Destroyed Crimean Bridge

The Kerch Strait crossing after the strike: the arch of the road bridge and its road down in the sea, the rail arch behind it black with smoke but standing, a fire engine and its crew at the edge of the gap, a fire boat below.

Free LEGO Destroyed Crimean Bridge instructions as a printable PDF: a fan-made LEGO MOC built from 1,452 standard LEGO pieces in 94 steps, with the pieces for every step and a full parts list.

Build it in 3D, step by step:

An unofficial fan build. All standard pieces; any similar colour works. Every stud is checked. LEGO is a trademark of the LEGO Group, which does not sponsor this site.

STEP

1

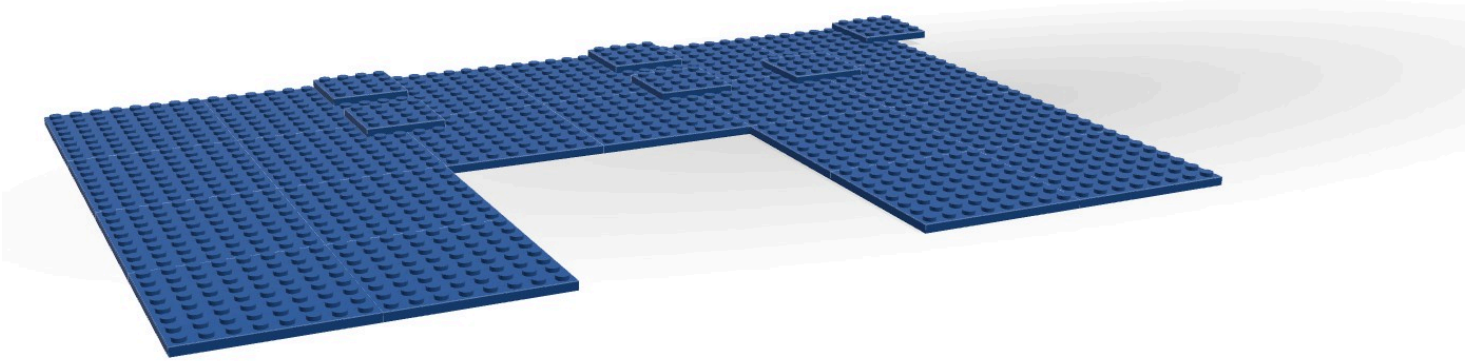

20x
8×8

6x
4×4

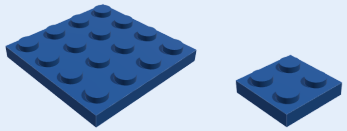

The strait (1 of 5) (1/2)

The dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

STEP

2

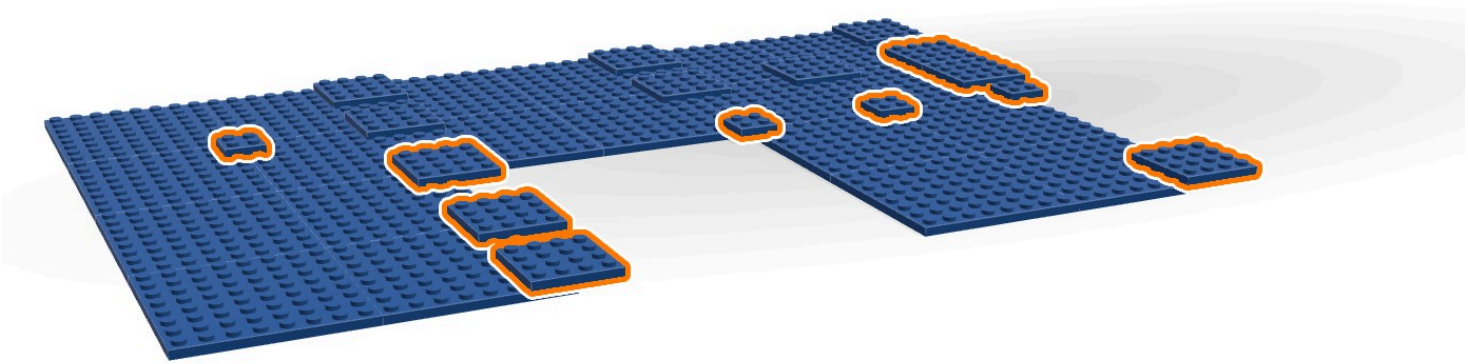

6x
4×4

4x
2×2

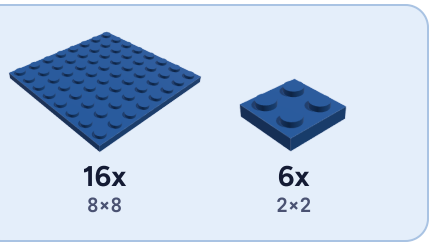

The strait (1 of 5) (2/2)

More of the same: the dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

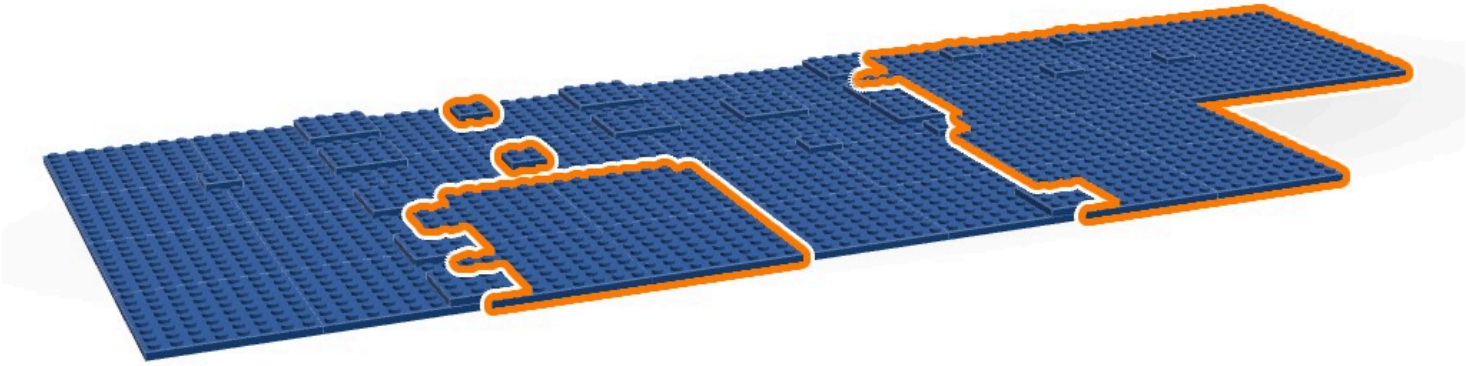

STEP

3

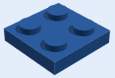

The strait (2 of 5) (1/2)

Keep going: the dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

STEP

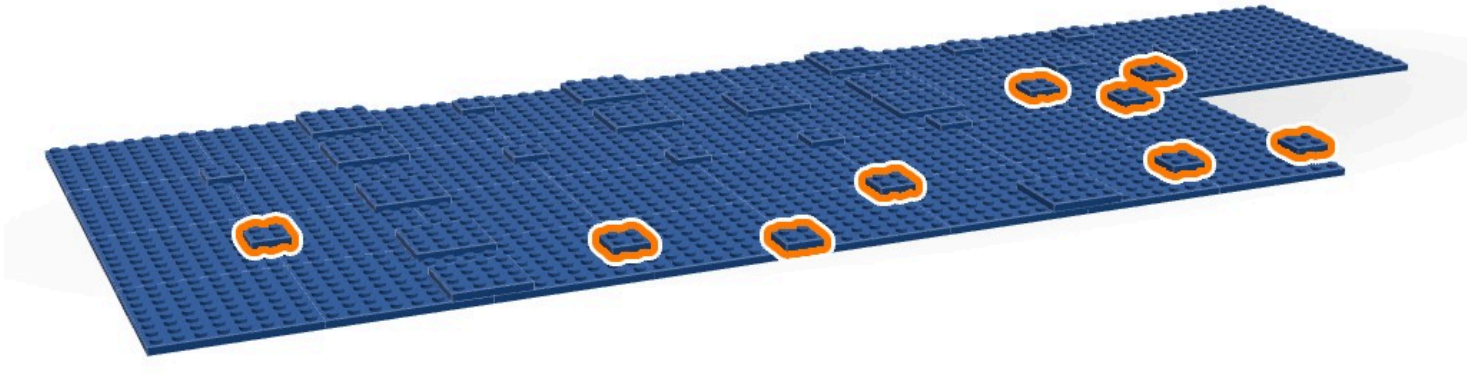

4

9x
2×2

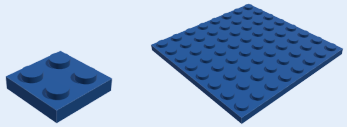

The strait (2 of 5) (2/2)

More of the same: keep going: the dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

STEP

5

5x
2×2

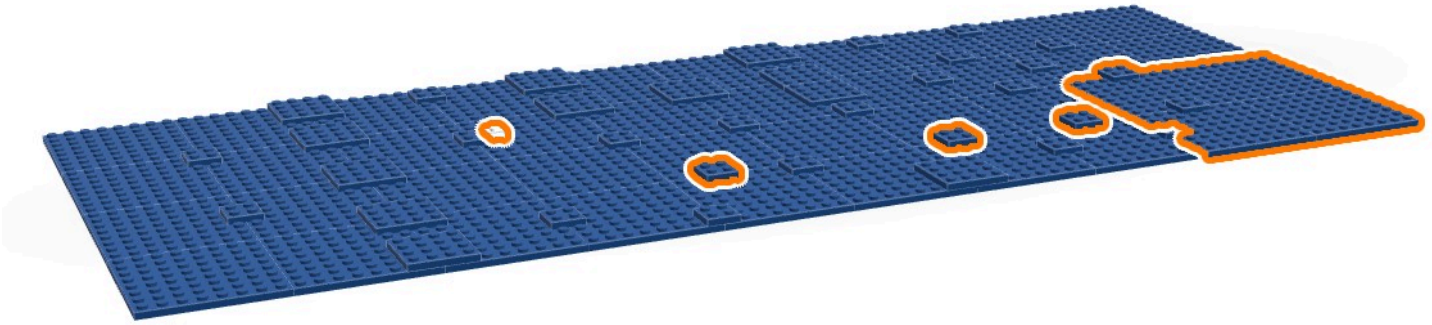

4x
8×8

1x
1×1

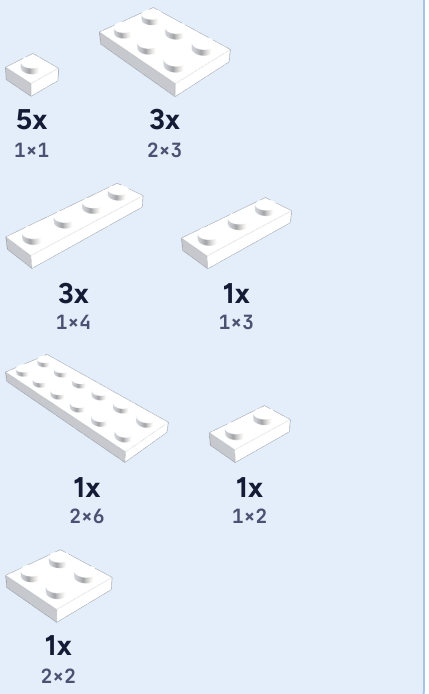

The strait (3 of 5)

Keep going: the dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

STEP

6

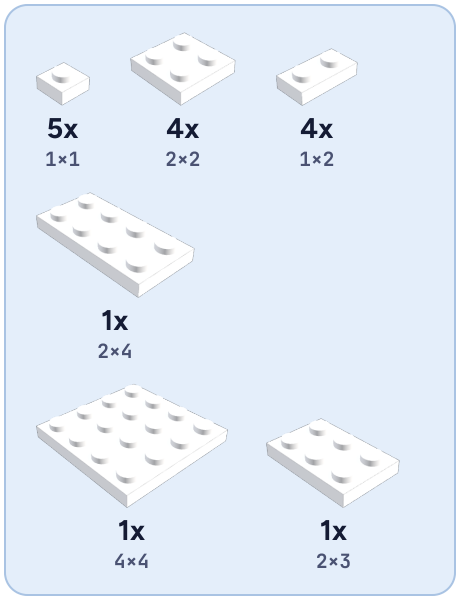

The strait (4 of 5)

Keep going: the dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

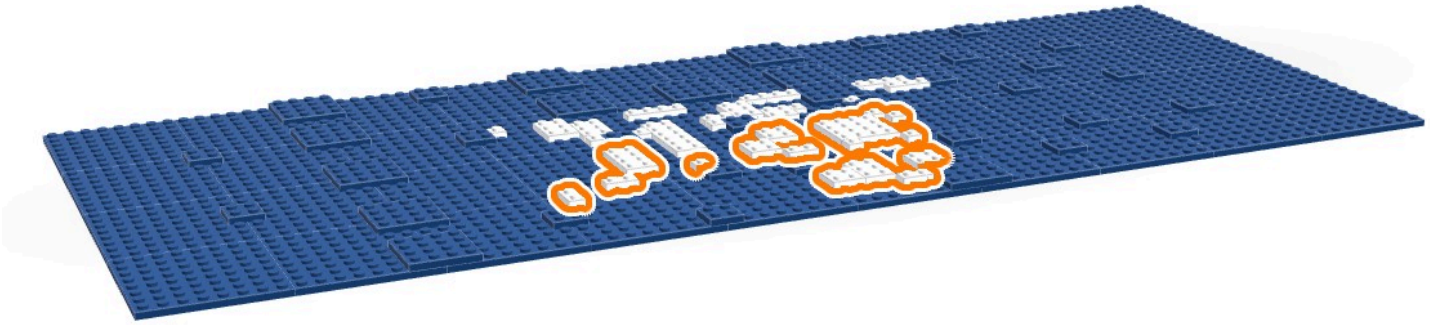

STEP

7

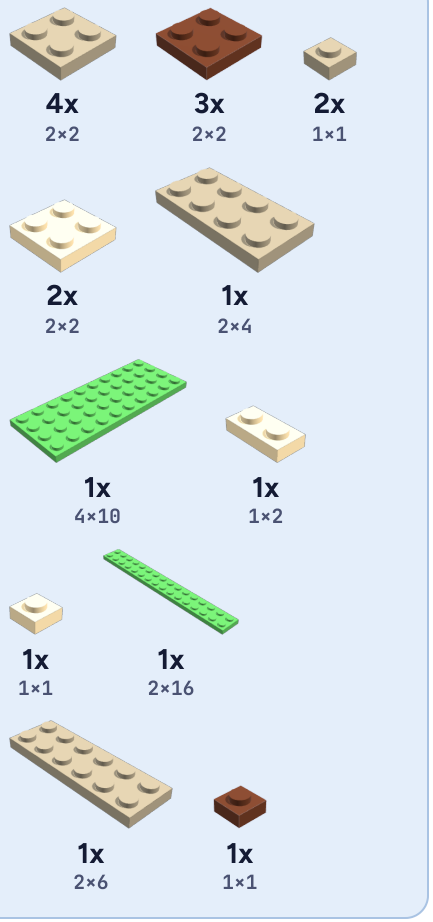

The strait (5 of 5)

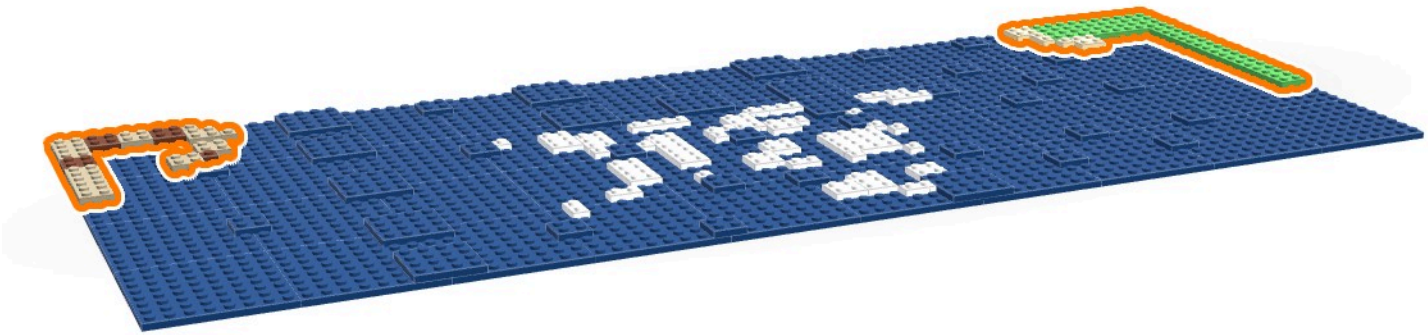

Keep going: the dark blue base and the plates that tie it together, then white foam where the broken span lies and the wake of the fire boat.

STEP

8

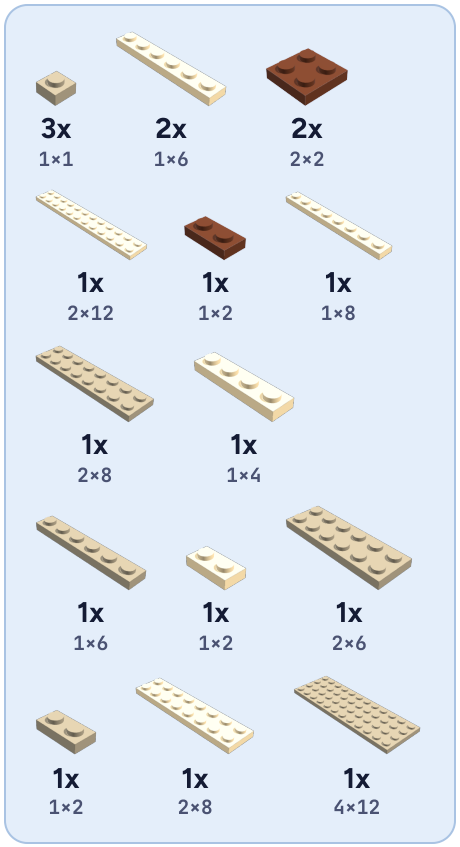

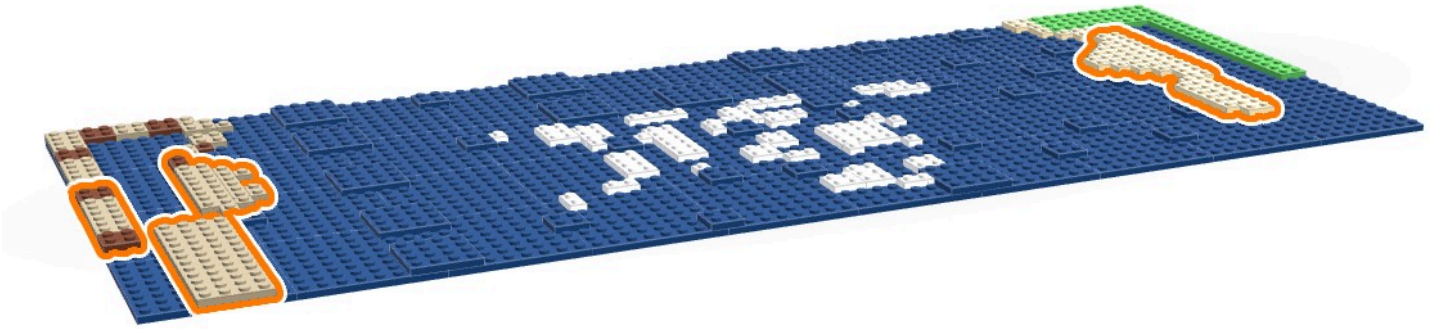

The two coasts (1 of 11)

A coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

9

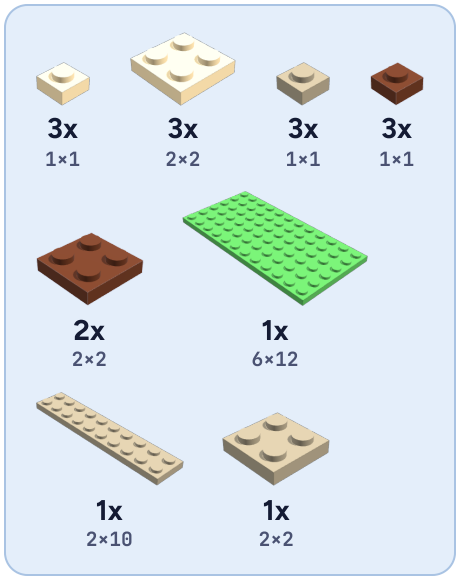

The two coasts (2 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

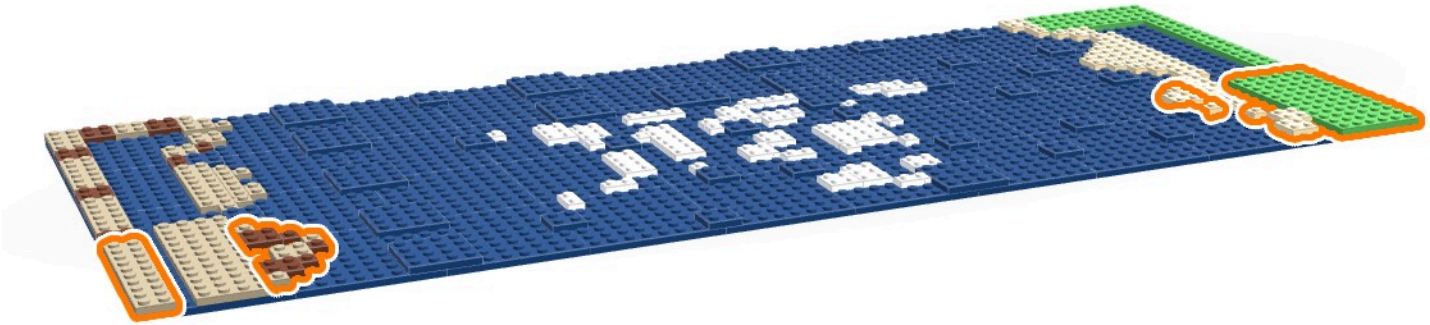

STEP

10

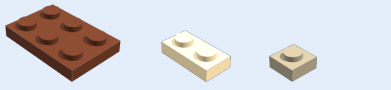

The two coasts (3 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

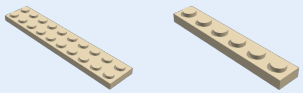

STEP

11

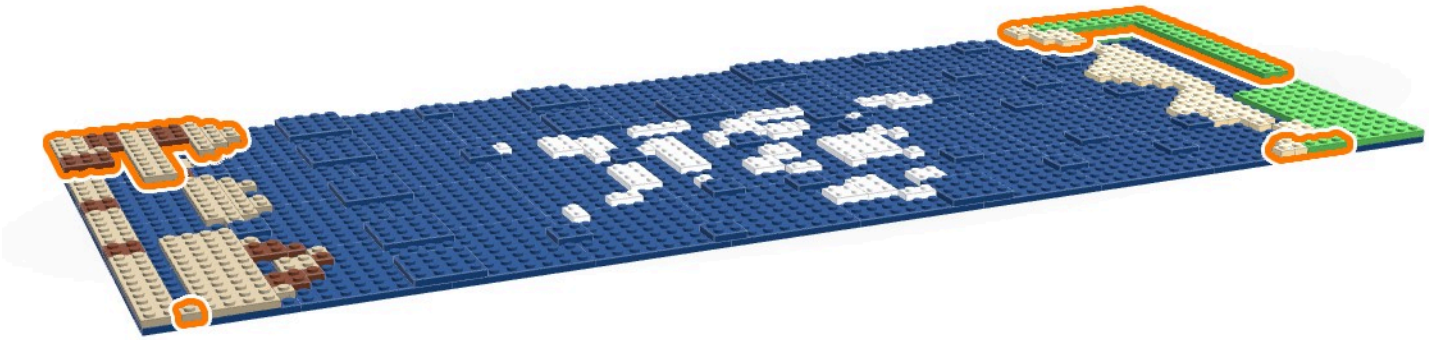

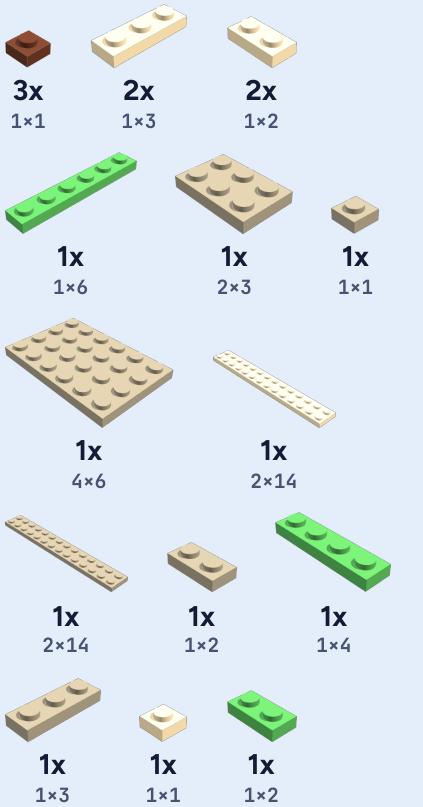

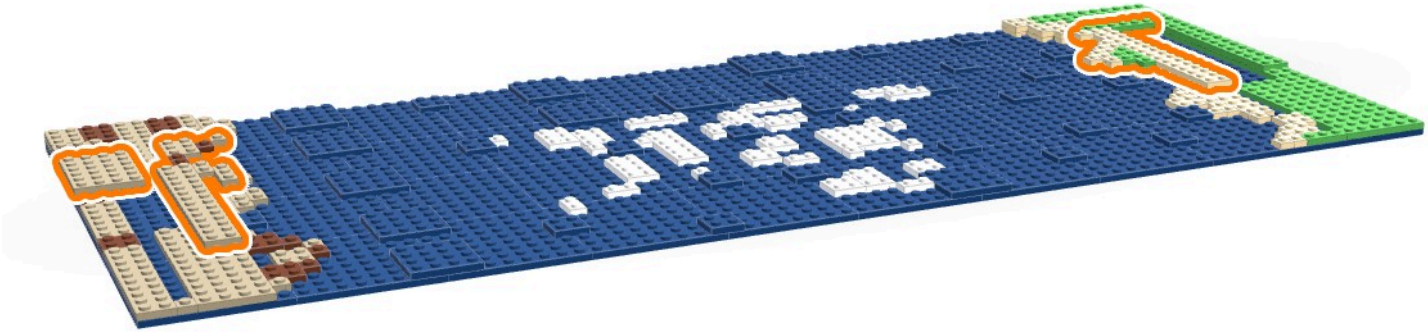

The two coasts (4 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

12

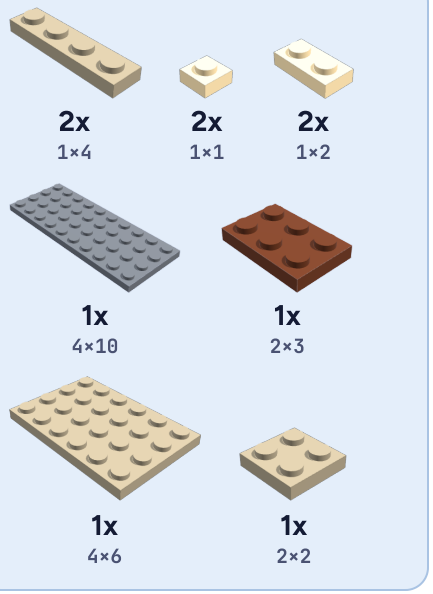

The two coasts (5 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

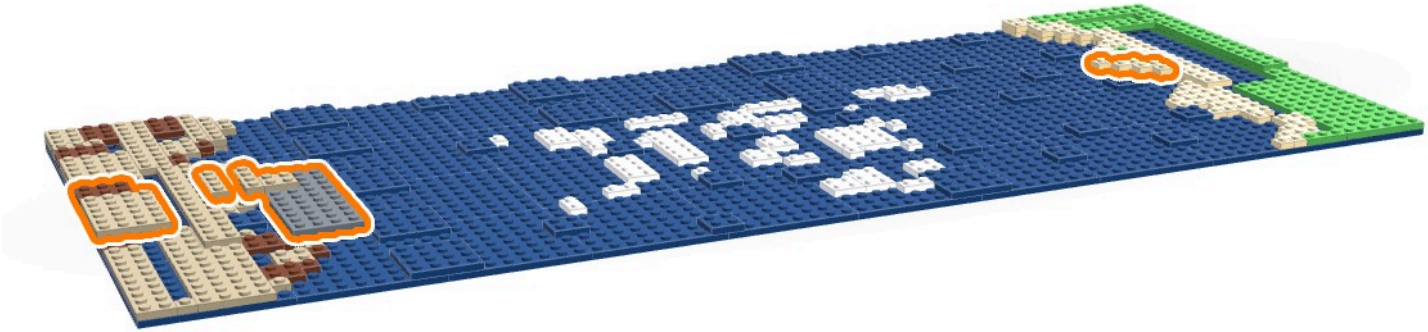

STEP

13

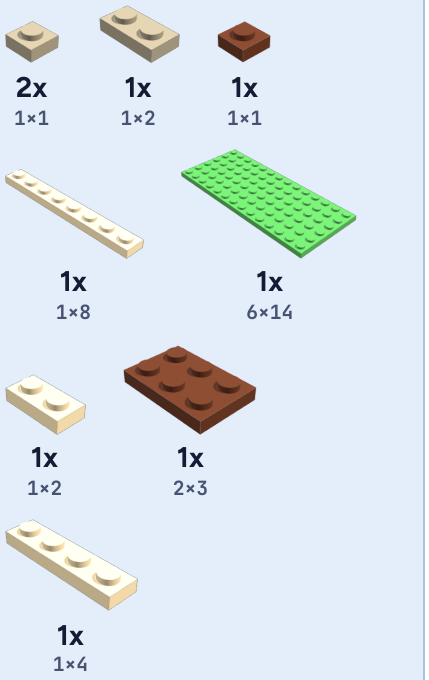

The two coasts (6 of 11) (1/2)

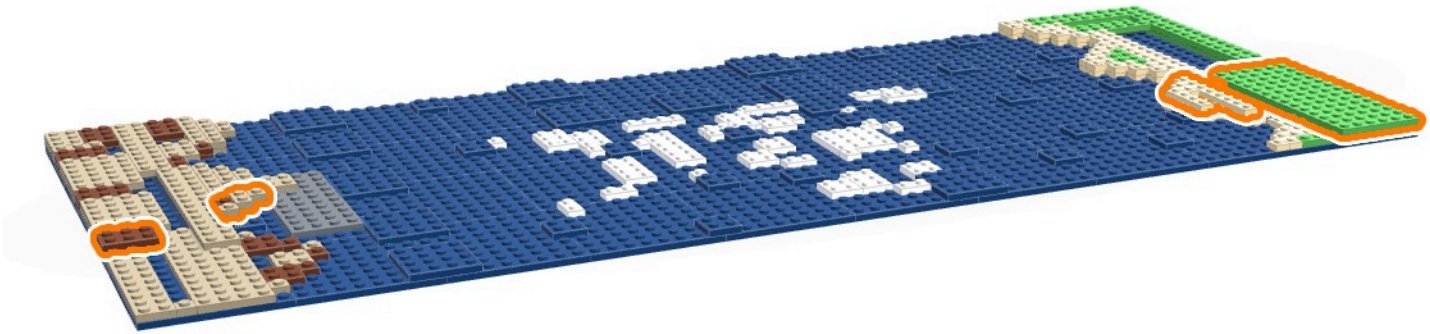

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

14

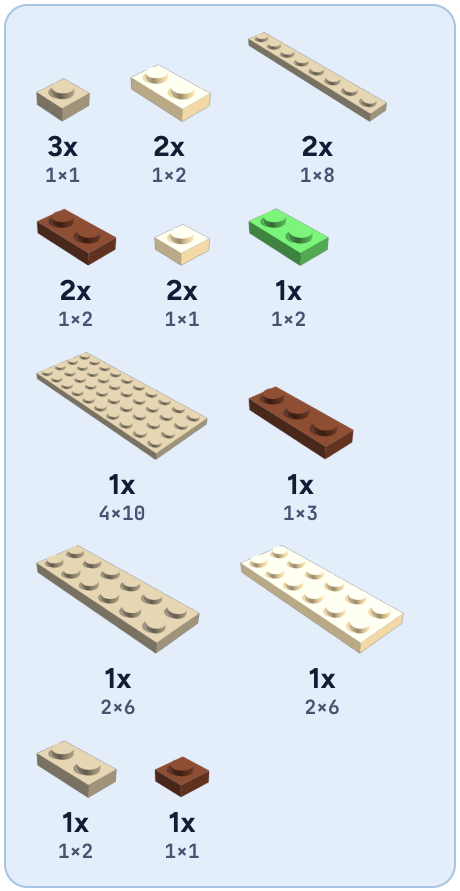

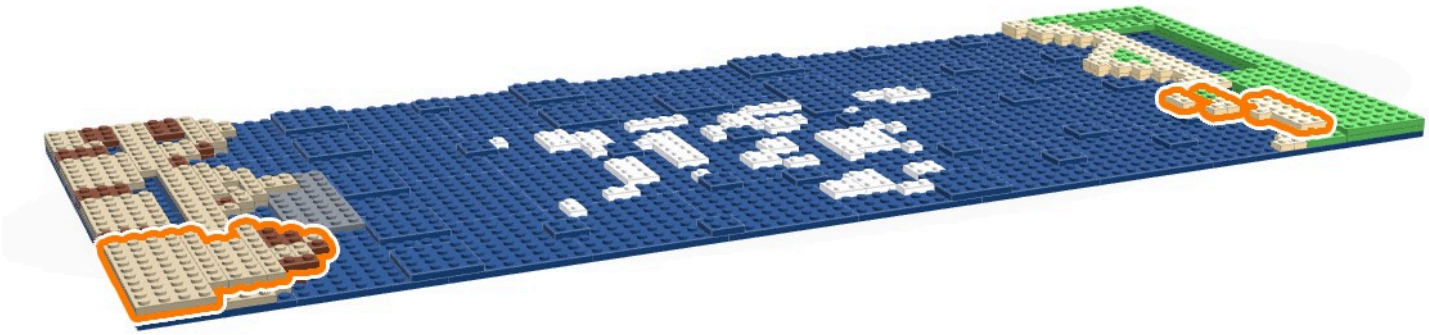

The two coasts (6 of 11) (2/2)

More of the same: keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

15

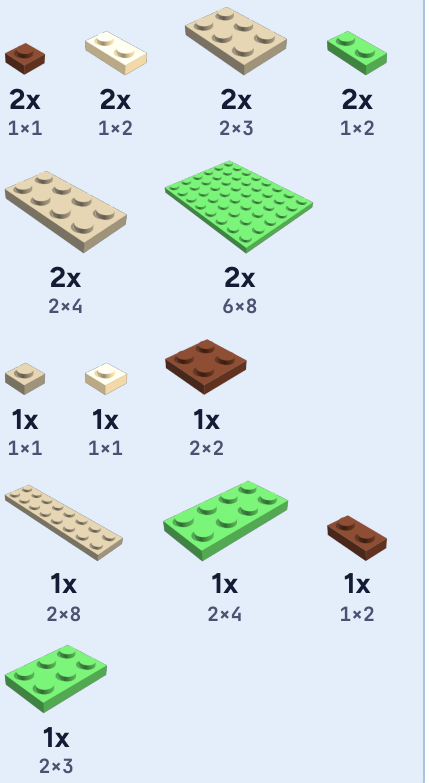

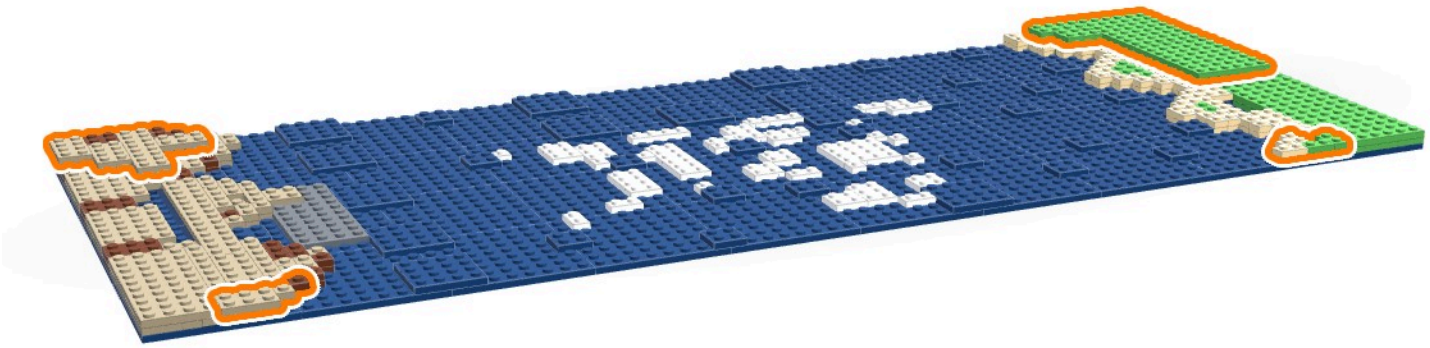

The two coasts (7 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

16

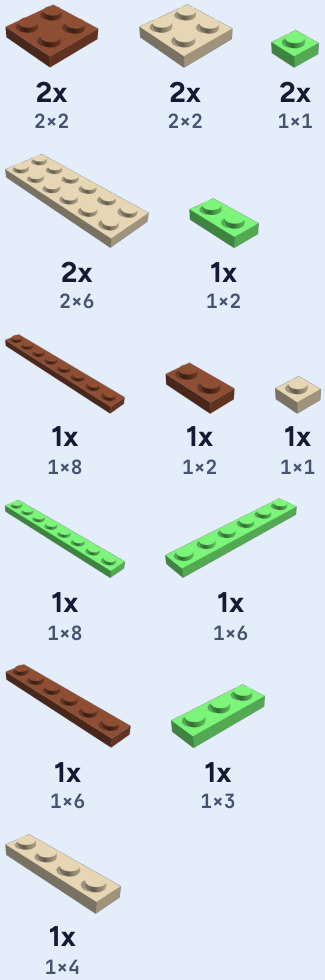

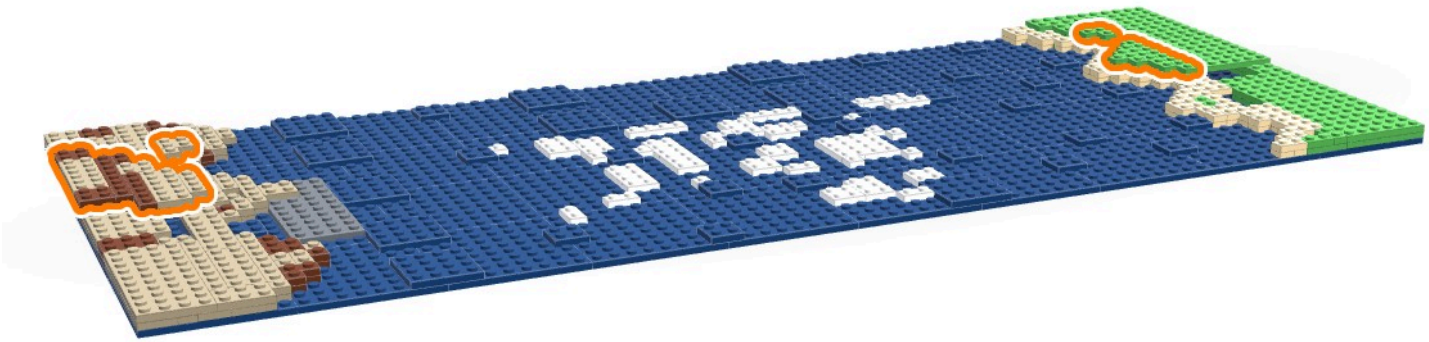

The two coasts (8 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

17

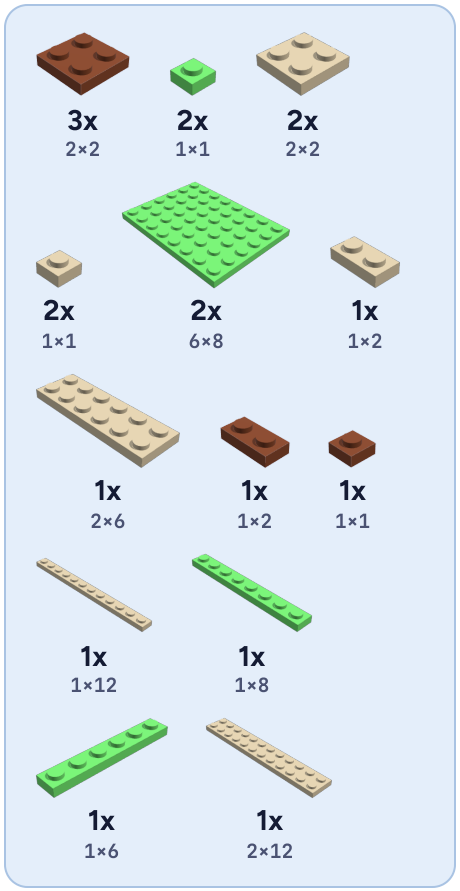

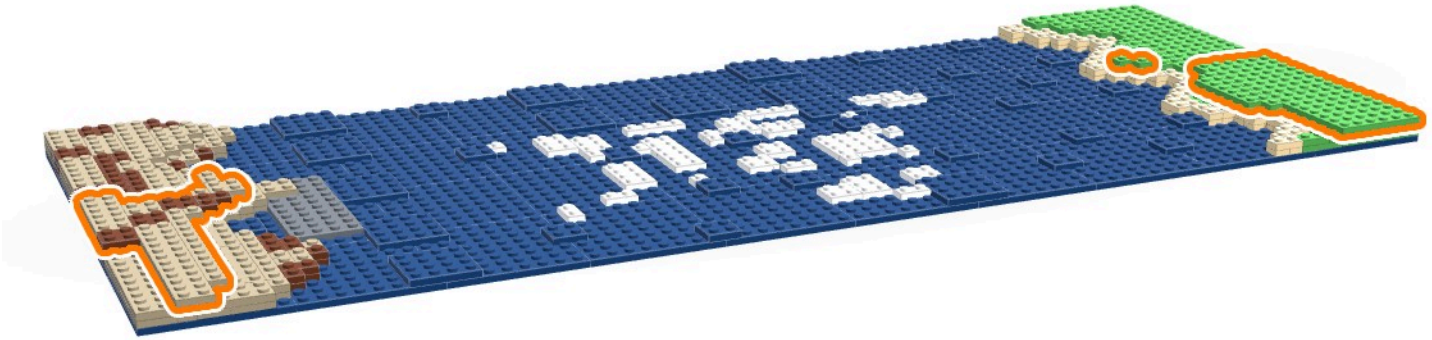

The two coasts (9 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

18

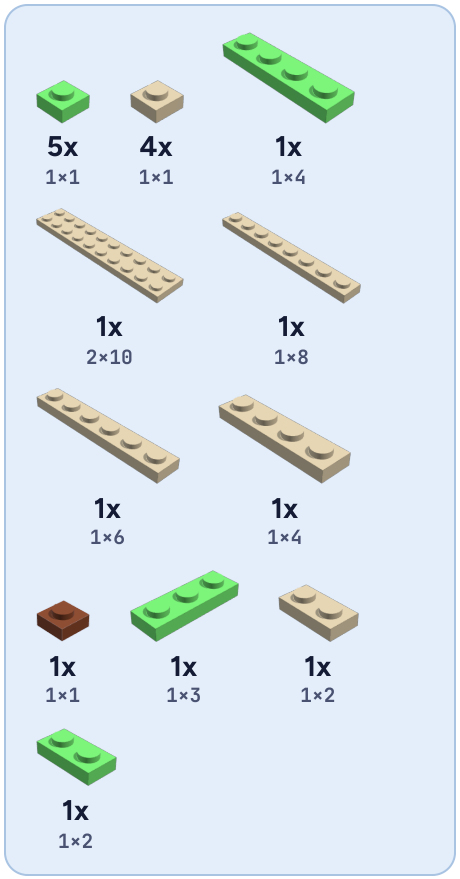

The two coasts (10 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

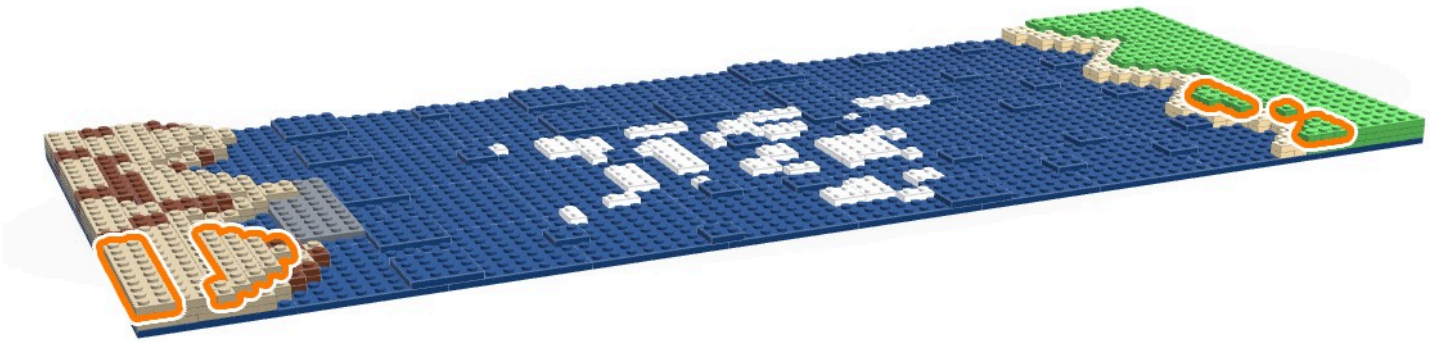

STEP

19

The two coasts (11 of 11)

Keep going: a coast at each end of the crossing. On the left, bare mud. On the right, green ground behind a tan beach.

STEP

20

9x 1×1 · 2x 2×2 · 2x 2×2

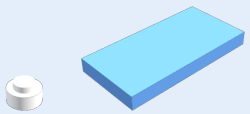

Ripples and foam (1 of 2)

Smooth medium-blue tiles for the ripples, white round plates for the foam at the feet of the piers, and two mooring dolphins by the channel: a round brick with a round plate on top.

STEP

21

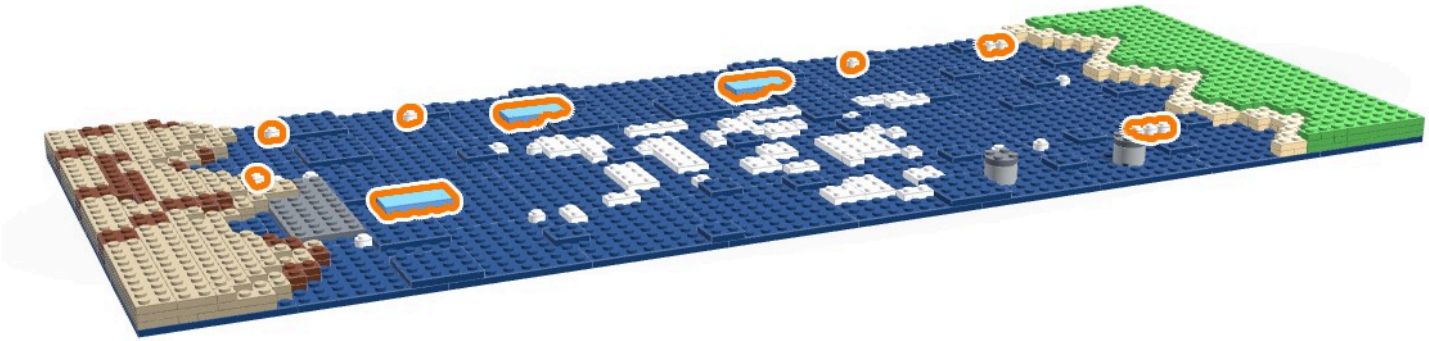

9x
1×1

3x
2×4

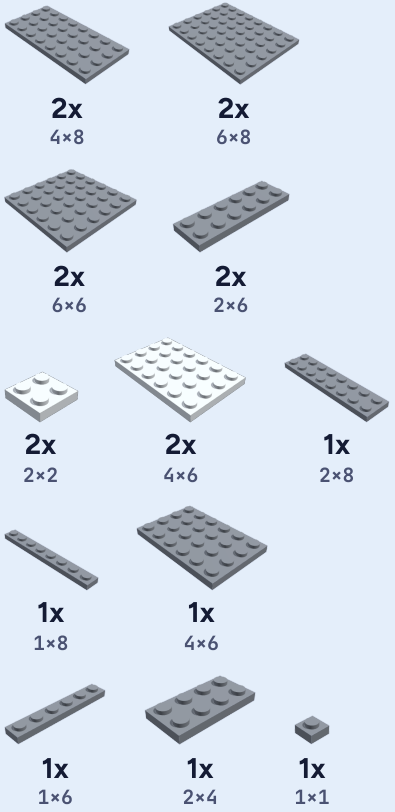

Ripples and foam (2 of 2)

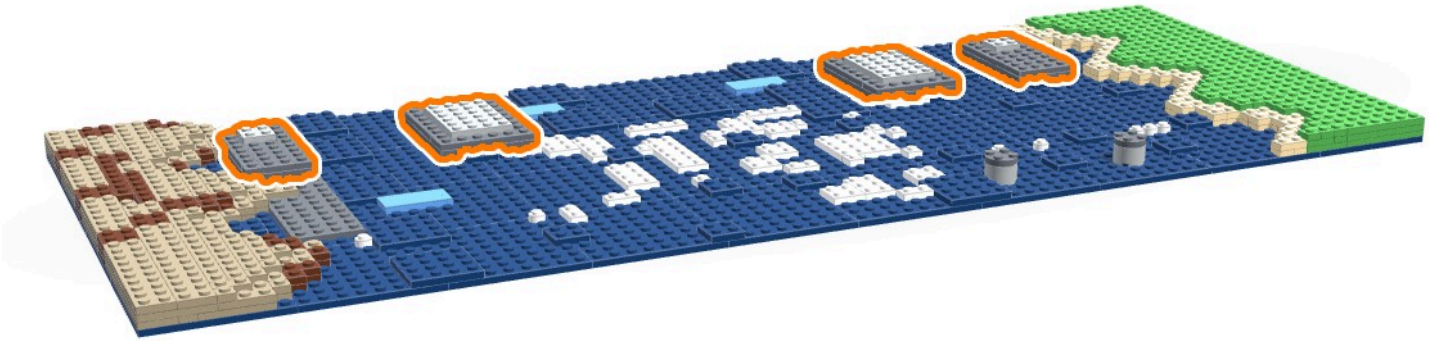

Keep going: smooth medium-blue tiles for the ripples, white round plates for the foam at the feet of the piers, and two mooring dolphins by the channel: a round brick with a round plate on top.

STEP

22

Rail bridge piers (1 of 5)

The piers of the rail bridge at the back, each on a dark footing: twin columns, and two big piers either side of the shipping channel.

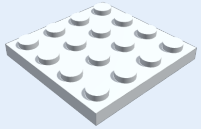

STEP

2x
2×6

2x
4×6

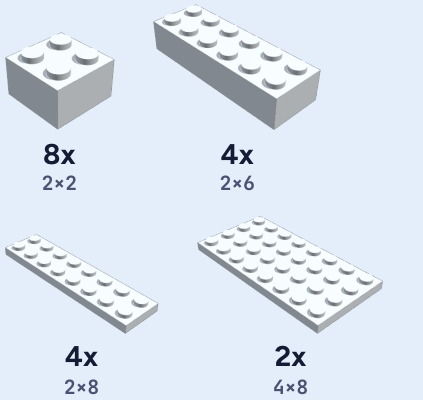

Rail bridge piers (4 of 5)

Keep going: the piers of the rail bridge at the back, each on a dark footing: twin columns, and two big piers either side of the shipping channel.

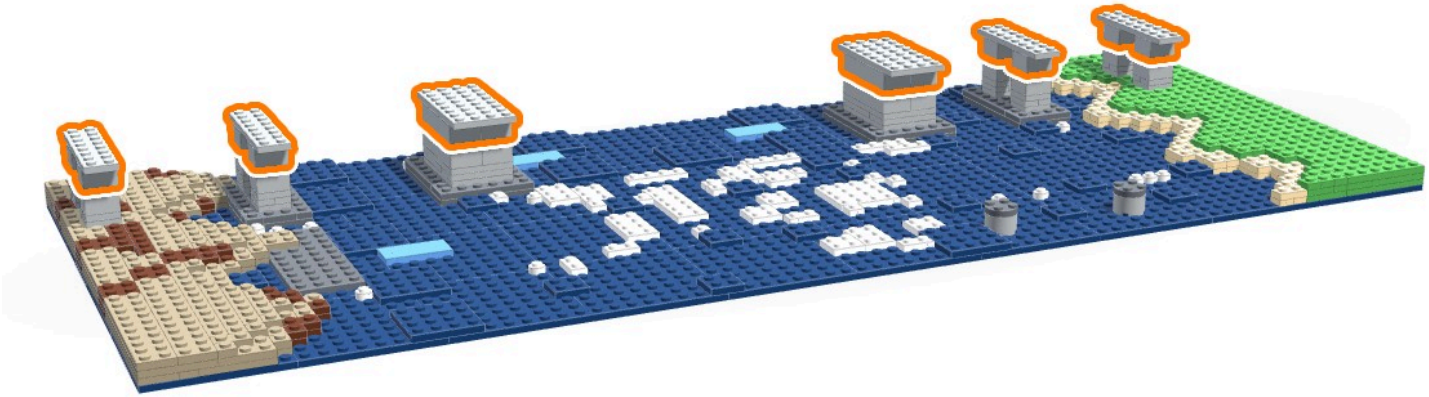

STEP

26

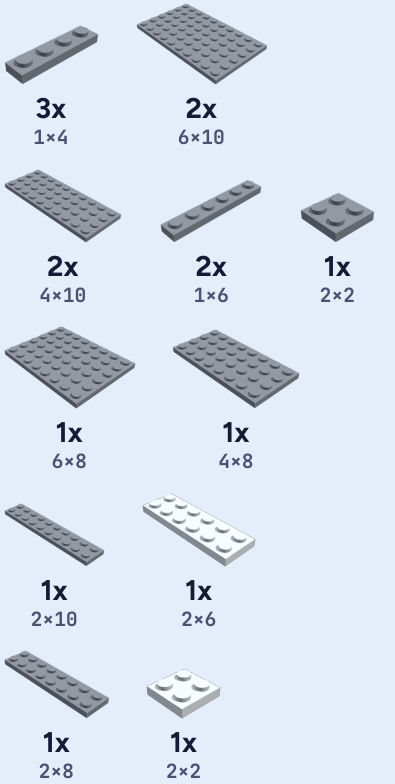

Rail bridge piers (5 of 5)

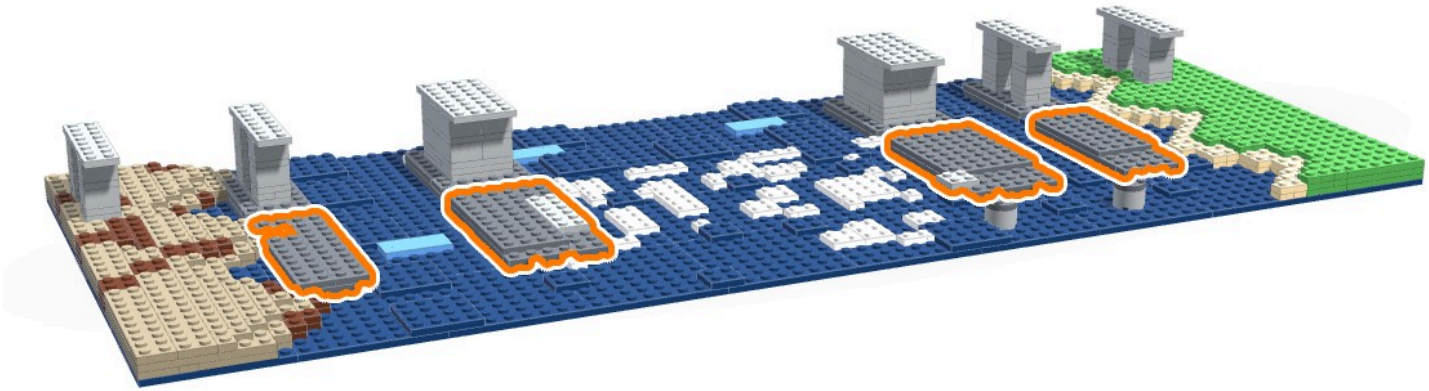

Keep going: the piers of the rail bridge at the back, each on a dark footing: twin columns, and two big piers either side of the shipping channel.

STEP

27

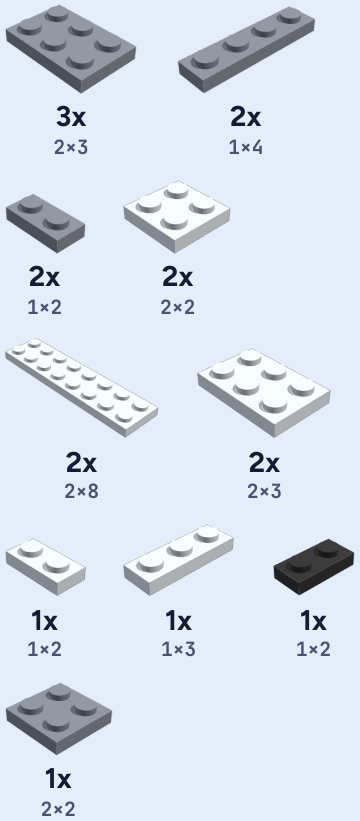

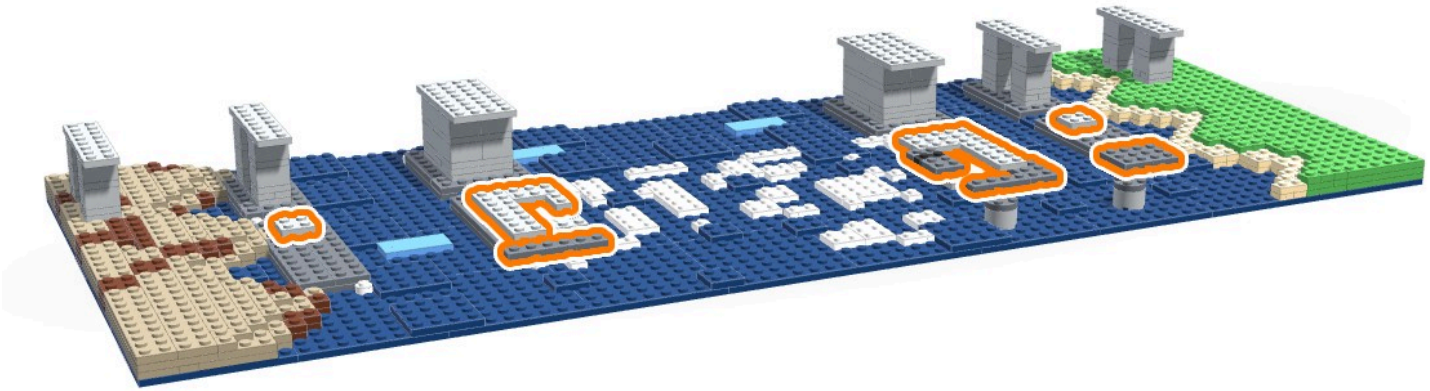

Road bridge piers (1 of 9)

The piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

STEP

28

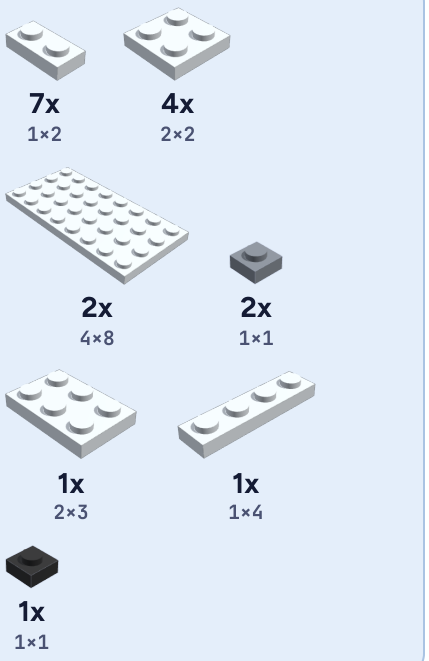

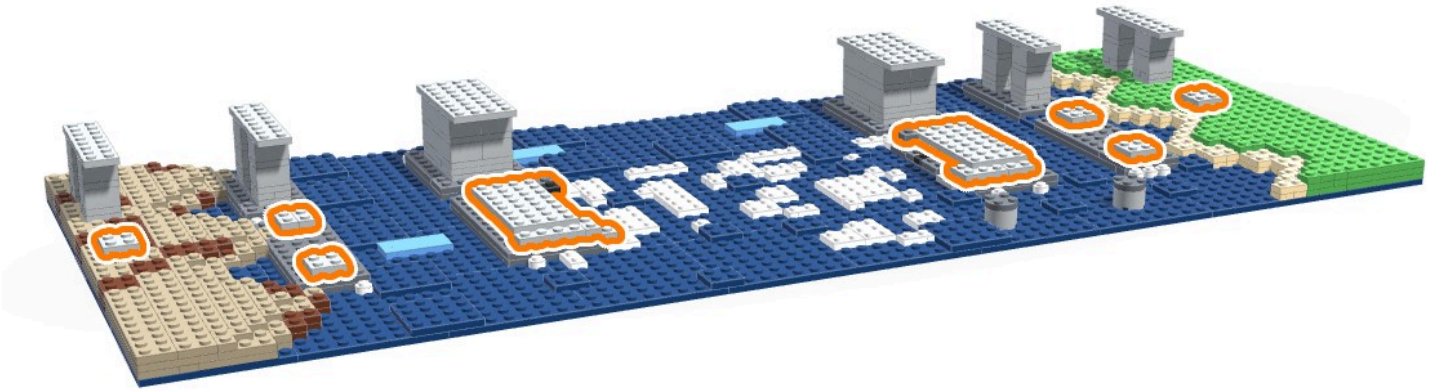

Road bridge piers (2 of 9)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

STEP

29

Road bridge piers (3 of 9)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

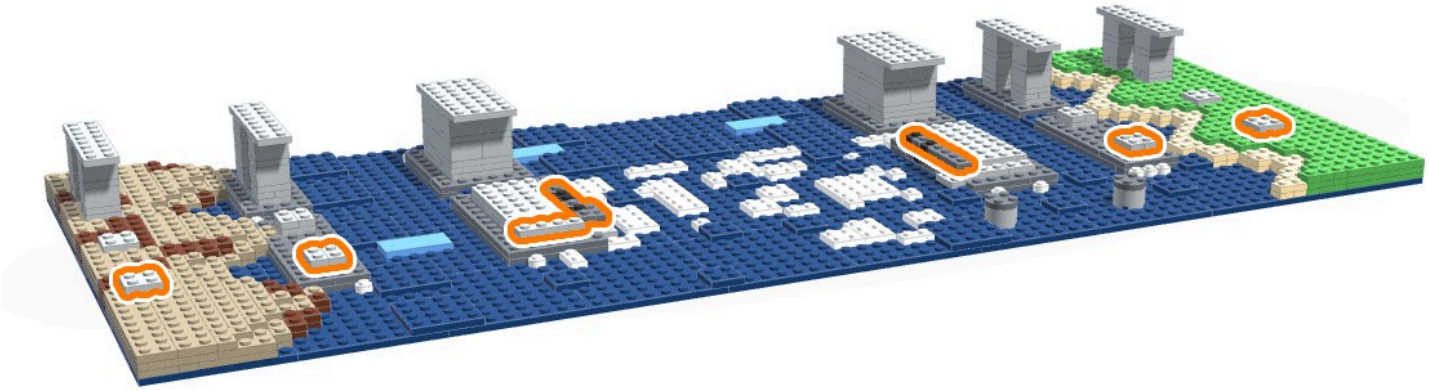

STEP

30

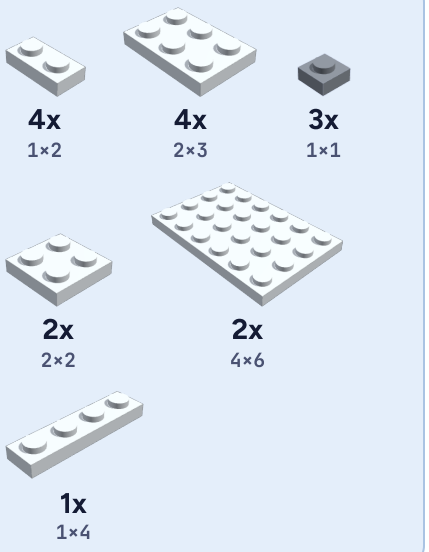

Road bridge piers (4 of 9)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

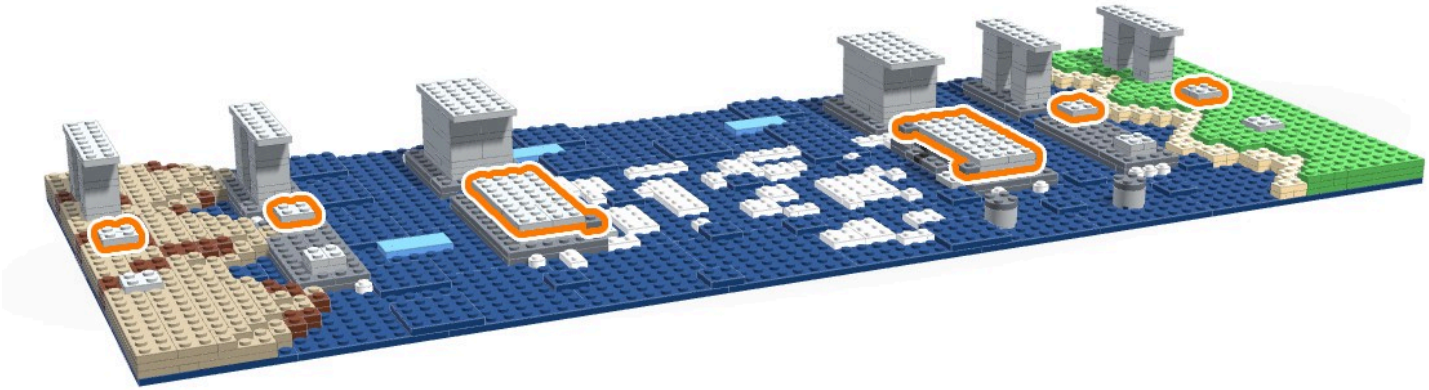

STEP

31

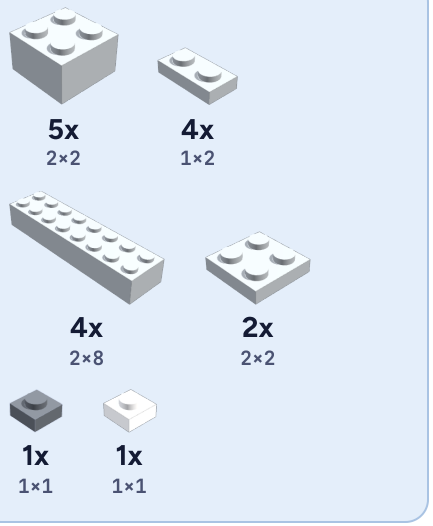

Road bridge piers (5 of 9)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

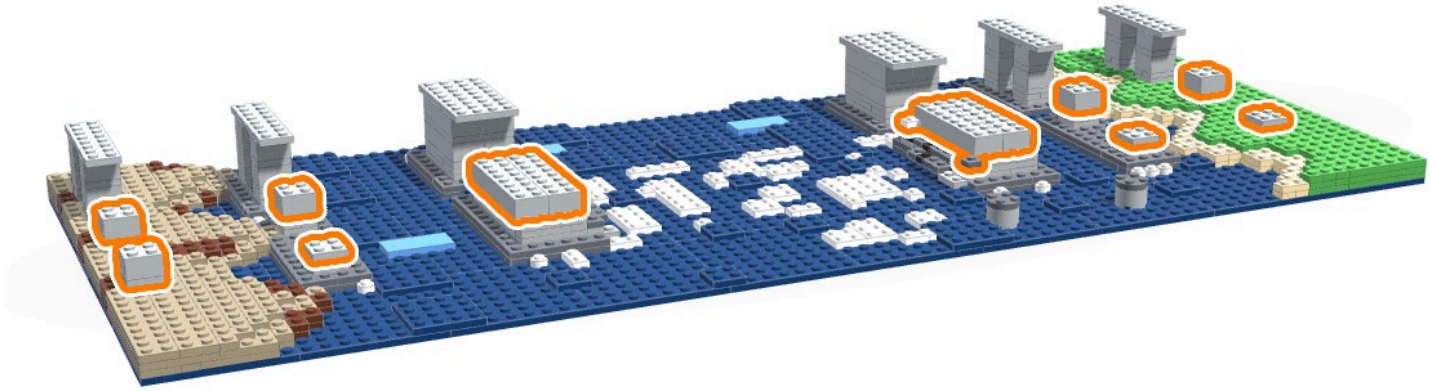

STEP

32

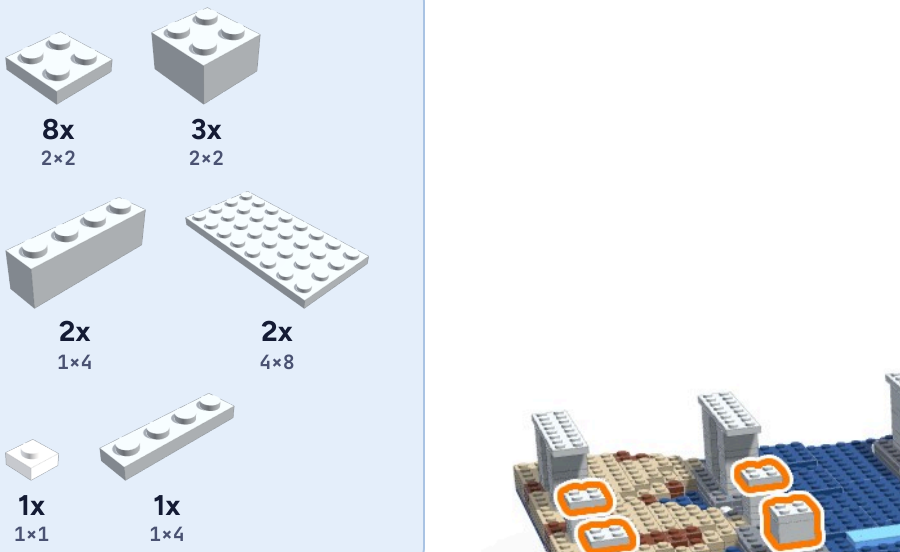

Road bridge piers (6 of 9)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

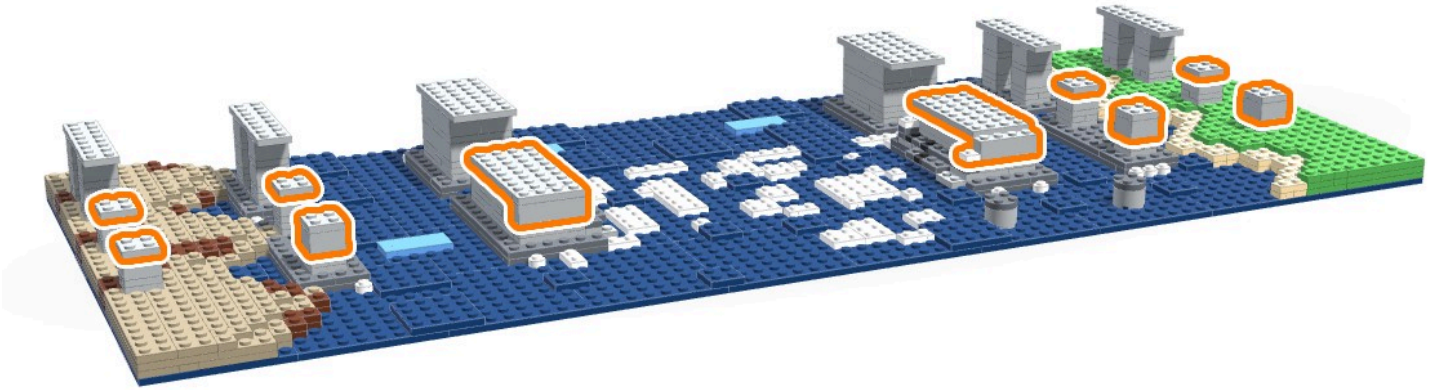

STEP

33

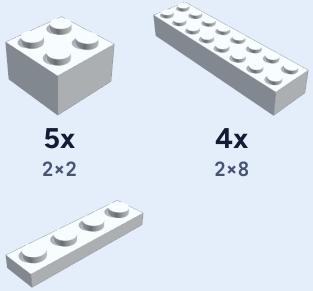

Road bridge piers (7 of 9)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

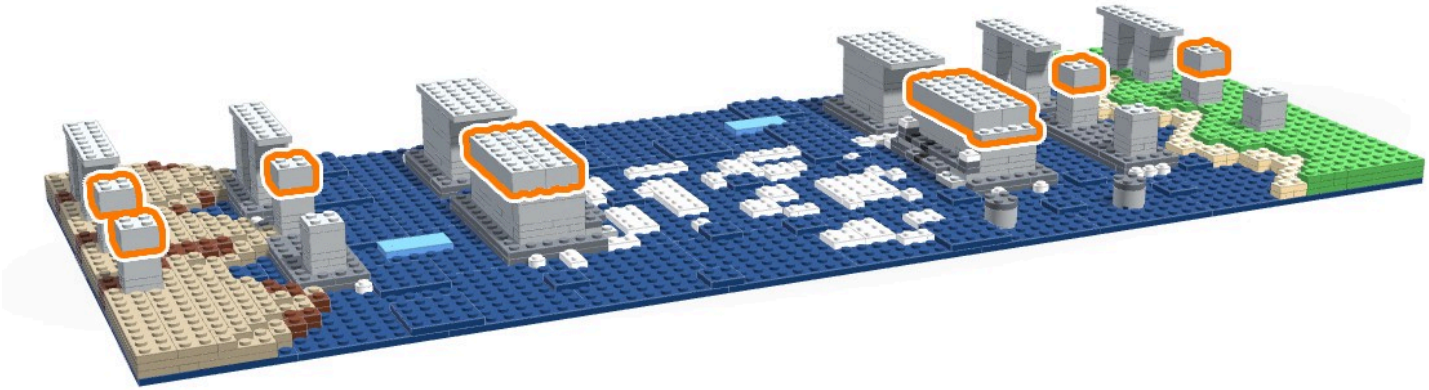

STEP

34

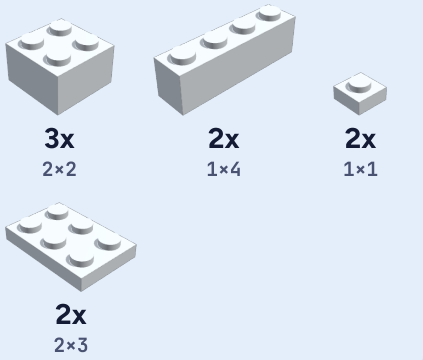

Road bridge piers (8 of 9) (1/2)

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

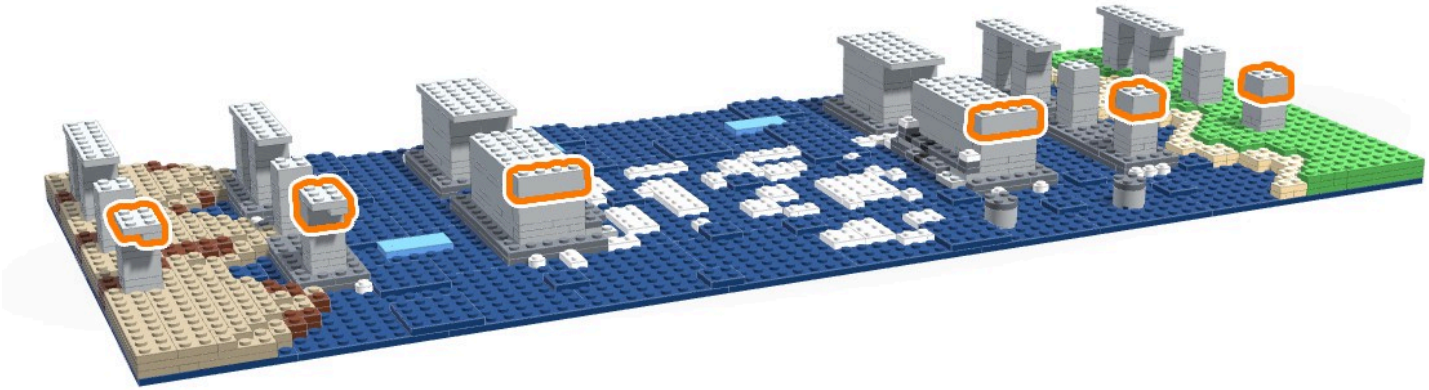

STEP

35

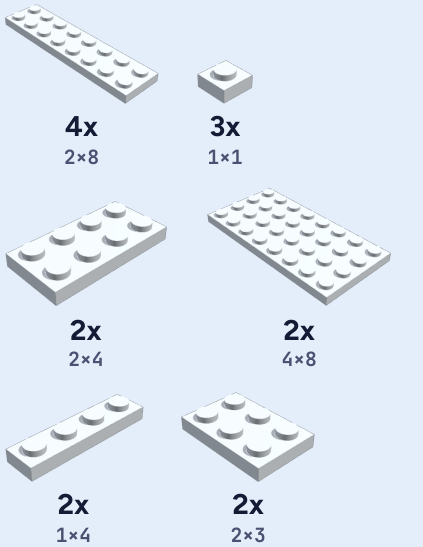

Road bridge piers (8 of 9) (2/2)

More of the same: keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

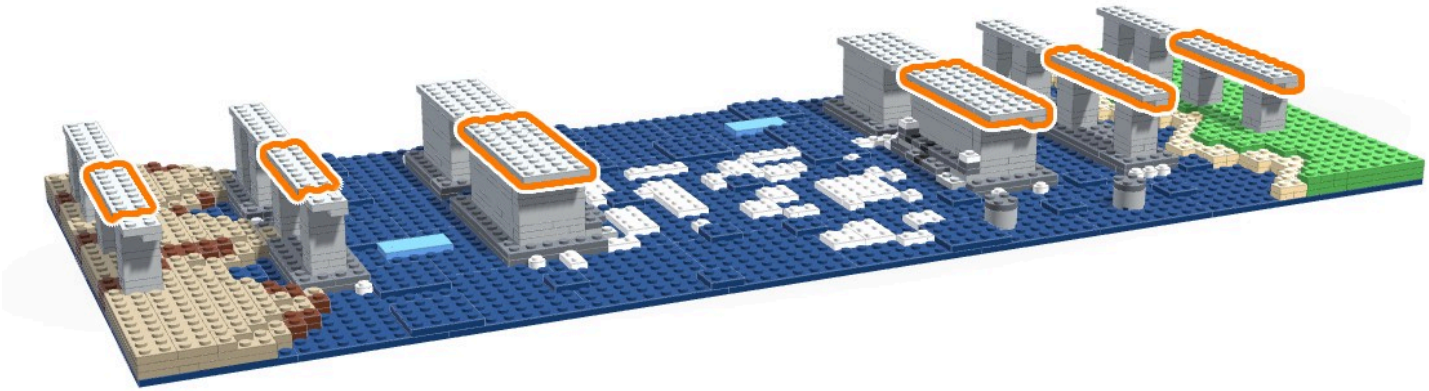

STEP

36

Road bridge piers (9 of 9)

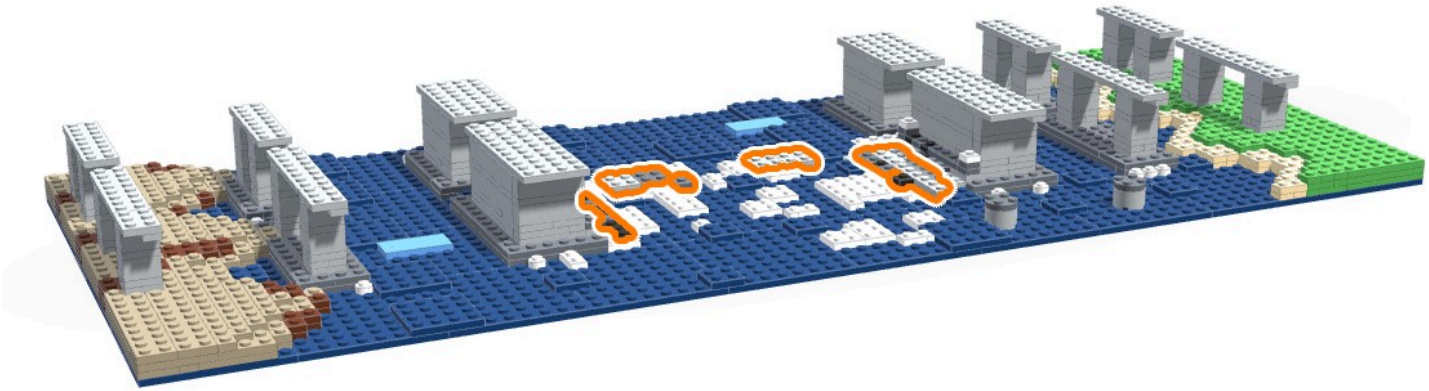

Keep going: the piers of the road bridge in front. The two big ones either side of the channel have lost the arch span that stood on them.

STEP

37

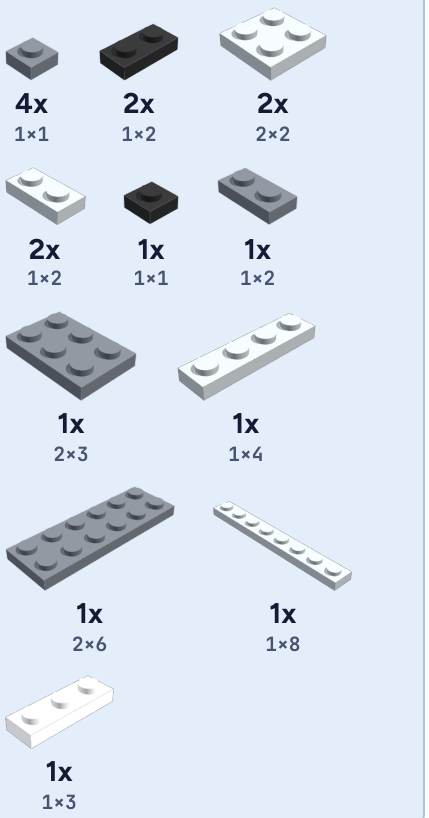

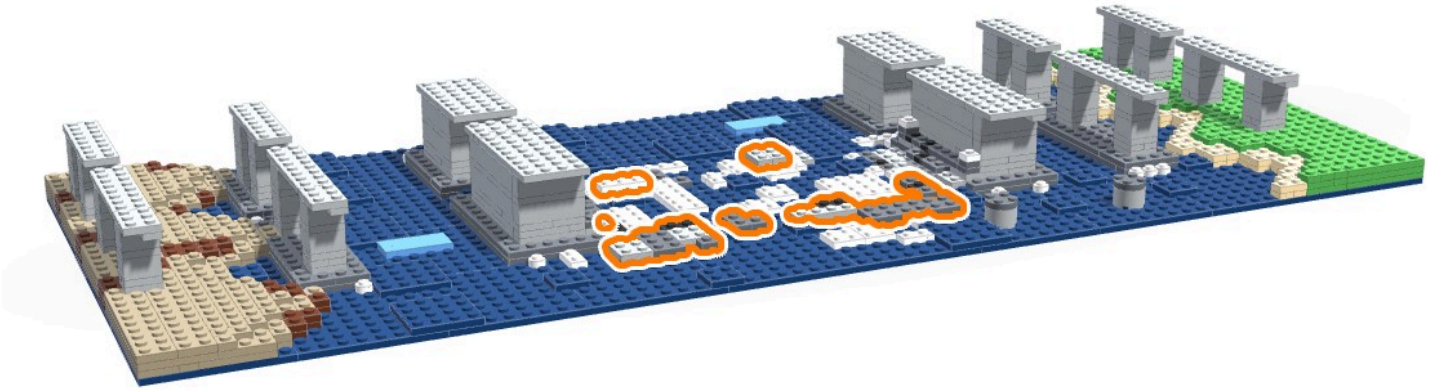

The road in the sea (1 of 5)

Broken concrete in the water, and the lowest plates of the road that went down with the arch. It broke in the middle: the middle is under water, the two ends climb out of the sea towards the piers.

STEP

38

The road in the sea (2 of 5)

Keep going: broken concrete in the water, and the lowest plates of the road that went down with the arch. It broke in the middle: the middle is under water, the two ends climb out of the sea towards the piers.

The road in the sea (3 of 5)

Keep going: broken concrete in the water, and the lowest plates of the road that went down with the arch. It broke in the middle: the middle is under water, the two ends climb out of the sea towards the piers.

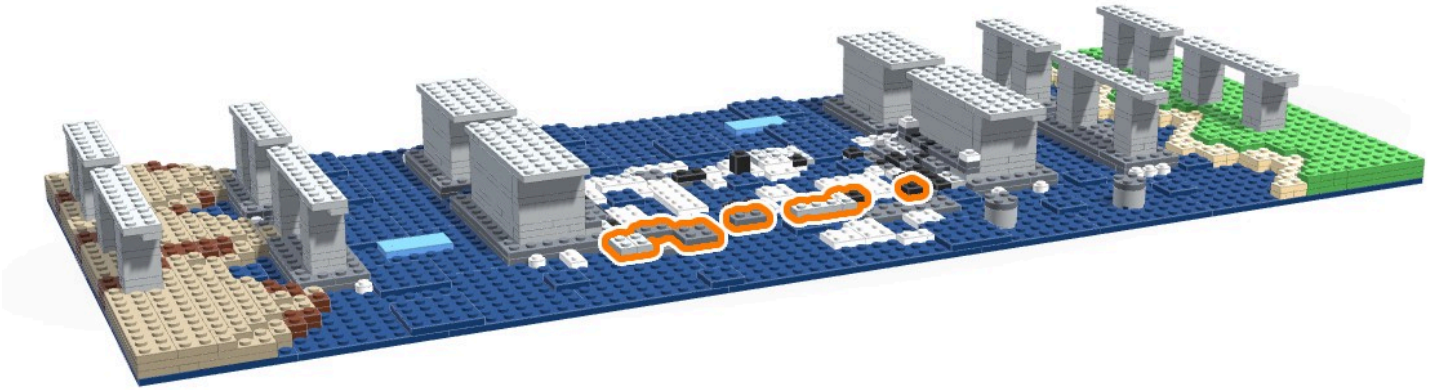

STEP

40

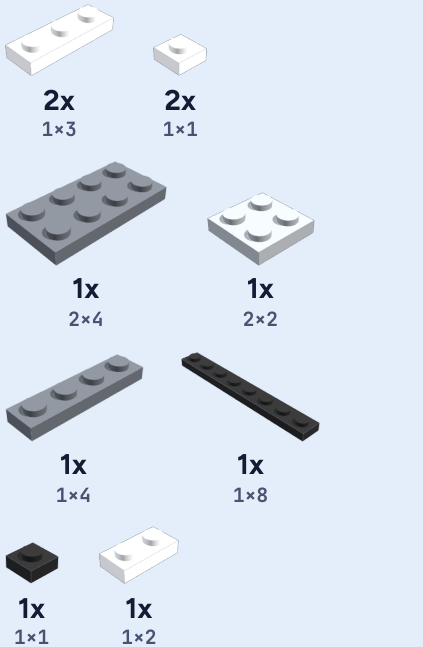

The road in the sea (4 of 5) (1/2)

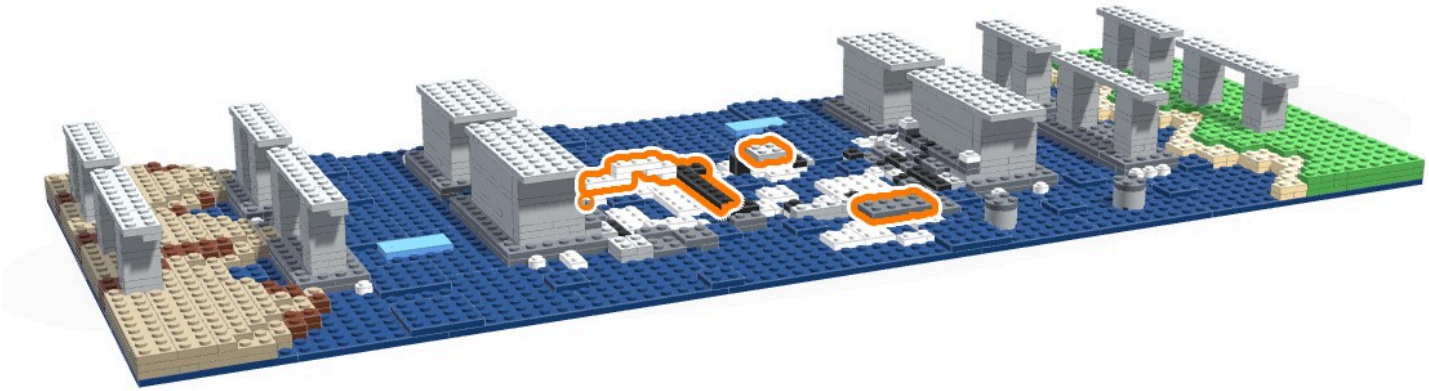

Keep going: broken concrete in the water, and the lowest plates of the road that went down with the arch. It broke in the middle: the middle is under water, the two ends climb out of the sea towards the piers.

STEP

41

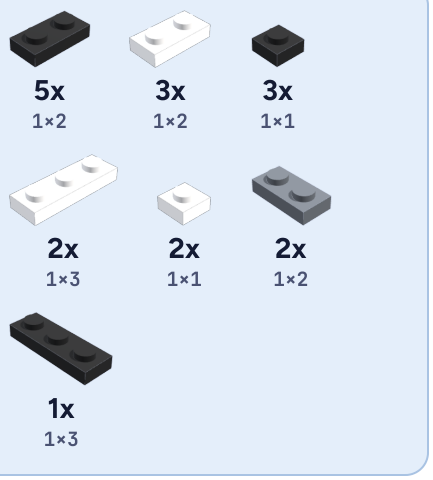

The road in the sea (4 of 5) (2/2)

More of the same: keep going: broken concrete in the water, and the lowest plates of the road that went down with the arch. It broke in the middle: the middle is under water, the two ends climb out of the sea towards the piers.

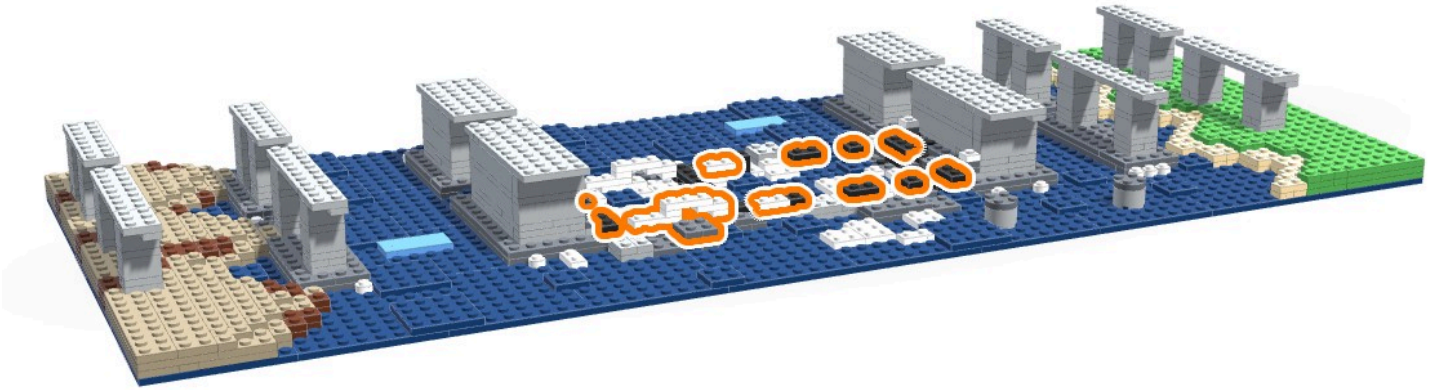

STEP

42

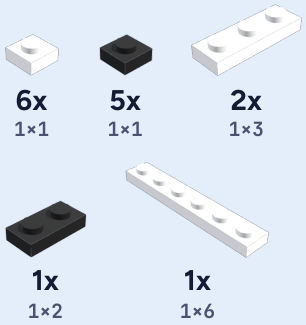

The road in the sea (5 of 5)

Keep going: broken concrete in the water, and the lowest plates of the road that went down with the arch. It broke in the middle: the middle is under water, the two ends climb out of the sea towards the piers.

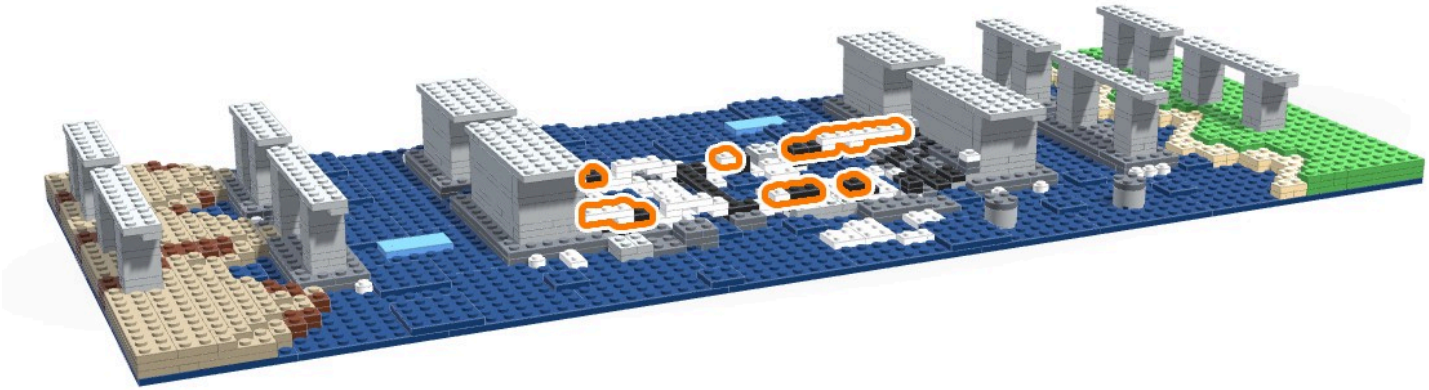

STEP

43

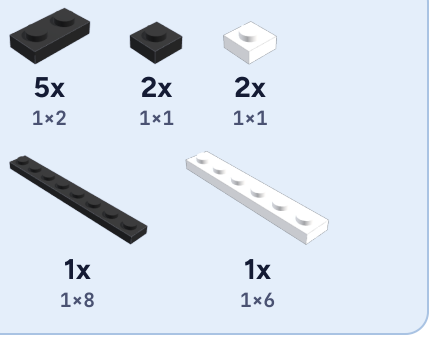

The fallen arch (1 of 4)

The rest of the sunken road, and on it the steel arch of the road bridge, lying in the strait: white where the paint is left, black and grey where it burned. Only its two broken halves show above the water, rising towards the piers.

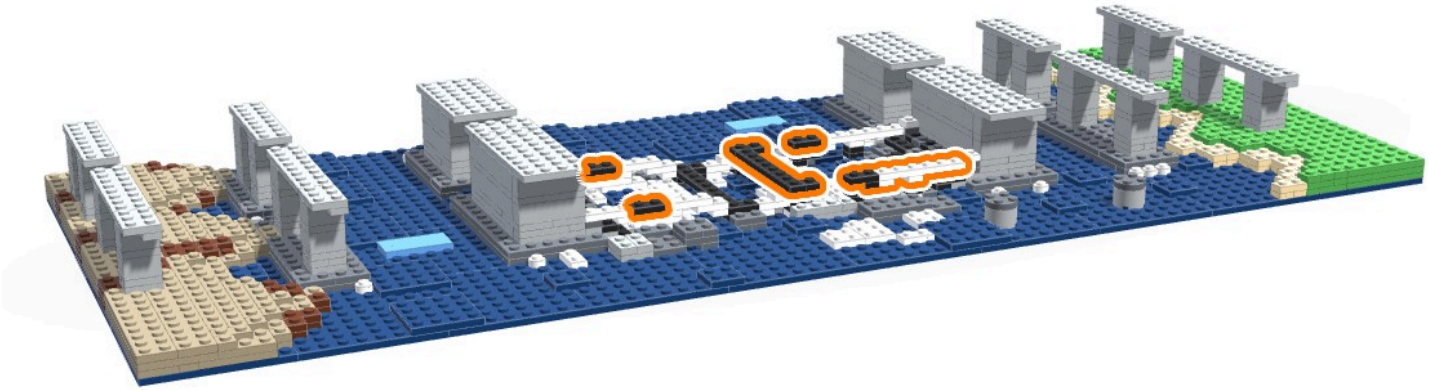

STEP

44

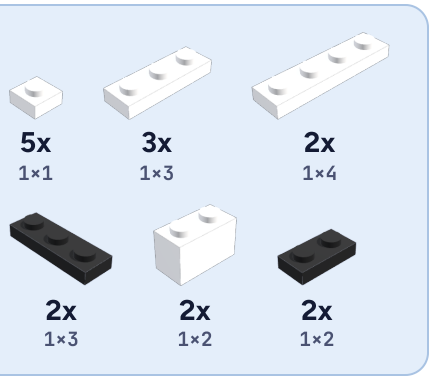

The fallen arch (2 of 4)

Keep going: the rest of the sunken road, and on it the steel arch of the road bridge, lying in the strait: white where the paint is left, black and grey where it burned. Only its two broken halves show above the water, rising towards the piers.

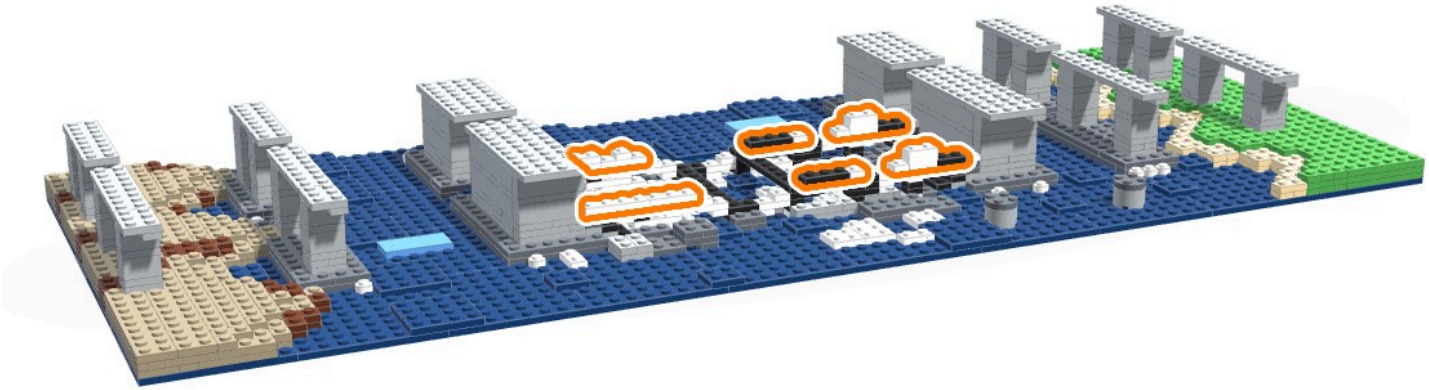

STEP

45

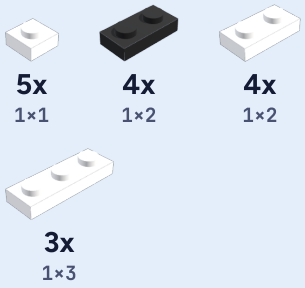

The fallen arch (3 of 4)

Keep going: the rest of the sunken road, and on it the steel arch of the road bridge, lying in the strait: white where the paint is left, black and grey where it burned. Only its two broken halves show above the water, rising towards the piers.

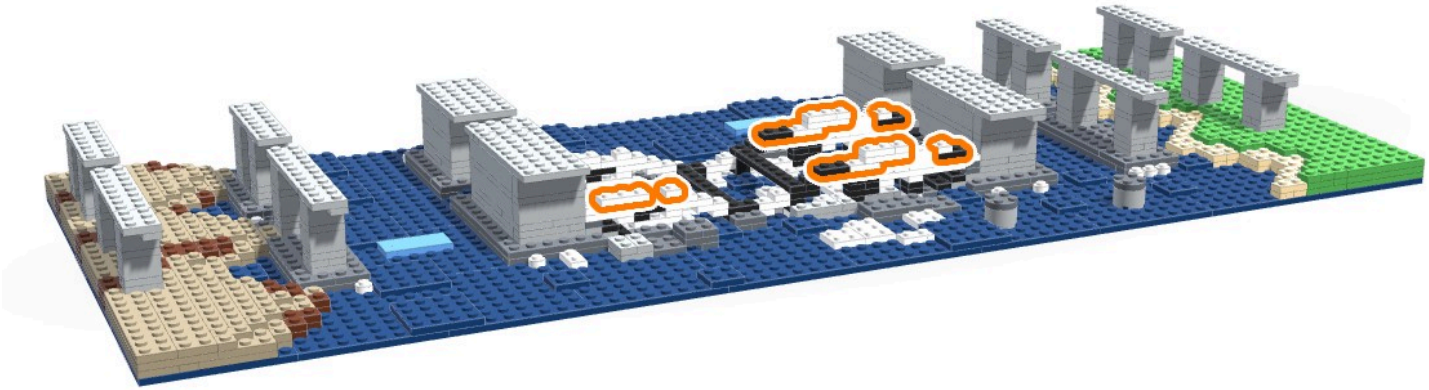

STEP

46

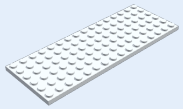

The fallen arch (4 of 4)

Keep going: the rest of the sunken road, and on it the steel arch of the road bridge, lying in the strait: white where the paint is left, black and grey where it burned. Only its two broken halves show above the water, rising towards the piers.

1×8

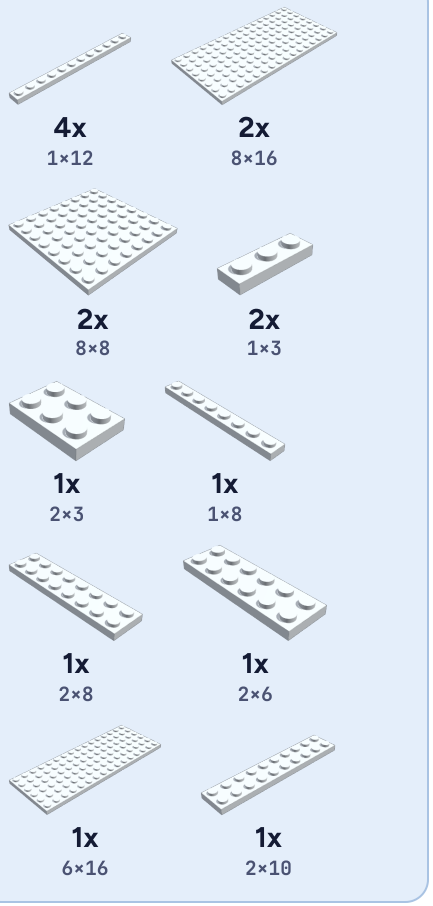

Rail deck (4 of 4)

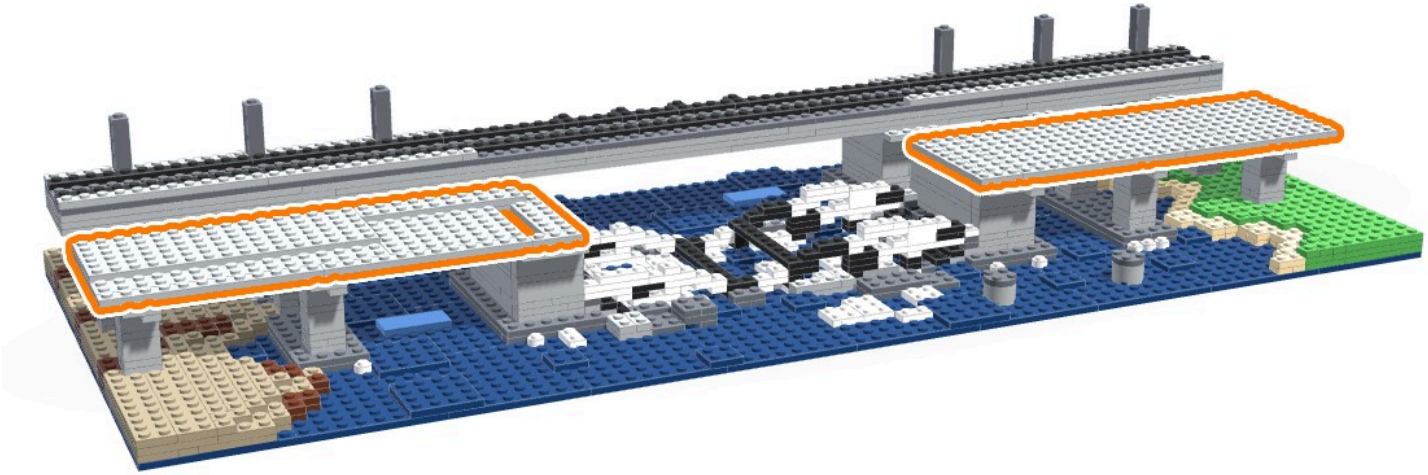

Keep going: the rail bridge deck from end to end: the grey girder, the dark track bed, two black rails and the low edges.

STEP

51

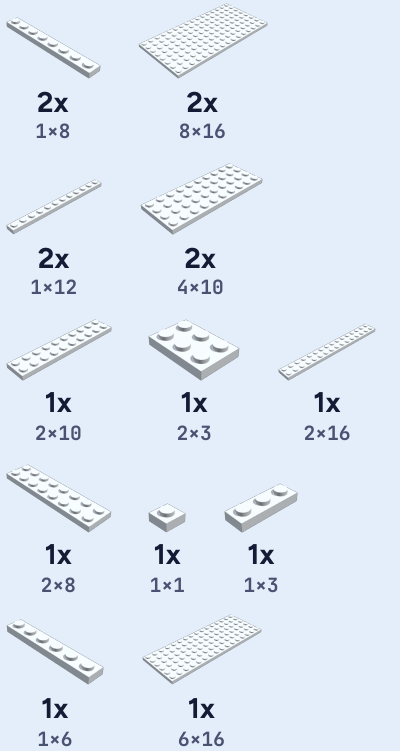

Road deck (1 of 5)

The road deck on both sides of the gap: the girder, the asphalt plate that locks it together, and the kerbs. It stops at the two big piers. A few studs stay open for what will stand on the road.

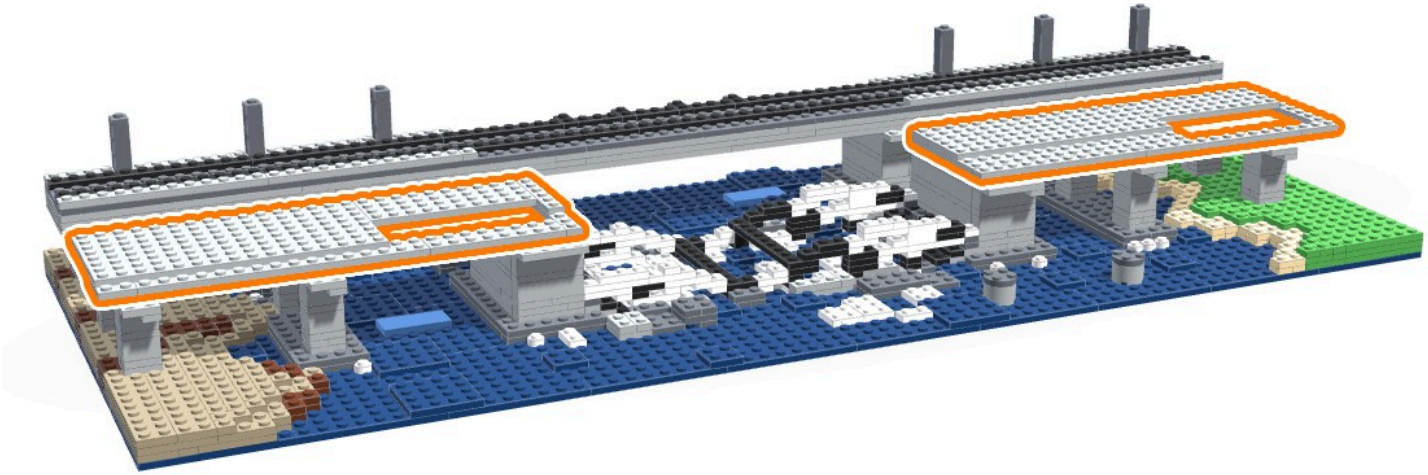

STEP

52

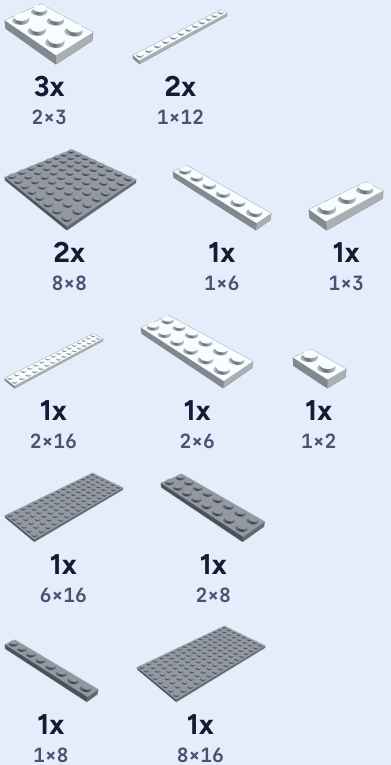

Road deck (2 of 5)

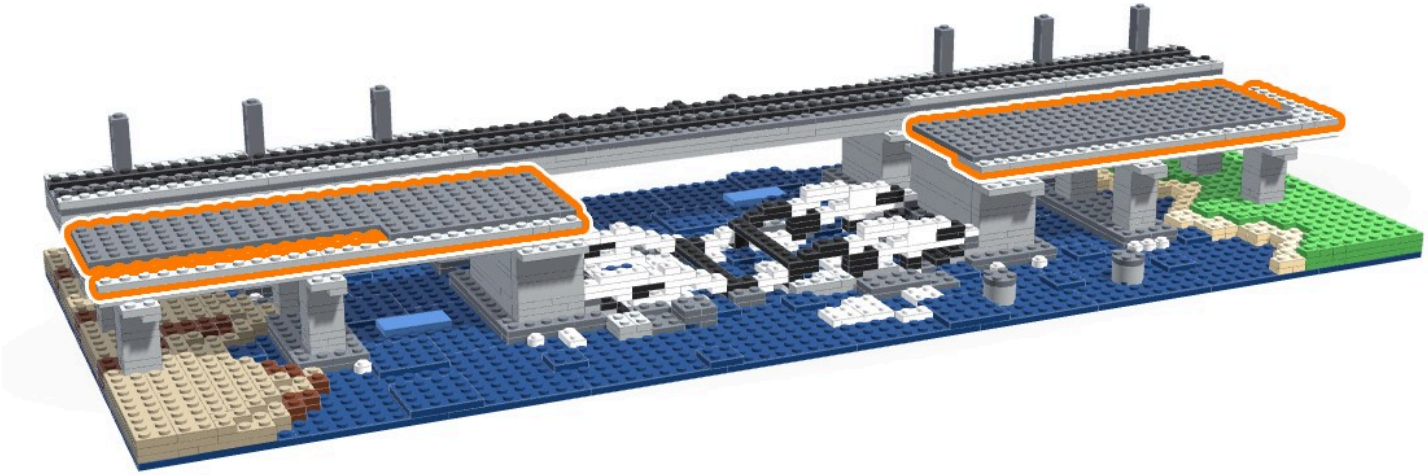

Keep going: the road deck on both sides of the gap: the girder, the asphalt plate that locks it together, and the kerbs. It stops at the two big piers. A few studs stay open for what will stand on the road.

STEP

53

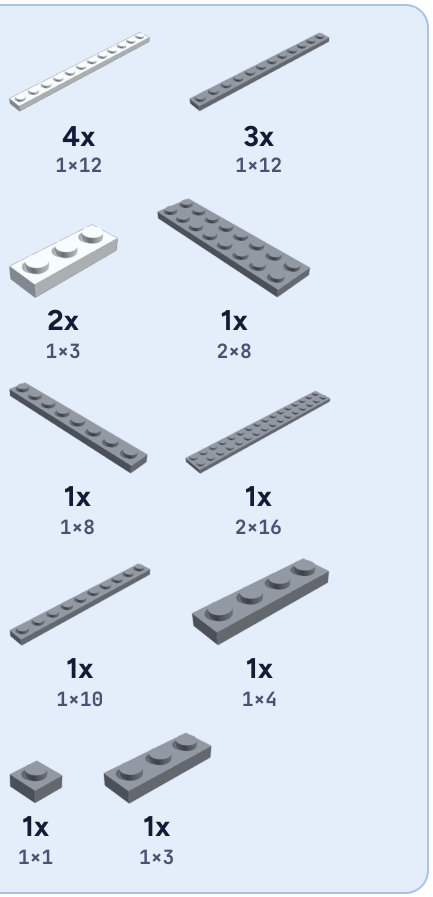

Road deck (3 of 5)

Keep going: the road deck on both sides of the gap: the girder, the asphalt plate that locks it together, and the kerbs. It stops at the two big piers. A few studs stay open for what will stand on the road.

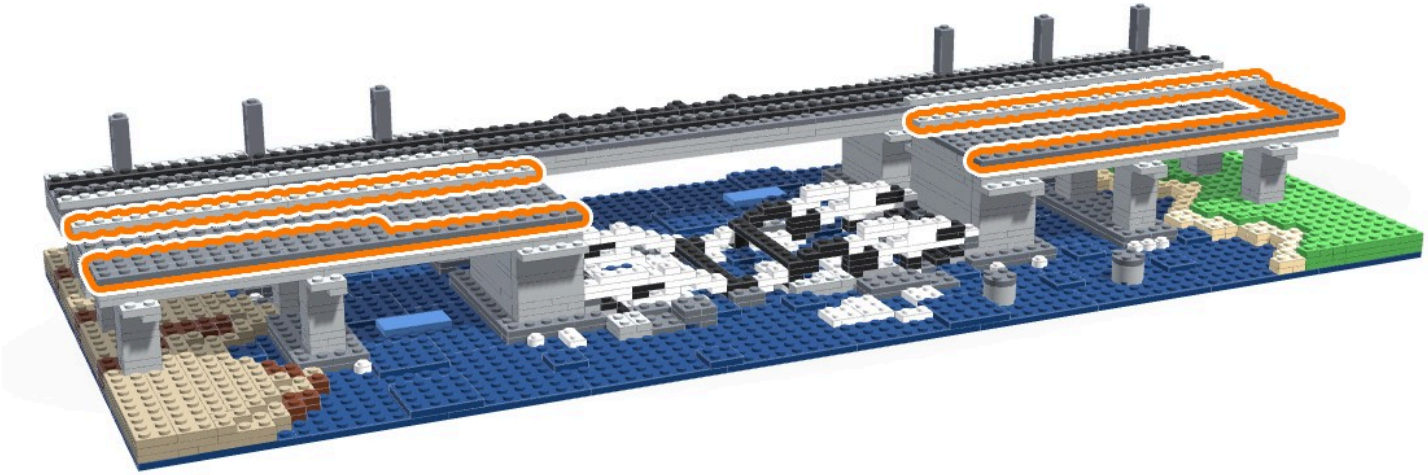

STEP

54

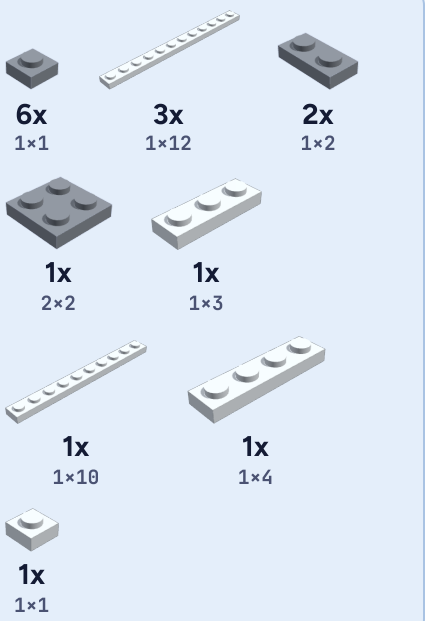

Road deck (4 of 5)

Keep going: the road deck on both sides of the gap: the girder, the asphalt plate that locks it together, and the kerbs. It stops at the two big piers. A few studs stay open for what will stand on the road.

STEP

55

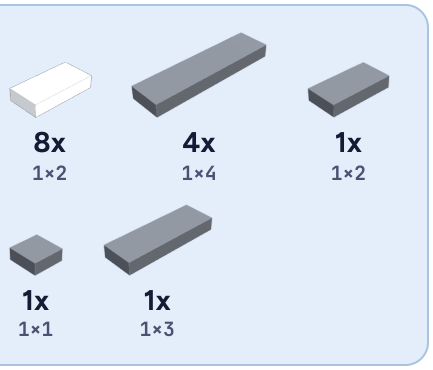

Road deck (5 of 5)

Keep going: the road deck on both sides of the gap: the girder, the asphalt plate that locks it together, and the kerbs. It stops at the two big piers. A few studs stay open for what will stand on the road.

STEP

56

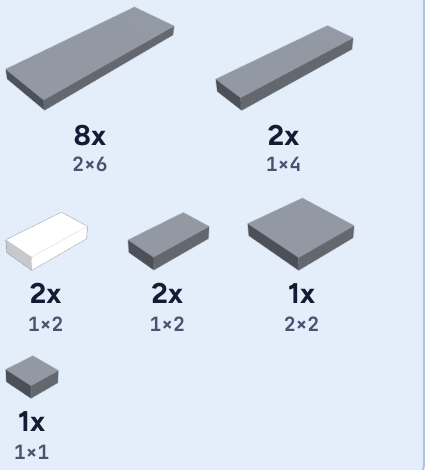

Road surface (1 of 4)

Tile the road smooth: dark tiles in two lanes, and down the middle a dashed line, a white 1×2 tile then a dark 1×4.

STEP

57

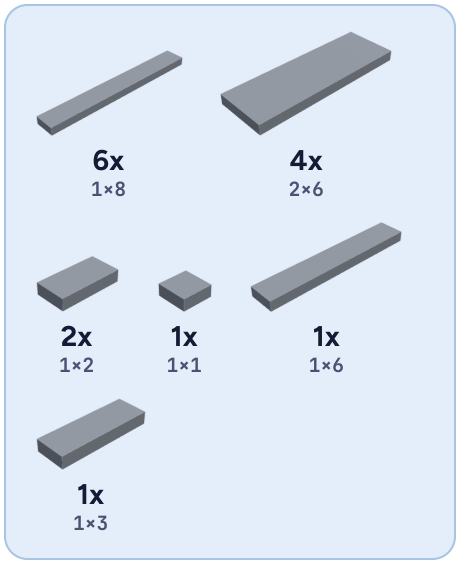

Road surface (2 of 4)

Keep going: tile the road smooth: dark tiles in two lanes, and down the middle a dashed line, a white 1×2 tile then a dark 1×4.

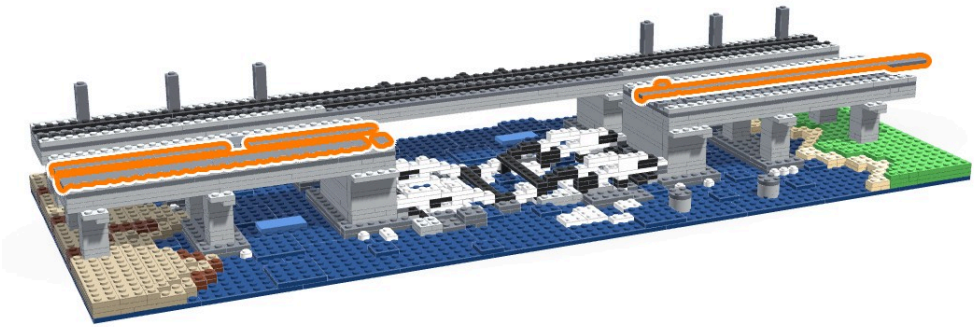

STEP

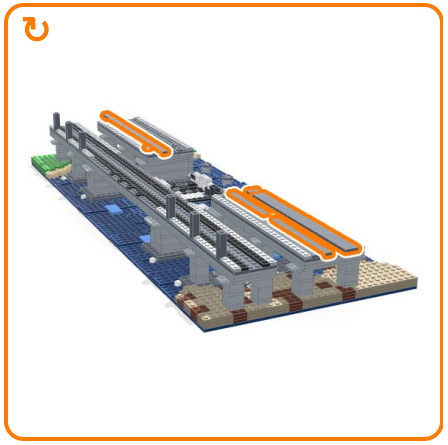

58

Road surface (3 of 4)

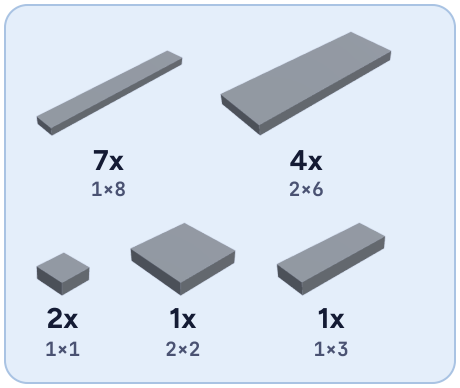

Keep going: tile the road smooth: dark tiles in two lanes, and down the middle a dashed line, a white 1×2 tile then a dark 1×4.

STEP

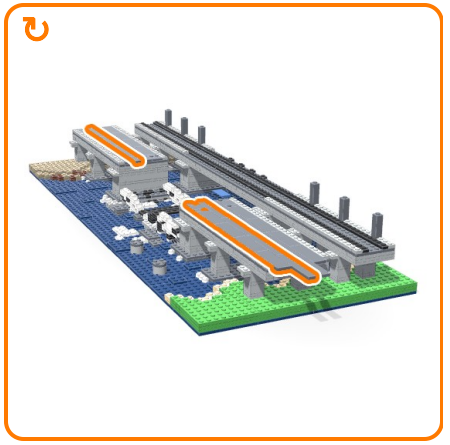

59

Road surface (4 of 4)

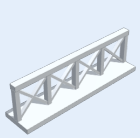

Keep going: tile the road smooth: dark tiles in two lanes, and down the middle a dashed line, a white 1×2 tile then a dark 1×4.

STEP

60

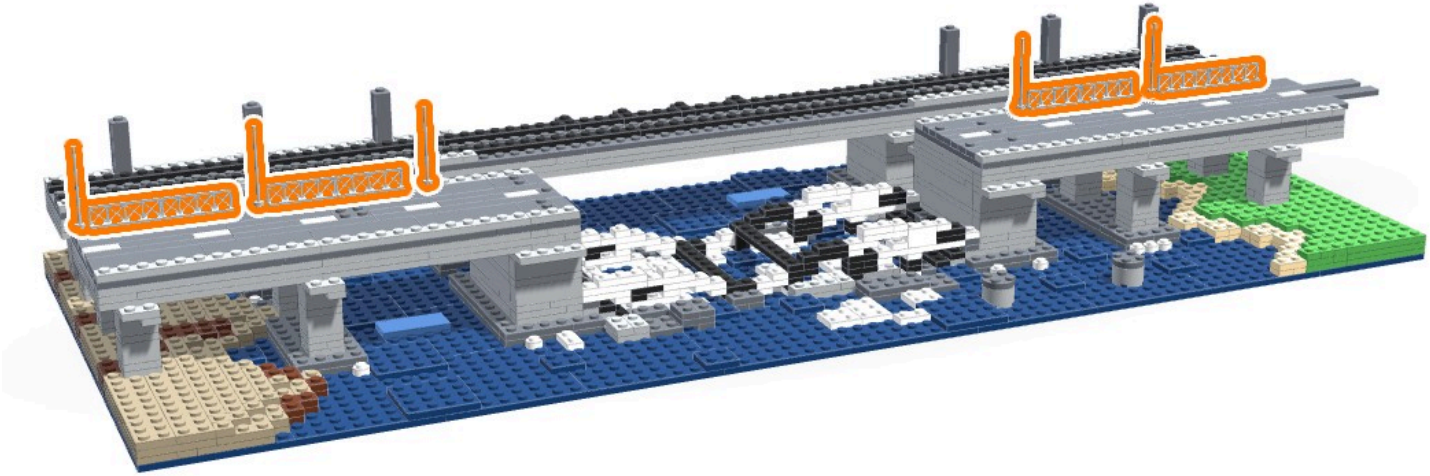

8x
1×4

5x

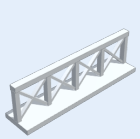

Railings and lamp posts (1 of 2)

Lattice fences along both kerbs with a lamp post every ten studs. Leave the last studs before the gap bare: the railing went down with the arch.

STEP

61

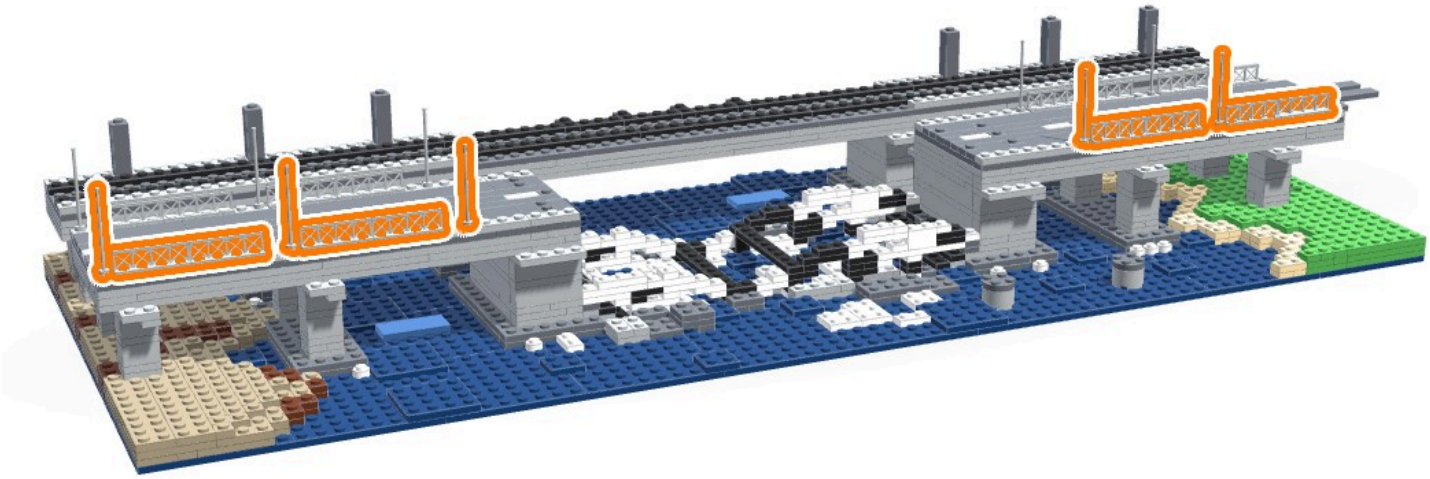

8x
1×4

5x

Railings and lamp posts (2 of 2)

Keep going: lattice fences along both kerbs with a lamp post every ten studs. Leave the last studs before the gap bare: the railing went down with the arch.

STEP

62

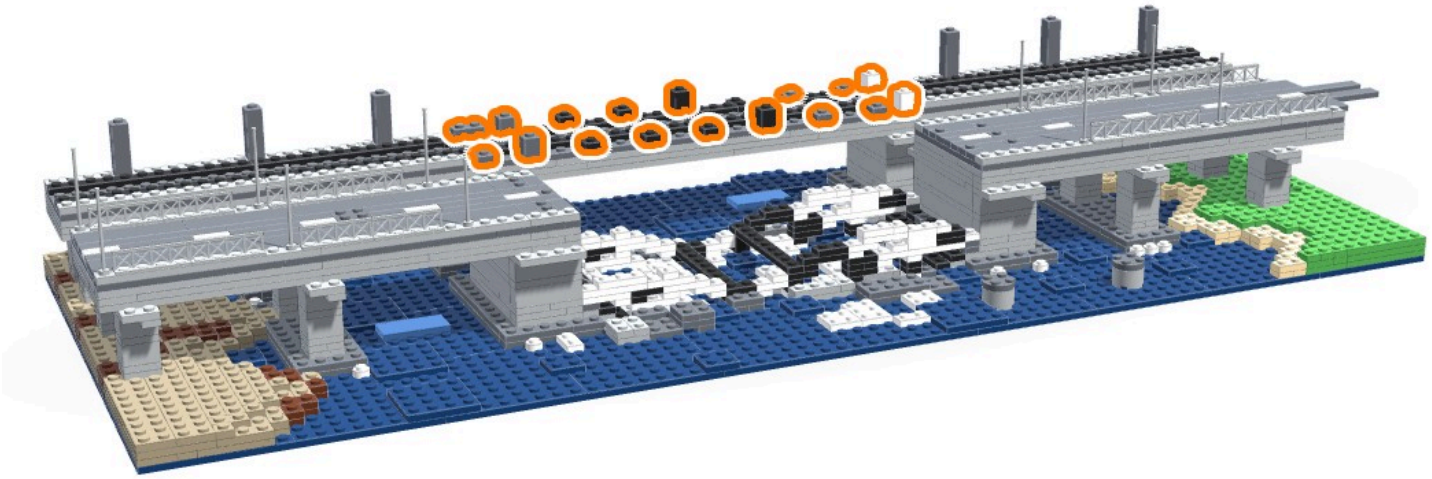

6x 1×1 · 5x 1×1 · 2x 1×1 · 2x 1×1

2x 1×1 · 1x 1×2

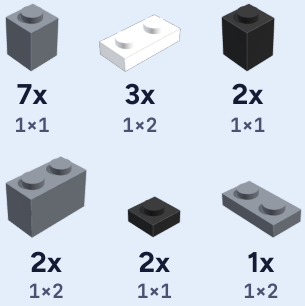

Rail arch (1 of 13)

The truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

63

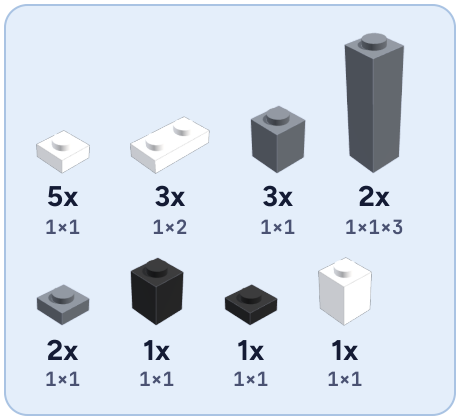

Rail arch (2 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

64

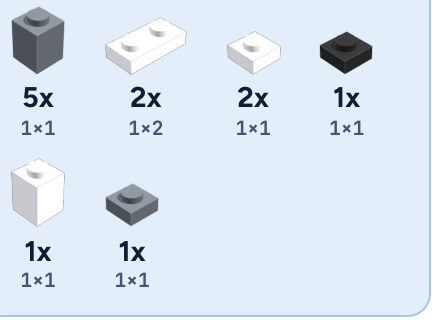

Rail arch (3 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

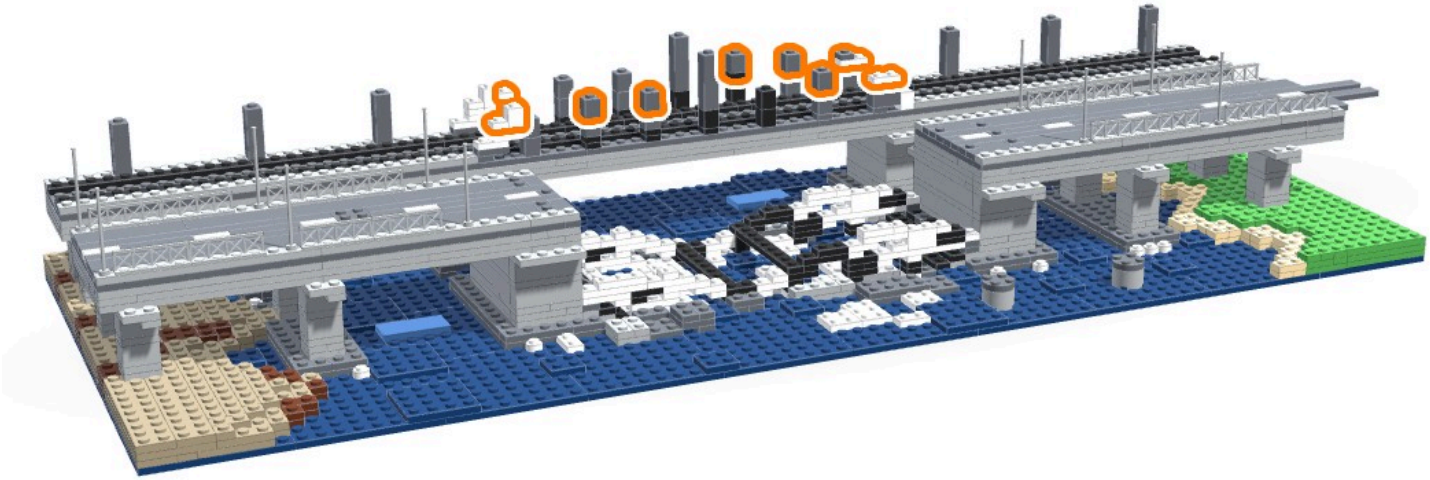

STEP

65

Rail arch (4 of 13) (1/2)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

66

6x 1×1 · 3x 1×1 · 2x 1×3

1x 1×1

Rail arch (4 of 13) (2/2)

More of the same: keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

67

5x 1×1 · 3x 1×1 · 3x 1×3

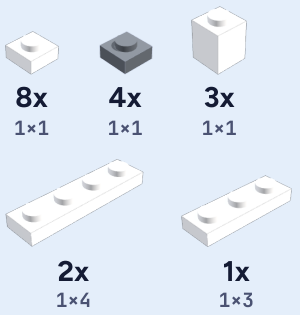

Rail arch (5 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

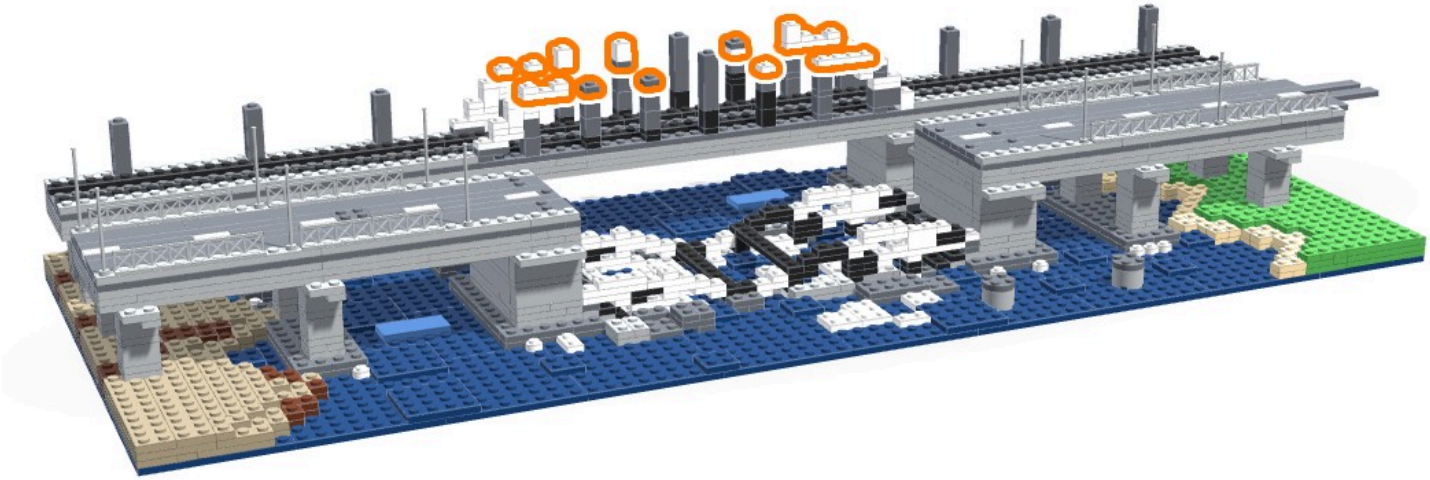

STEP

68

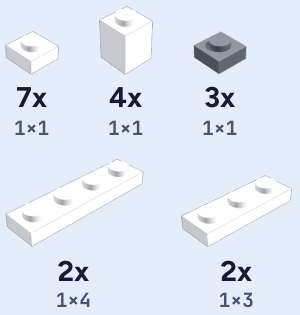

Rail arch (6 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

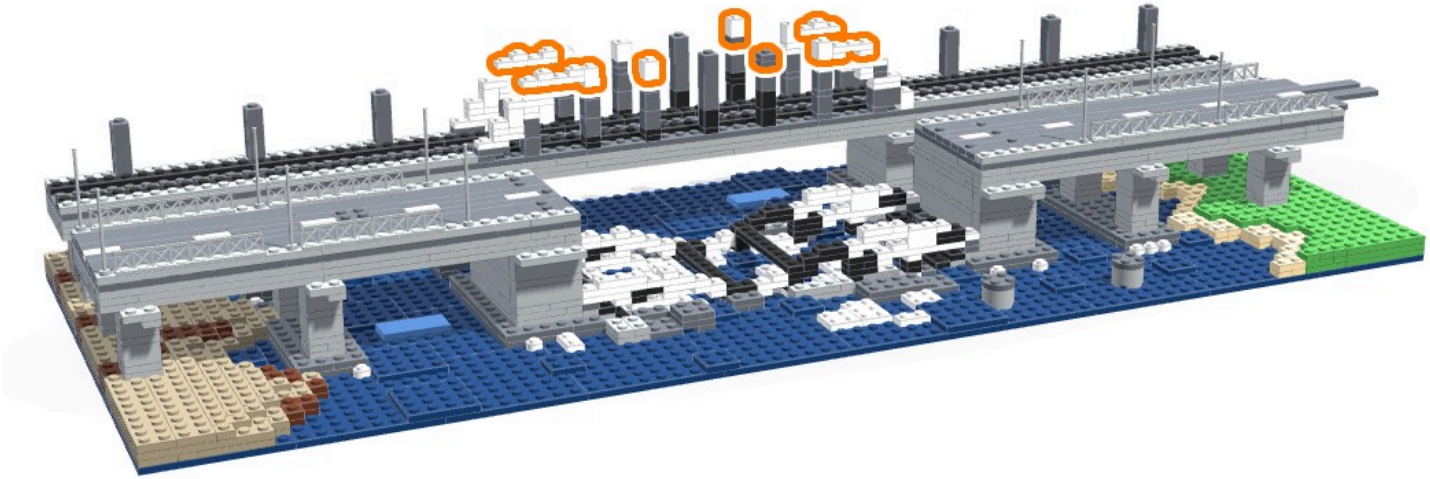

STEP

69

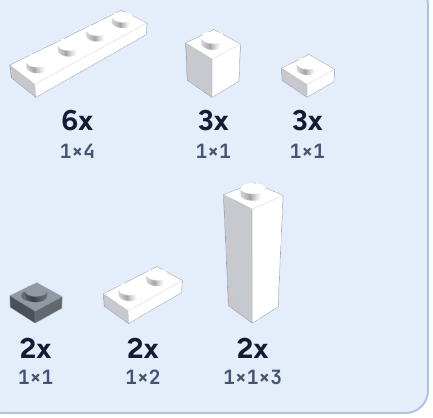

Rail arch (7 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

70

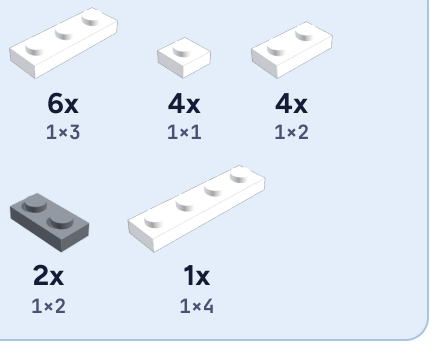

Rail arch (8 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

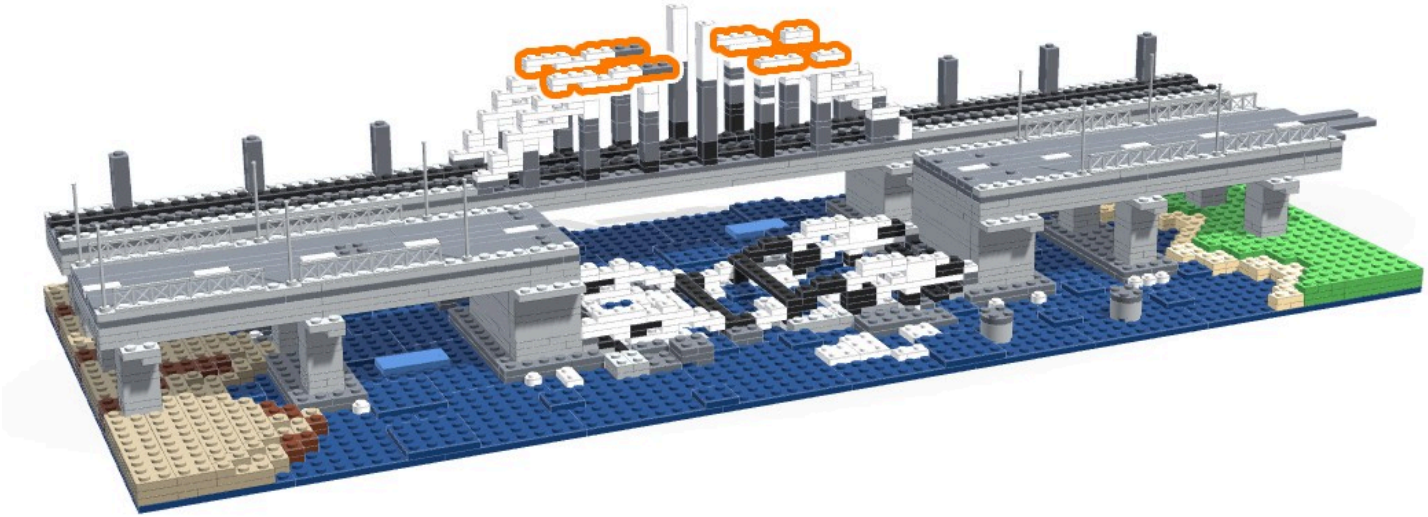

STEP

71

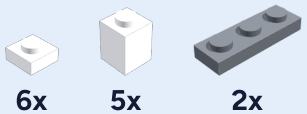

Rail arch (9 of 13)

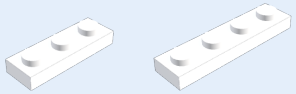

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

72

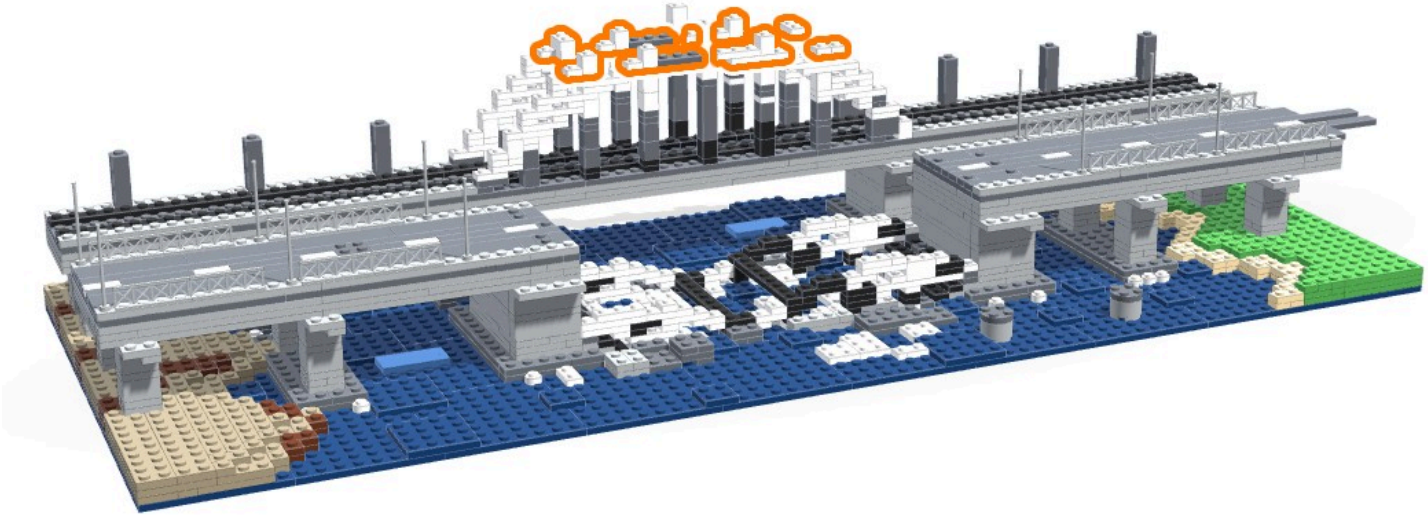

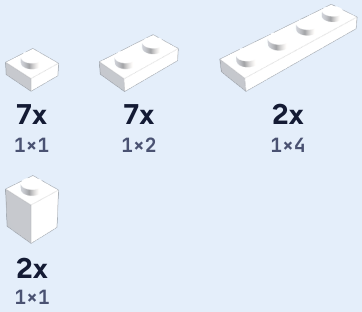

Rail arch (10 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

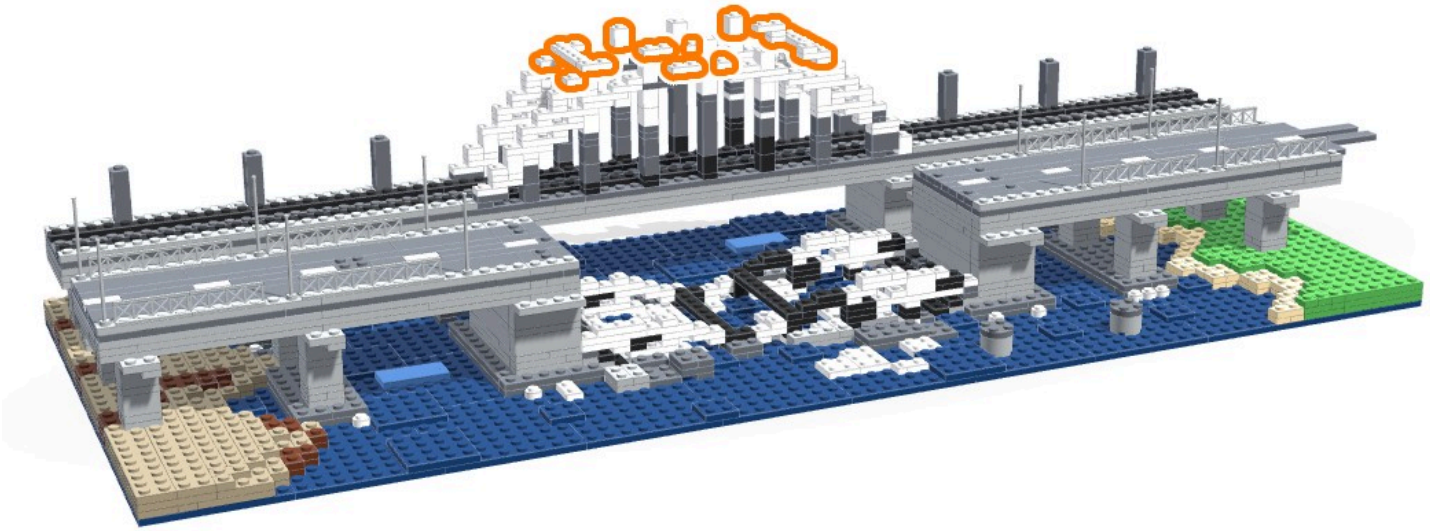

STEP

73

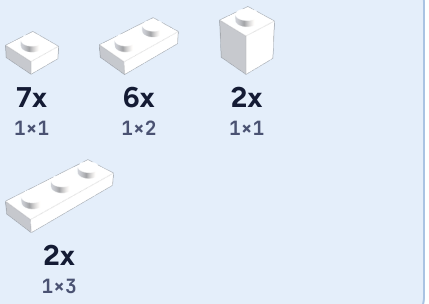

Rail arch (11 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

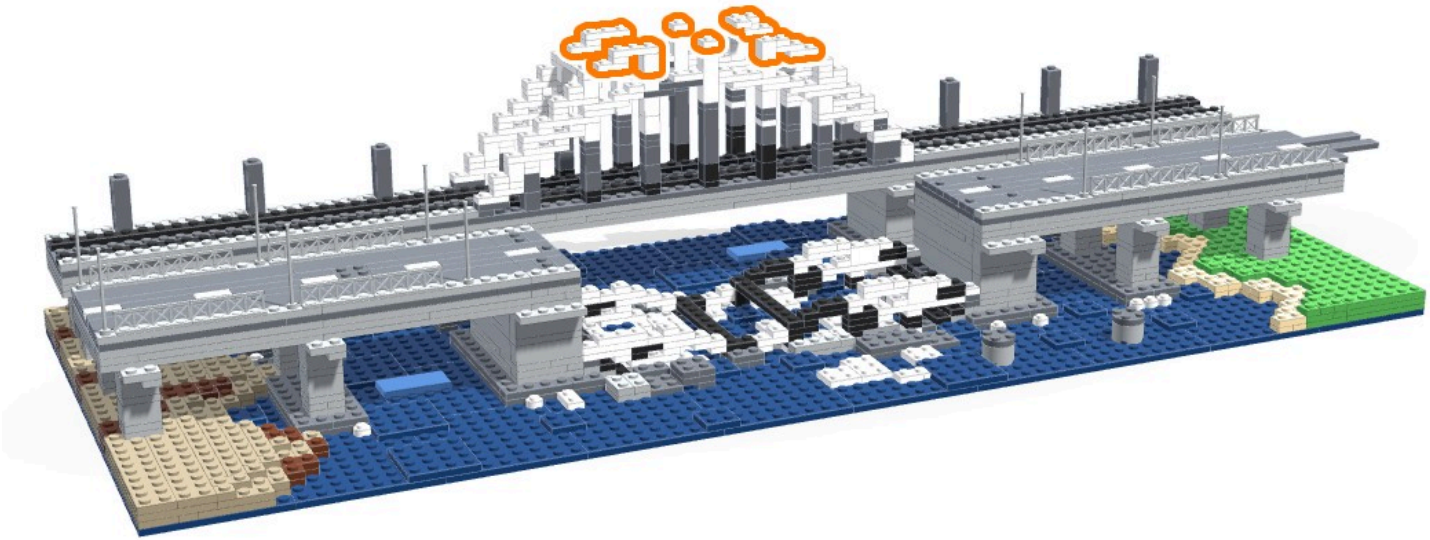

STEP

74

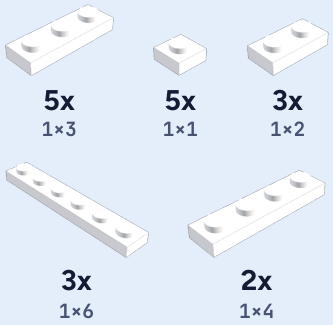

Rail arch (12 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

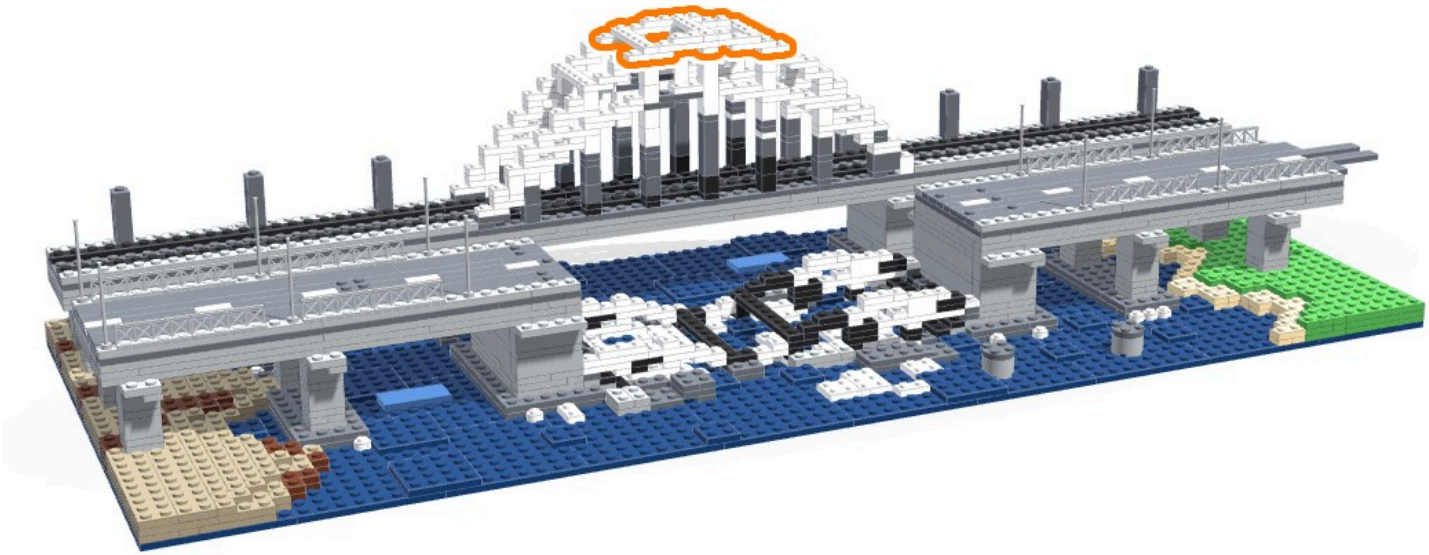

STEP

75

Rail arch (13 of 13)

Keep going: the truss arch of the rail bridge, still standing: two ribs, each an upper and a lower chord with verticals between them and hangers down to the deck, braced across at the crown. Smoke has blackened it, worst low down in the middle; the crown and the ends are still white.

STEP

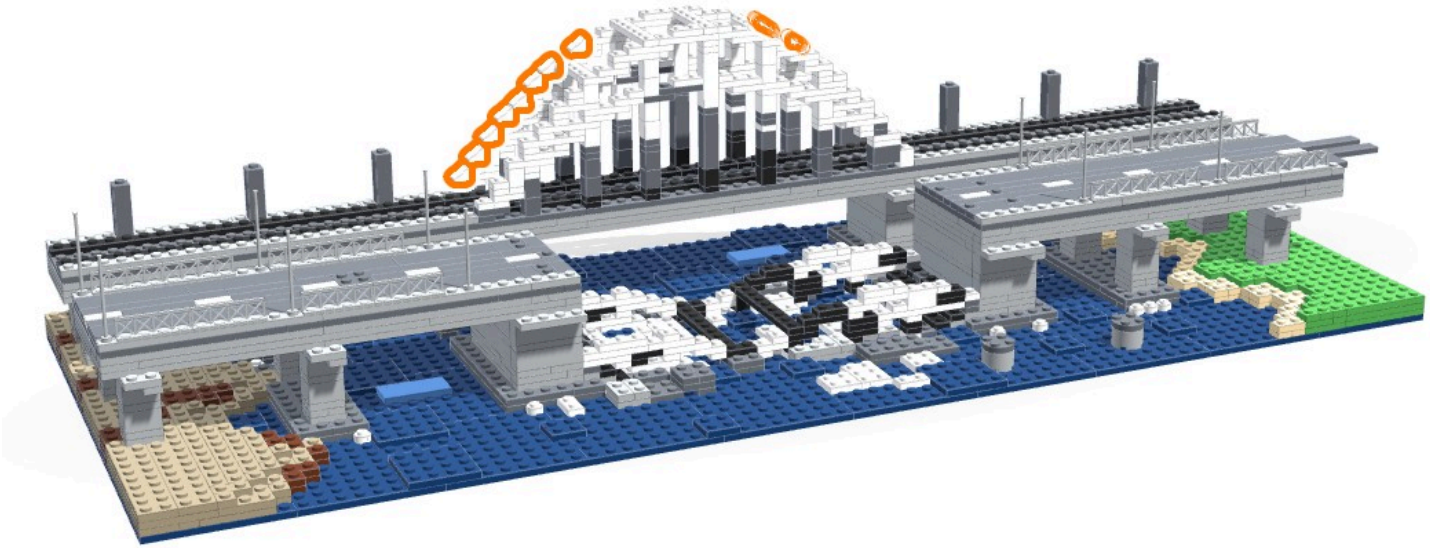

76

16x
1×1

Rounding the arch (1 of 2)

A small slope on every step of the arch, so its outline runs in a curve.

STEP

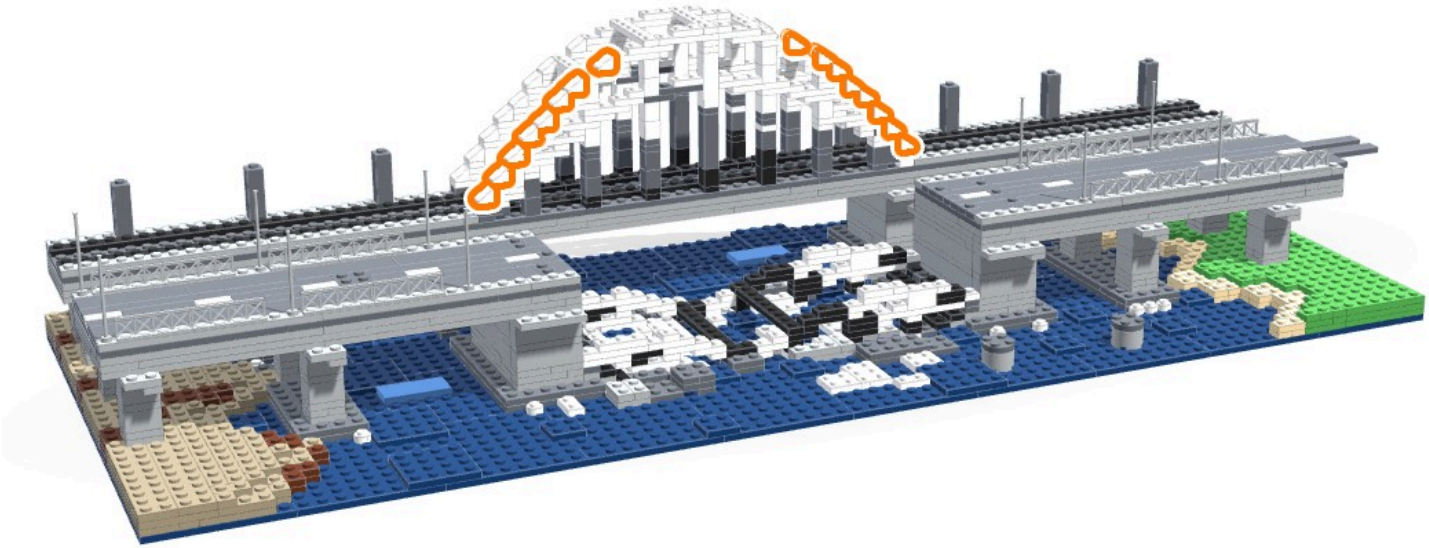

77

16x
1×1

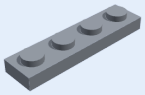

Rounding the arch (2 of 2)

Keep going: a small slope on every step of the arch, so its outline runs in a curve.

STEP

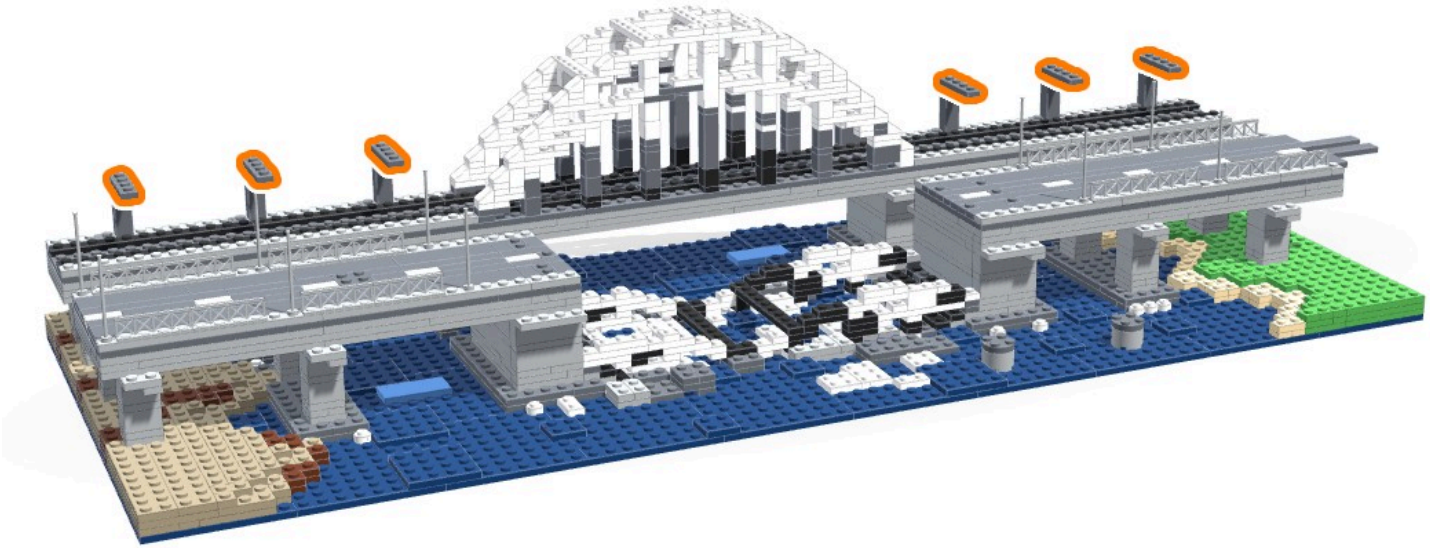

78

6x
1×4

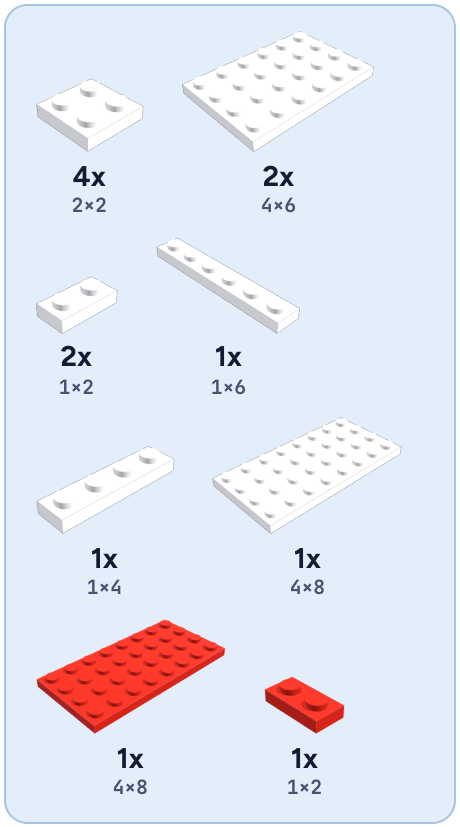

Overhead-line masts

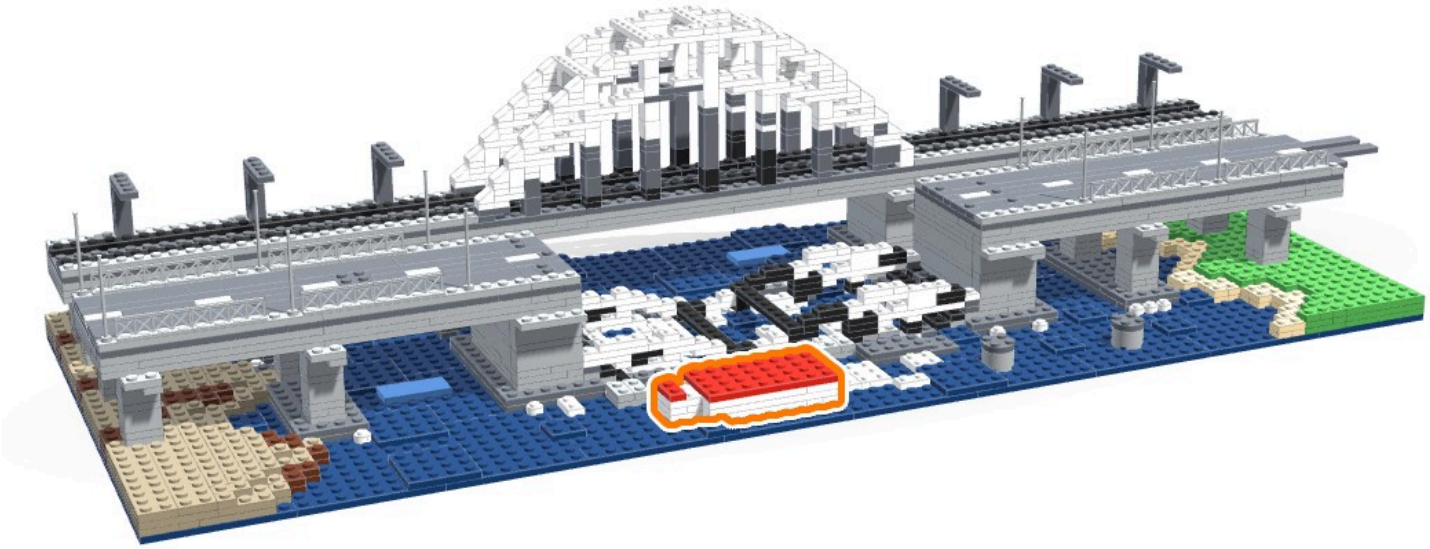

Dark grey masts along the back of the rail bridge, each with an arm over the tracks.

STEP

79

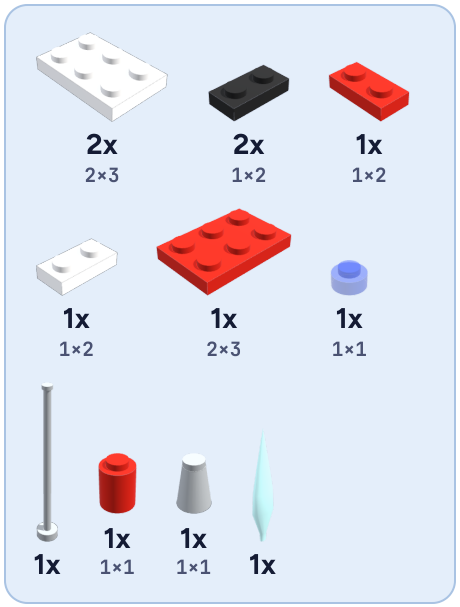

Fire boat (1 of 2)

The fire boat: a white hull with a red stripe, a wheelhouse with black windows and a red roof. Then its fittings: a blue warning light, a mast, and the water cannon on the foredeck, a round brick with a cone, shooting a jet of water.

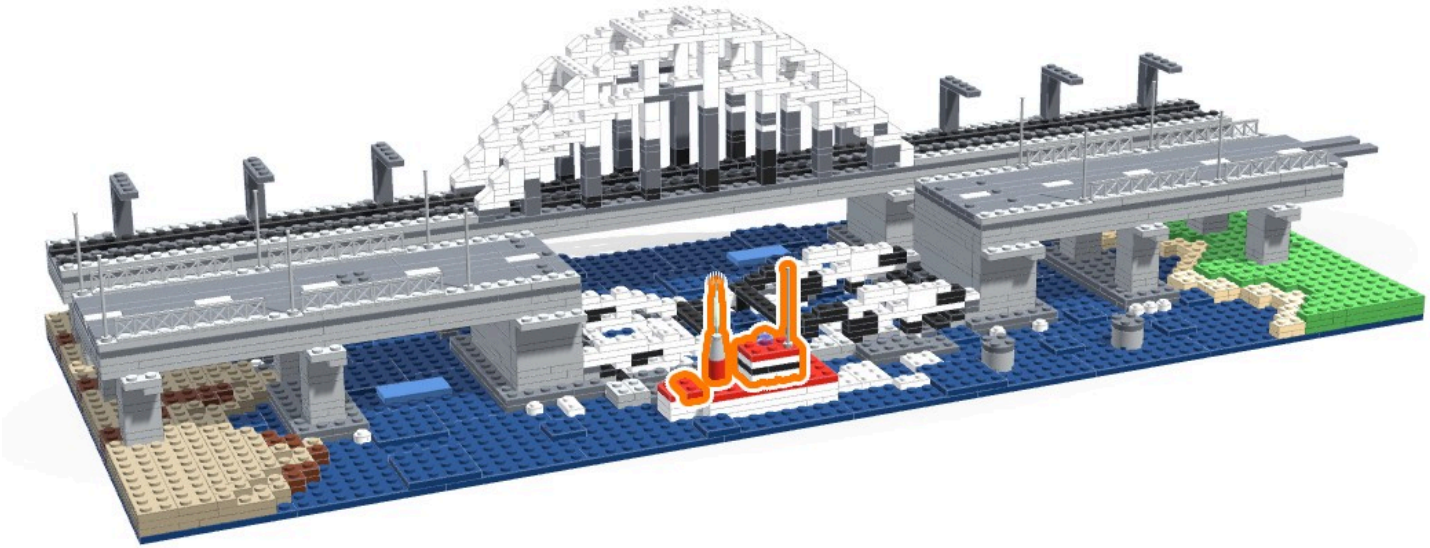

STEP

80

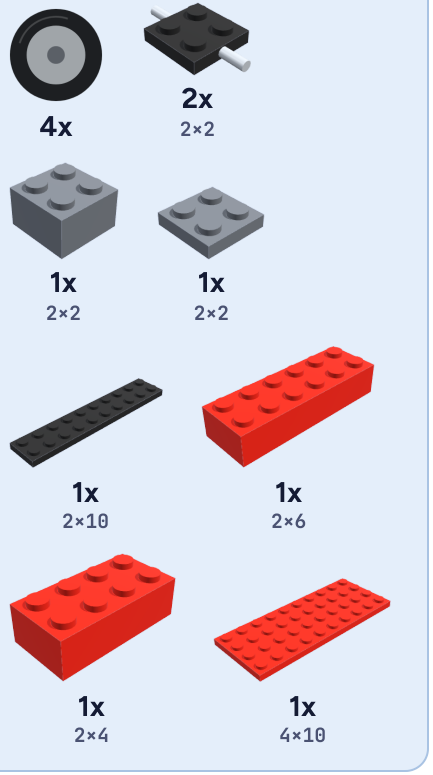

Fire boat (2 of 2)

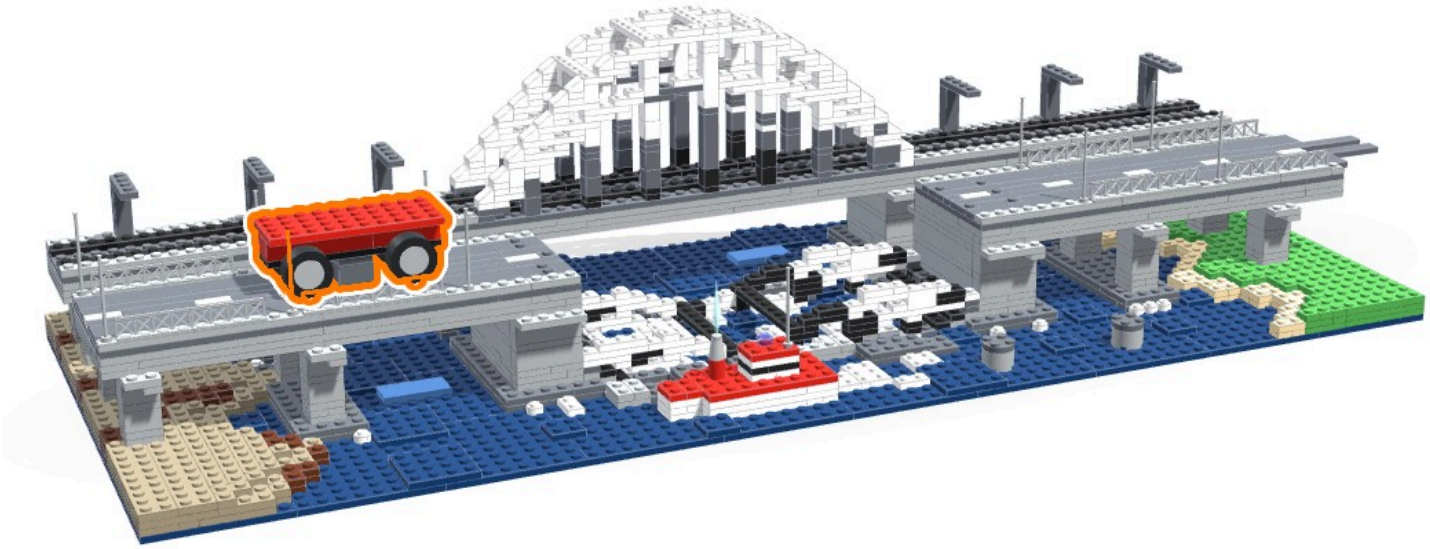

Keep going: the fire boat: a white hull with a red stripe, a wheelhouse with black windows and a red roof. Then its fittings: a blue warning light, a mast, and the water cannon on the foredeck, a round brick with a cone, shooting a jet of water.

STEP

81

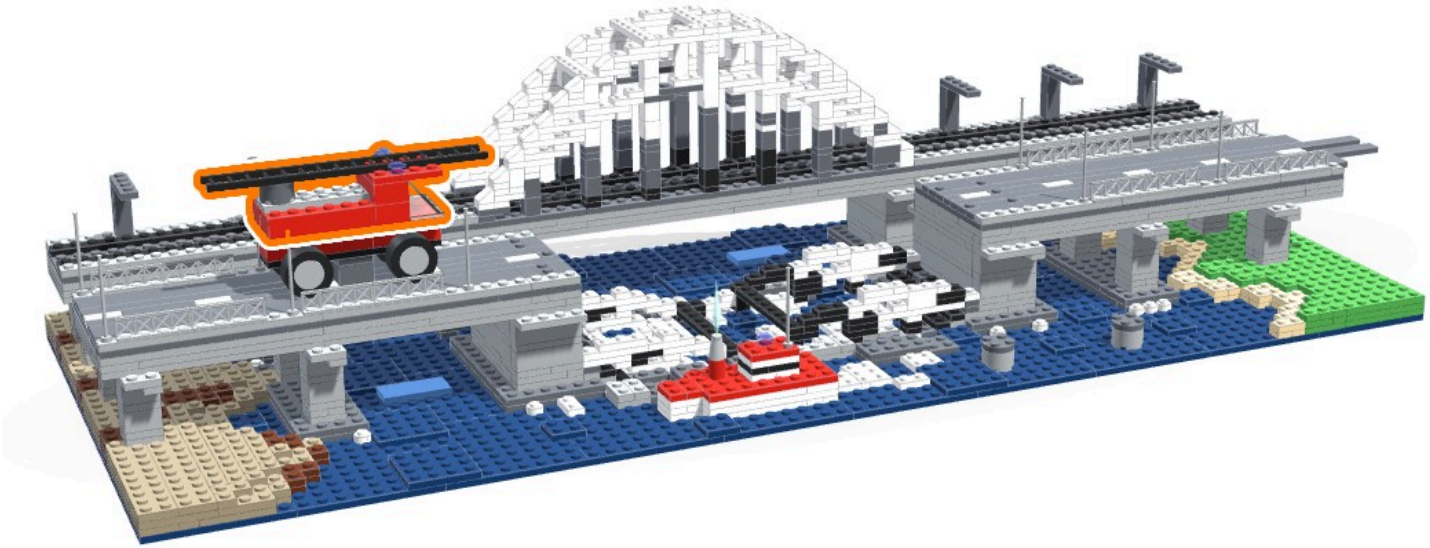

Fire engine (1 of 2)

Start with the 2×2 brick and plate on the open studs of the road: they hold the engine. Wheel plates and wheels, the black chassis strip, then the red body, the cab with its windscreen and two blue lights, a hose reel on top and the long black ladder laid over it.

STEP

82

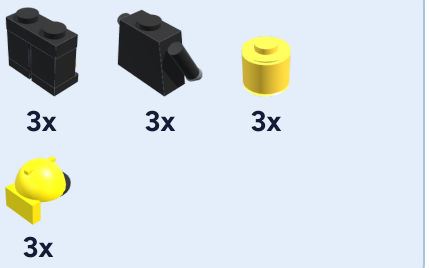

Fire engine (2 of 2)

Keep going: start with the 2×2 brick and plate on the open studs of the road: they hold the engine. Wheel plates and wheels, the black chassis strip, then the red body, the cab with its windscreen and two blue lights, a hose reel on top and the long black ladder laid over it.

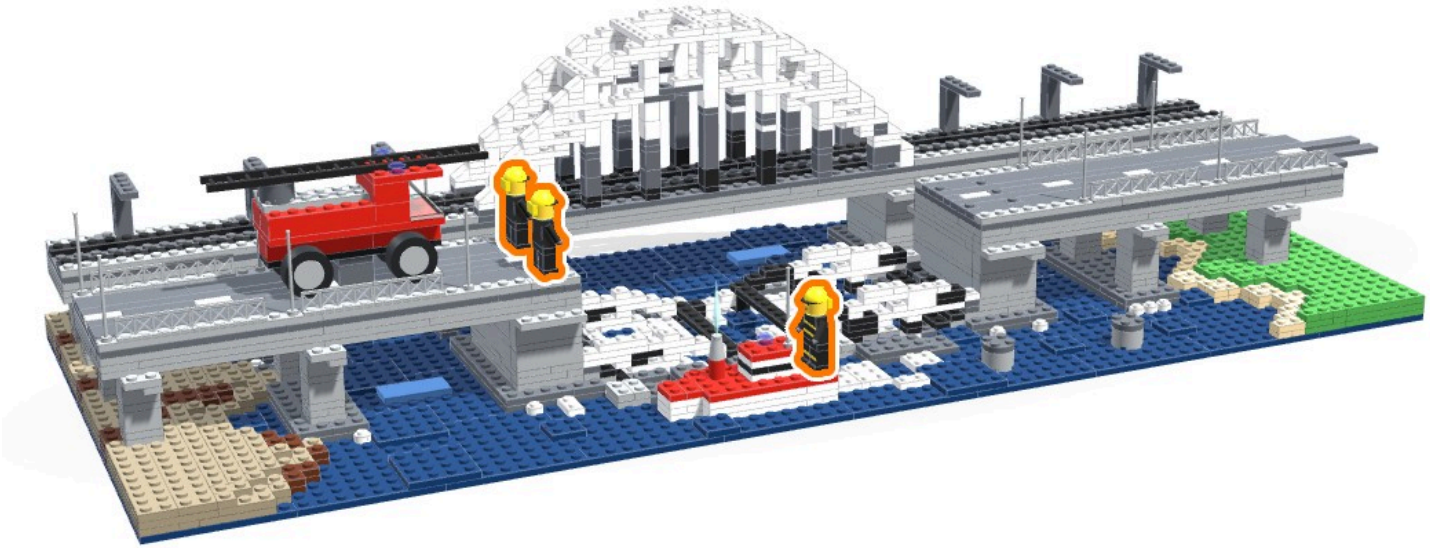

STEP

83

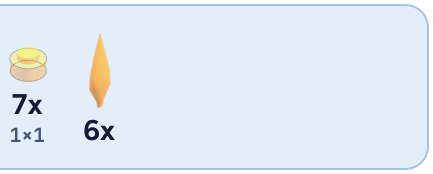

Firefighters

Three firefighters, each built from legs, torso, head and the yellow fire helmet with its black peak. Two stand at the edge of the gap, one rides the stern of the fire boat.

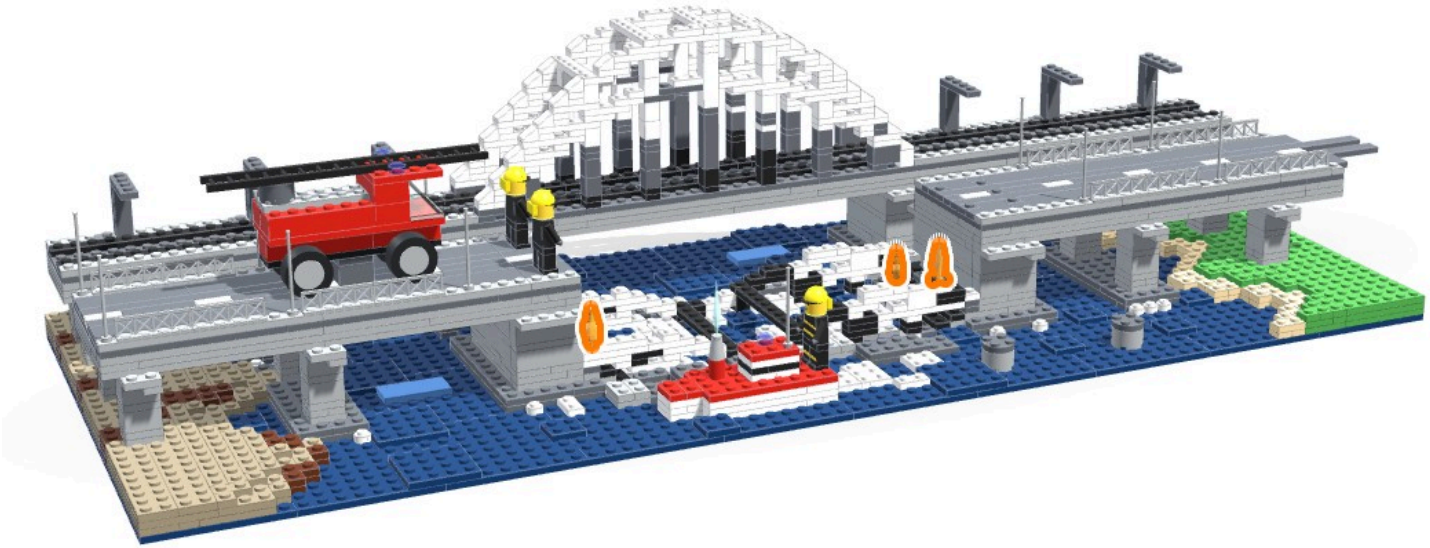

STEP

84

Fire (1 of 2)

Glowing embers with a flame in each (two big ones where the arch burns), on the sunken road and at both broken edges, and chips of concrete.

STEP

85

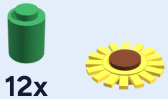

Fire (2 of 2)

Keep going: glowing embers with a flame in each (two big ones where the arch burns), on the sunken road and at both broken edges, and chips of concrete.

STEP

86

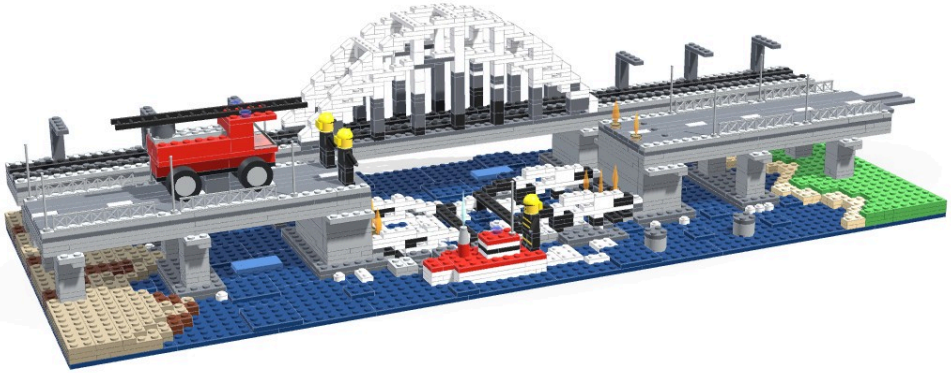

12x
1×1

6x

Sunflowers (1 of 4)

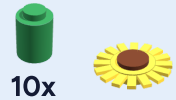

Sunflowers on the green coast, on the right: a stem of one or two green round bricks, then the yellow head.

STEP

87

10x
1×1

8x

Sunflowers (2 of 4)

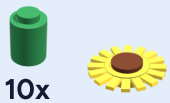

Keep going: sunflowers on the green coast, on the right: a stem of one or two green round bricks, then the yellow head.
