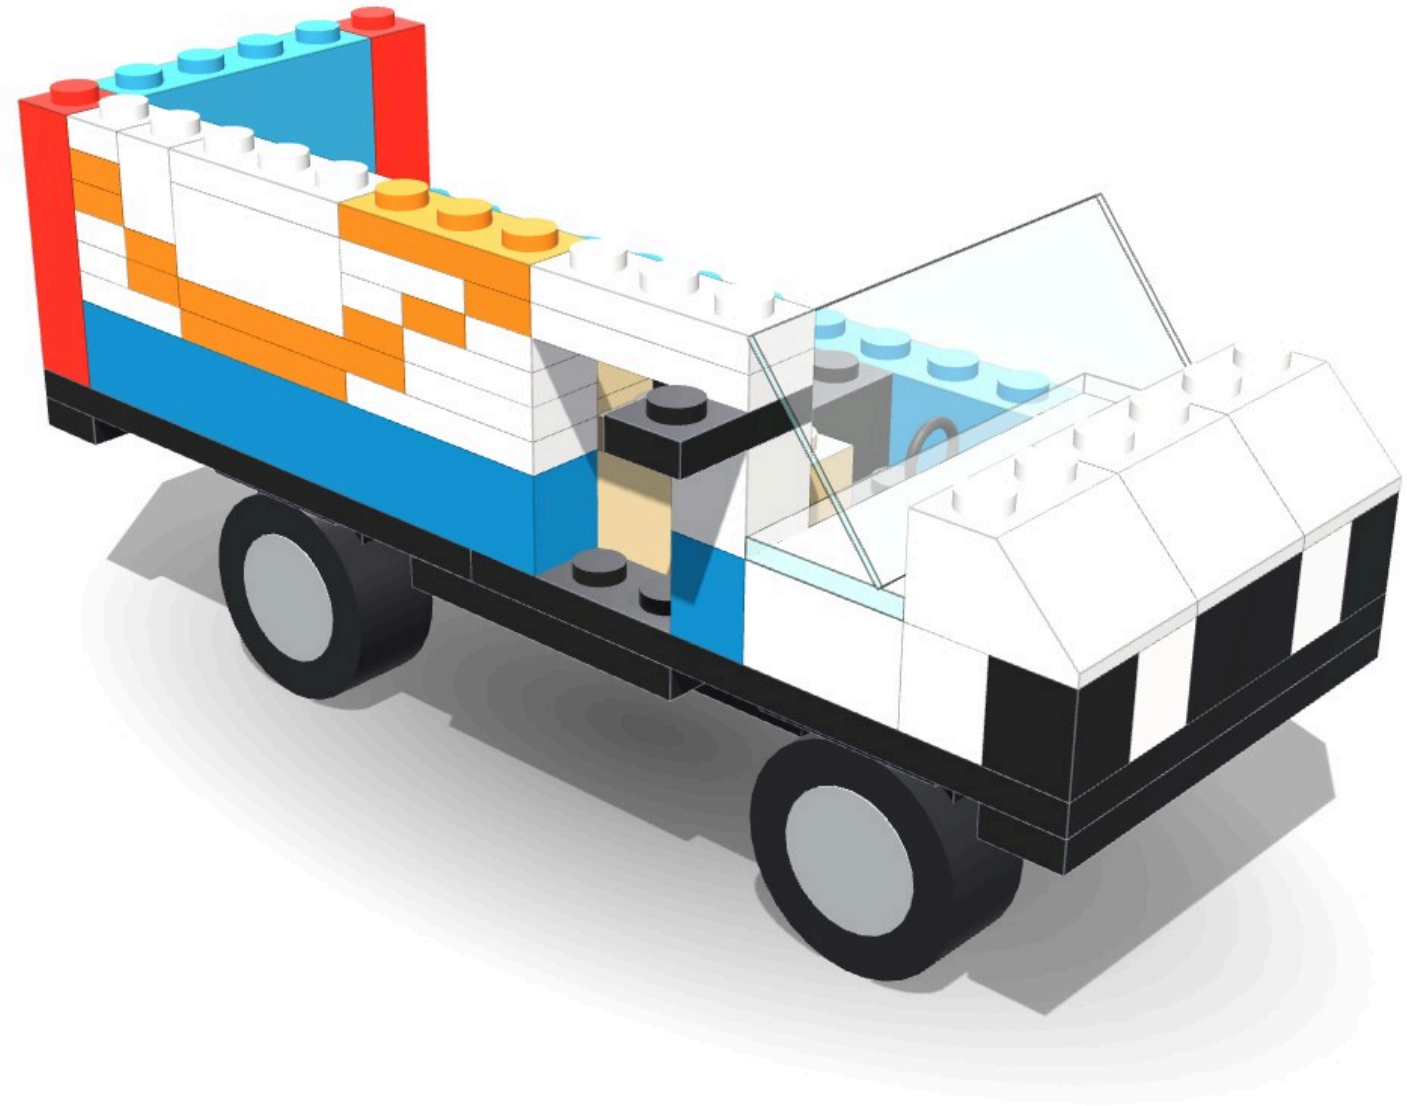

STEP

8

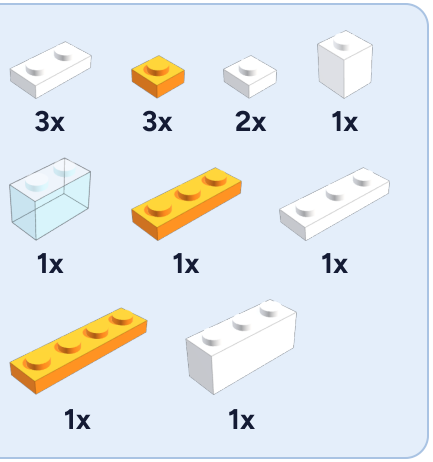

Curb side: arrowhead and mirror

Finish the curb side: the smile rises into its arrowhead, a mirror goes in at the front, and white plates bridge the top of the door.

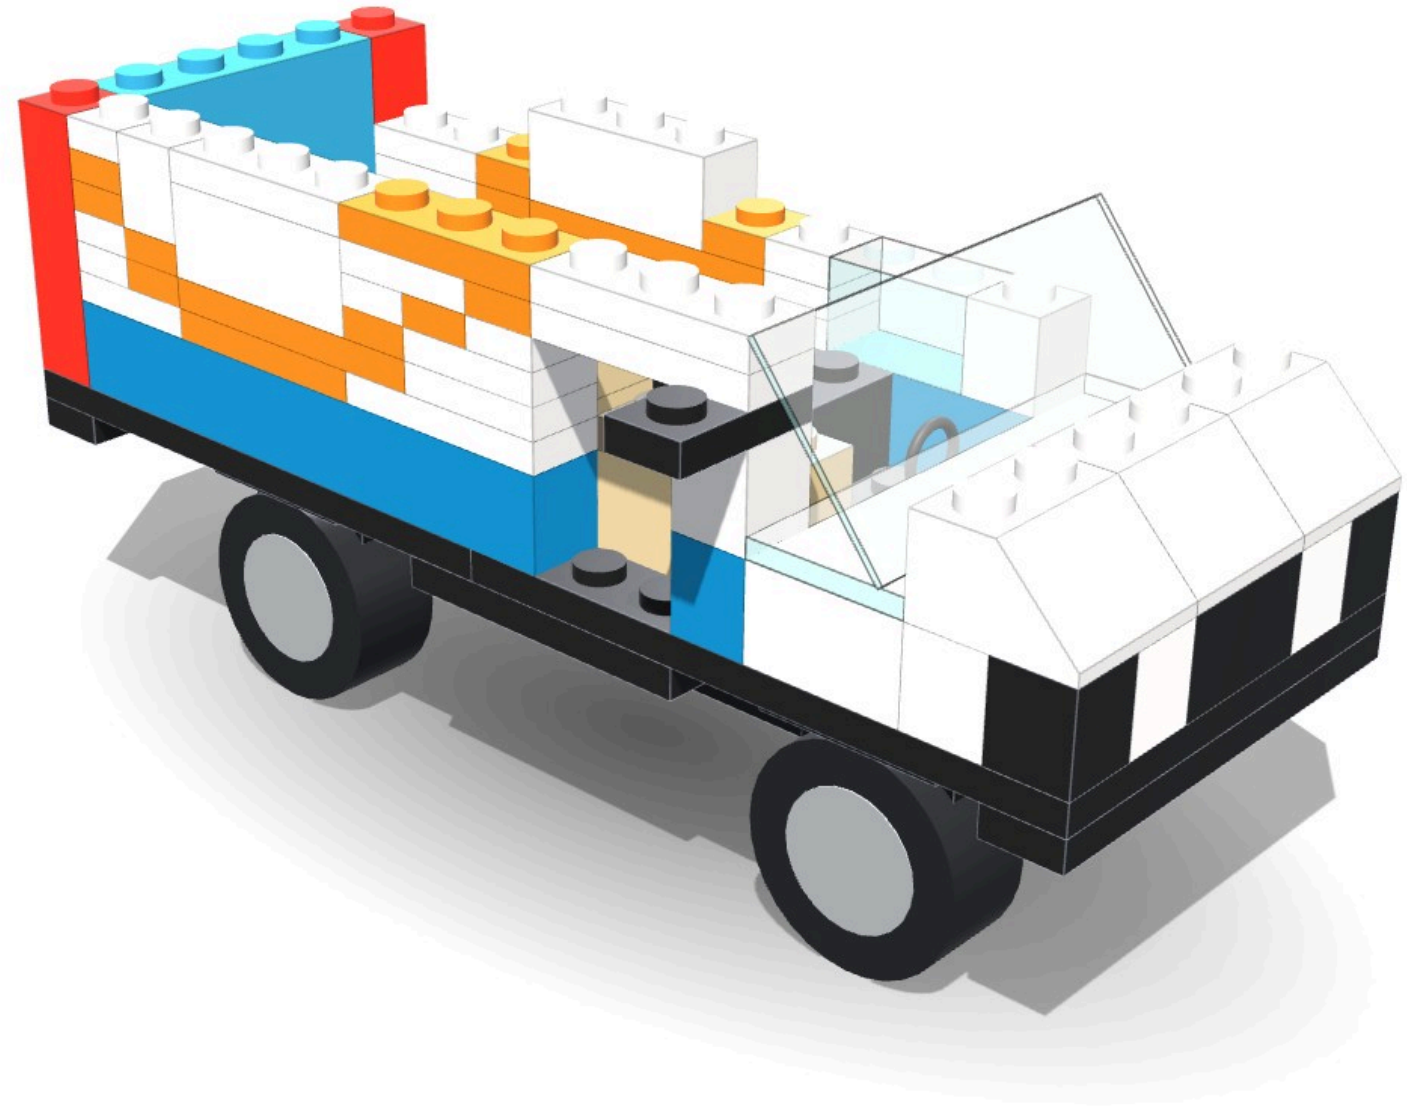

STEP

9

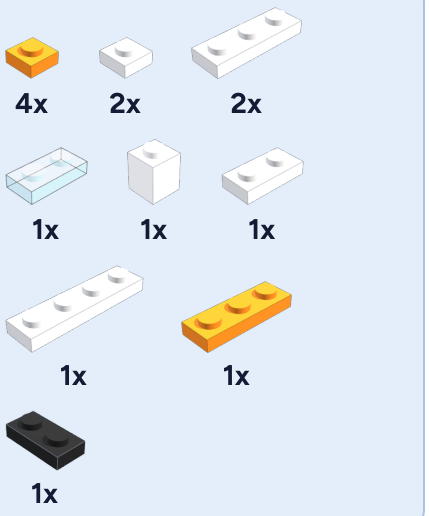

Driver's side: window and smile

The driver's side: the door window and the bottom of the orange smile.

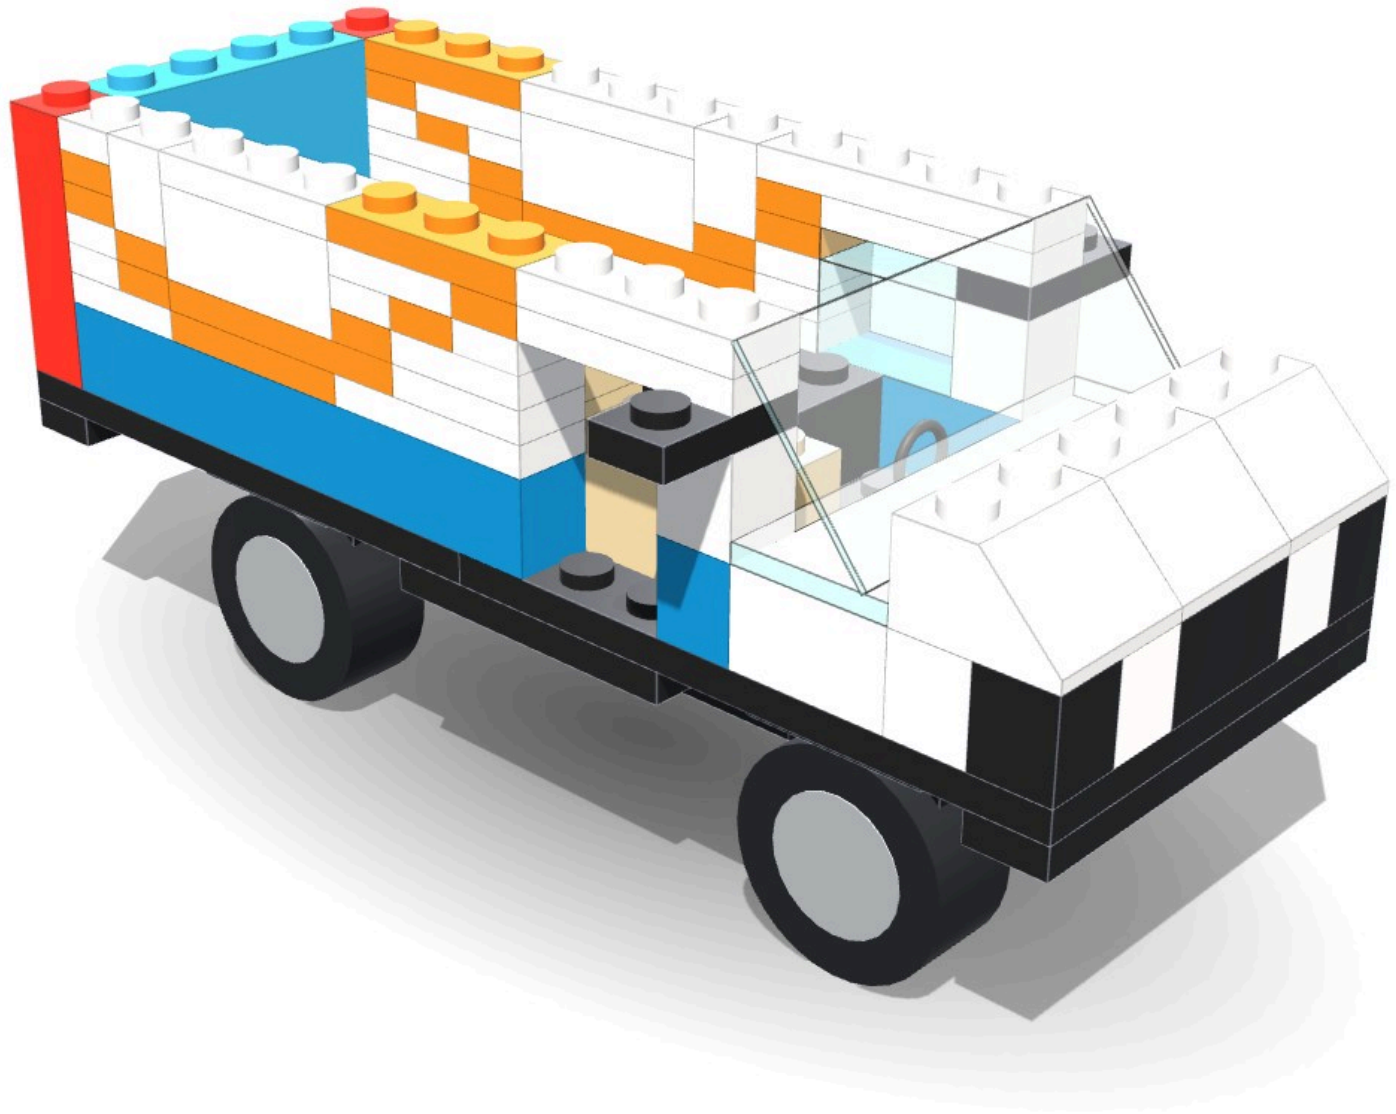

STEP

10

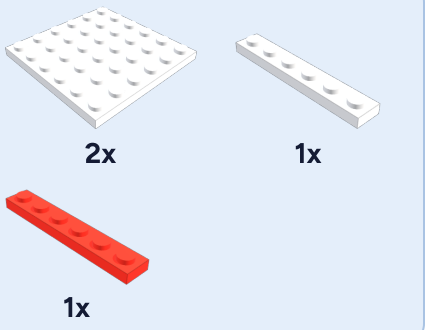

Driver's side: arrowhead and mirror

Finish the driver's side with the arrowhead of the smile and the other mirror.

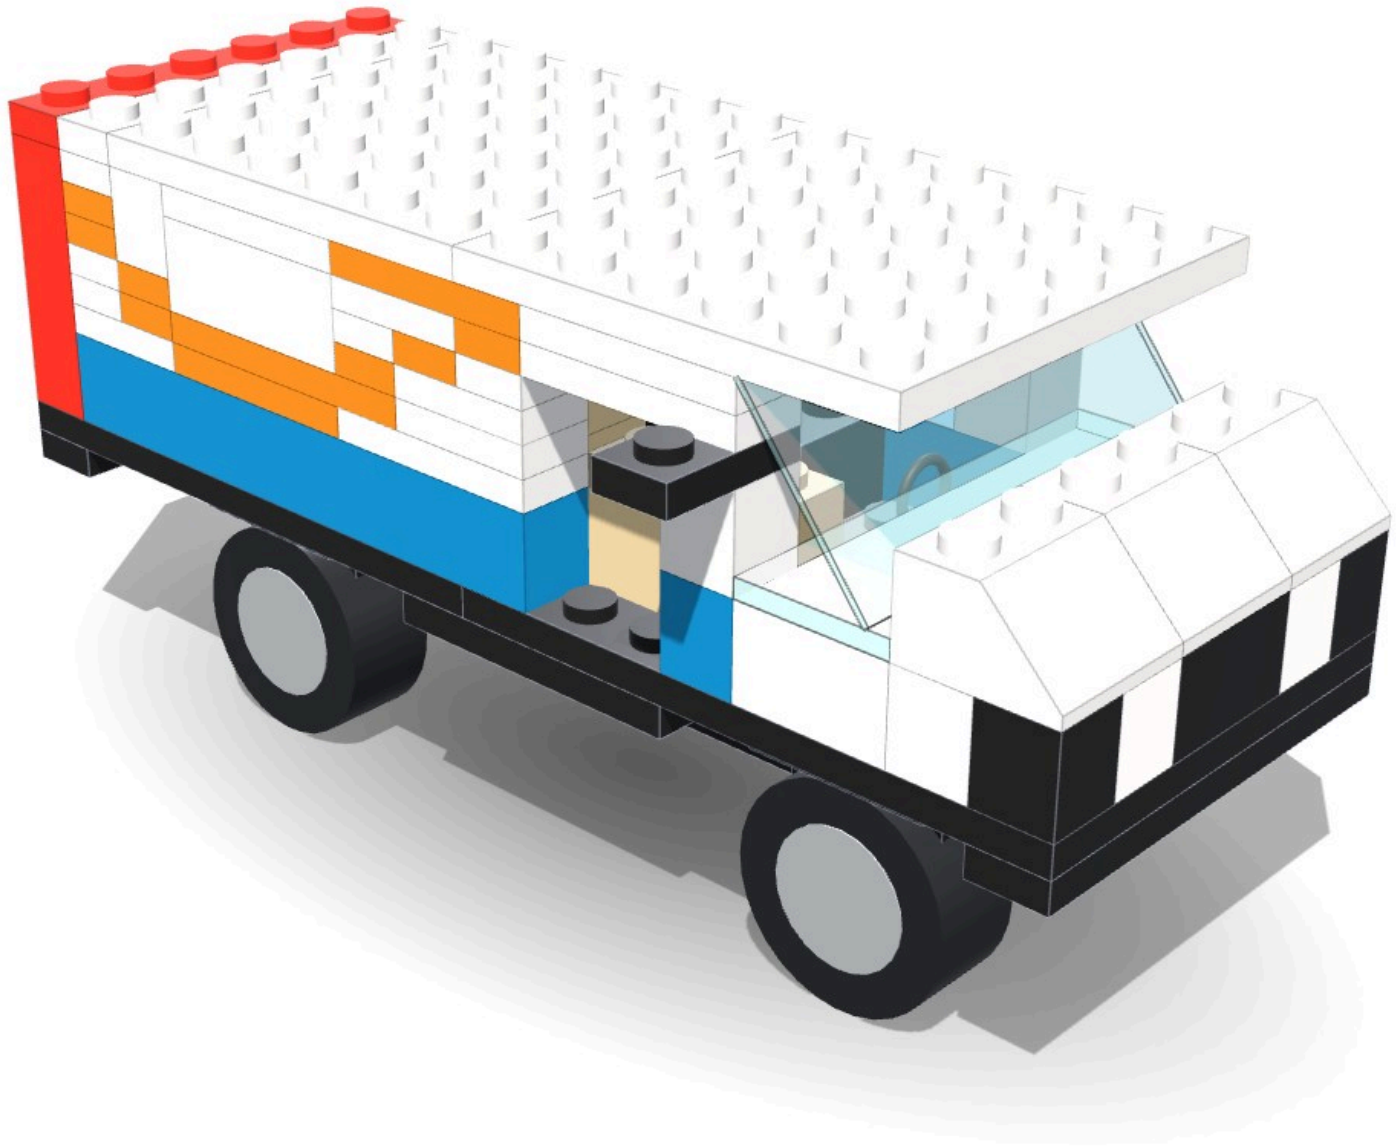

STEP

11

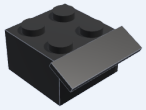

Roof

Two white 6×6 plates and a 1×6 for the roof, and a red light bar across the top of the back.
